

SHERIN RAJKUMARI PREMKUMAR

Seattle, WA | sherinrajkumariis@gmail.com | +1 (425) 491-0110 | [LinkedIn](#) | [GitHub](#)

Education:

Master of Science: Computer Software Engineering

Northeastern University – College of Engineering (CGPA: 3.7/4)

September 2023 to May 2025

Seattle, Washington

Coursework: Algorithms & Data Structures, Web Development, UX Engineering, Database Design, Software Quality & Testing

- Graduate Teaching Assistant – Program Structures and Algorithms (Fall 2024 & Spring 2025)

Bachelor of Commerce: Computer Applications

Women's Christian College (CGPA: 8.8/10)

June 2020 to April 2023

Chennai, India

Coursework: Information Systems, .NET Technology, OOP in Java, Programming using Python, Web Technology

Technical Skills:

- **Cloud & Infrastructure:** AWS (EC2, S3, RDS, Lambda, API Gateway, CloudWatch, IAM, VPC, Route 53, ALB/Auto Scaling), Terraform, Infrastructure as Code (IaC)
 - **DevOps & Automation:** Docker, Kubernetes (EKS), CI/CD Pipelines, GitHub Actions, Jenkins, Bash, Python (automation/scripts)
 - **Networking, Security & Monitoring:** VPC design (subnets, NAT, IGW), Security Groups, TLS/HTTPS, IAM least privilege, Secrets Management, Amazon CloudWatch, Prometheus, Grafana
 - **Certifications:** AWS Certified Cloud Practitioner, AWS Certified Developer – Associate
 - **Data & Storage:** PostgreSQL, MySQL, SQL Server, DynamoDB, S3 lifecycle/versioning
 - **Version Control & Tools:** Git, GitHub, VS Code, Postman, Selenium
 - **Soft Skills:** Communication, Teamwork, Problem Solving, Leadership, Agile Practices
-

Experience:

Software Engineer

July 2025 to Present

Technology Crest Corporation

Remote

- Designed and developed full-stack features using React, Node.js, Express, and PostgreSQL, normalizing database schemas, building RESTful APIs, and implementing input validation and audit logs to reduce production errors by 25%.
- Containerized the application with Docker and integrated it into a CI/CD pipeline, improving deployment consistency and accelerating delivery cycles.
- Implemented JWT-based authentication and role-based access control, optimized SQL queries to improve performance by 50%, and ensured NIST-compliant security with encrypted data storage.

Software Engineer – Intern

May 2024 to August 2024

Korcomptenz Inc: Total Technology Transformation

Parsippany, New Jersey

- Contributed to developing an inventory management web application using Node.js and Express, enhancing user experience and reducing order processing time by 30%.
 - Designed and implemented 5+ REST API endpoints for inventory retrieval, order creation, and processing; tuned queries and added indexes to enhance data access efficiency by 40%.
 - Designed and executed automated unit and integration tests using Jest and Supertest (90%+ coverage), improving application reliability and accelerating deployment cycles.
-

Projects:

HelpDeskBot – Customer Support Chatbot on AWS

September 2025

- Built a customer support chatbot using Amazon Lex with defined intents for FAQs, order tracking, and support ticket creation.
- Integrated the chatbot with AWS Lambda and Amazon DynamoDB to process queries, retrieve data, and update customer records dynamically.
- Deployed the solution via Amazon API Gateway and integrated it into a React.js web app and Slack, enabling real-time, multi-channel user interaction.

Expense Calculator

April 2025

- Built and deployed a full-stack expense tracking application using React.js and Node.js/Express, featuring secure user authentication, real-time balance tracking, and transaction management.
 - Designed and implemented a CI/CD pipeline with GitHub Actions to automate build, test, and deployment workflows, integrated Amazon CloudWatch for logging and monitoring, and enforced security with IAM policies and role-based access control.
-
