Education

TEMPLE UNIVERSITY, Fox School of Business, Philadelphia, PA

Master of Science, Business Analytics, to be awarded May 2025 | GPA: 3.9

Relevant coursework: Quantitative Methods for Business | Data Visualization: Art of Numbers

MAHARASHTRA INSTITUTE OF TECHNOLOGY, School of Distance Learning, Pune, India

Post-Graduate Certification, Business Analytics, May 2023

FERGUSON COLLEGE, Pune, India

Bachelor of Science, Statistics, November 2020

Recipient, INSPIRE Scholarship for academic excellence, August 2017 – August 2020

Skills

Analytics | Data visualization | Data Analysis | SQL | R | Python | MS Excel | Tableau | Data warehousing | ETL | Quick Sight | Agile | Business Development | Exploratory Analysis | Data Visualization | Business Intelligence | Supply Chain Management |

Academic Project Experience

Graduate Project: Heart Attack Analysis

January 2024- May 2024

- Conducted a comprehensive analysis of heart attack risk factors, utilizing Time Series Analysis and machine learning techniques in Python to enhance forecasting accuracy by 30%.
- Utilized non-causal analysis in R to enhance risk assessments, boosting precision by 25%.

Experience

Supply Chain Intern, American Water, USA

June 2024-August 2024

- Developed and implemented measurement mechanisms and interactive dashboards using AWS QuickSight to measure supply chain initiatives, increasing reporting efficiency by 40%.
- Conducted detailed data analysis and pricing strategies using advanced SQL and SAP, optimizing cost strategies and improving business decision-making by 20%.
- Collaborated with stakeholders to ensure alignment with data infrastructure and support analysis needs.

Associate Analyst, Deloitte USI, India

January 2021-March 2023

- Oversaw complex data migration projects, managing over 25 Talend jobs and executing ETL processes to ensure accurate data transfer. This work supported strategic business decision-making through effective data modeling.
- Led cross-functional data analysis initiatives, including driver and statistical analysis, which enhanced project efficiency by 45%. This collaboration showcased the ability to navigate complex challenges and streamline operations.
- Developed over 50 impactful Tableau dashboards that delivered actionable insights to senior management, driving operational excellence and informed decision-making.
- Conducted thorough market analyses and executed experiments to identify opportunities for process optimization and new business initiatives, utilizing advanced data mining techniques to uncover strategic insights for healthcare projects.
- Enhanced data-driven decision-making capabilities by implementing effective visualization and reporting techniques that aligned with business needs and objectives.
- Communicated complex data insights effectively to diverse audiences, influencing critical business decisions and ensuring the successful adoption of business intelligence solutions.
- Monitored data quality and optimized data flows to ensure reliable delivery of information, supporting robust analytical processes and driving continuous improvement.
