

Sai Manideep Paruchuri | Business & Data Analyst

Arlington, VA | +1 (571) 550 8292 | manideep@quickitmail.com

SUMMARY

Results-driven **Business Data Analyst** with **3+** years of experience specializing in financial analytics, data governance, and business intelligence. Skilled in **SQL, Python, machine learning**, and **ETL pipelines**, delivering impactful solutions that drive data-backed decisions and operational efficiency. Proficient in **Power BI, Tableau**, and **advanced Excel**, with strong expertise in **KPI** tracking, revenue forecasting, and financial modeling. Experienced in designing and implementing data governance frameworks that ensure regulatory compliance and maintain data integrity. Adept at leveraging cloud technologies such as **AWS** and **GCP** to enhance data analytics capabilities and optimize overall business performance. Demonstrated success in reducing operational inefficiencies and driving business growth by optimizing financial and risk management processes.

SKILLS

Data Analytics & Programming: SQL (PostgreSQL, MySQL, SQL Server), Python (Pandas, NumPy, Scikit-learn), R, Data Wrangling, Data Preprocessing, Statistical Modeling, Machine Learning (Regression, Classification, Clustering), Time Series Forecasting, Predictive Analytics, Data Mining

Business Intelligence & Visualization: Power BI, Tableau, Advanced Excel (Pivot Tables, VLOOKUP, Macros), KPI Analysis, Dashboard Development, Financial Reporting, Data Storytelling

ETL & Cloud Technologies: ETL Pipelines (SSIS, Informatica, Apache Airflow), AWS (S3, EC2, Lambda, Redshift), Google Cloud Platform (BigQuery, Dataflow), Data Warehousing, Cloud-Based Analytics, Data Integration

Project Management & Tools: Agile (Scrum & Kanban), JIRA, Confluence, SDLC, Business Process Automation, Stakeholder Management, Requirement Gathering, Cost-Benefit Analysis

WORK EXPERIENCE

Capital One, USA | Business Data Analyst

Aug 2024 - Present

- Managed and delivered data-driven projects using **Agile** methodologies, enhancing collaboration across cross-functional teams and reducing project delivery time.
- Exploited **Python** and **SAS** for statistical analysis and data manipulation, developing machine learning models that enhanced decision-making and increased operational efficiency by **20%**.
- Applied **Seaborn** and **TensorFlow** to build predictive models and identify key trends, contributing to a **15%** revenue growth by uncovering new business opportunities.
- Conducted **data mining** and **statistical analysis** on datasets exceeding **5TB** using **RapidMiner** and **Apache Spark**, uncovering trends that led to a **20%** improvement in operational strategies.
- Designed and implemented **ETL** processes with **SSIS**, automating data extraction, transformation, and loading, reducing manual processing time by **30%**.
- Exploited **Tableau** Prep to clean and prepare complex datasets, enabling seamless integration into dashboards and reports.
- Considered and distributed **15+** interactive dashboards and **25+** comprehensive reports using **Tableau** and **Crystal Reports**, improving data visibility and driving decision-making efficiency by **30%** for stakeholders.
- Leveraged **GitHub** for version control and collaboration on code-based projects, ensuring seamless handovers and minimizing development errors.
- Applied **critical thinking** and **problem-solving** to diagnose data-related issues, automate solutions, and communicate complex findings, improving data accuracy and business outcomes for both technical and non-technical audiences.

Groovy Web, India | Data Analyst

Jan 2021 - Jun 2023

- Engineered relational data warehouses to consolidate customer behavior datasets, strengthening segmentation accuracy for marketing by **21%**.
- Automated business health reports via **VBA** and **advanced Excel** macros, slashing manual reporting errors and increasing audit readiness.
- Conducted large-scale migration of on-premise reports to **GCP BigQuery**, significantly improving report generation speed and system resilience.
- Developed parameterized **SQL** procedures to streamline recurring performance analytics, ensuring faster insights for leadership decision-making.
- Instituted rigorous **Python ETL** workflows for daily operations, resulting in **97%** data validity across multiple business units.
- Partnered with data stewards to validate incoming feeds, raising data ingestion quality scores and reducing pipeline bottlenecks.
- Crafted dynamic churn prediction dashboards to visualize retention trends, boosting customer lifetime value forecasting precision.
- Delivered strategic data assessments during **Agile sprints**, aligning analytics milestones with business development roadmaps.

EDUCATION

Master of Science in Business Analytics

Dec 2024

The George Washington University, School of Business, Washington, DC

Bachelor's in computer science

Mar 2018

Shri Dharmasthala Manjunatheshwara College of Engineering and Technology, India
