District Height, MD.

EDUCATION

BSc. Computer Science

University of Pittsburgh.

SKILLS

- **Programming Language:** Java, Python, JavaScript, HTML, CSS, SQL, and R.
- **Software Tools:** QGIS, RESTAPI, RPA (UiPath), Splunk, Snowflake, Hadoop, Spark, ETL, Databrick, Postgres, NoSQL, PySpark, Flask, Django, AWS (S3, Redshift, Lambda, RDS, step-functions etc.), EDA, Scikit-learn, Prometheus, JSON, CSV, Datamining, NumPy, Pandas, and Visualization, Tableau, Azure Cloud, Docker, Git, Postman, Agile Methodology.
- **Operating System:** Windows, Android, Linux
- **Microsoft Office:** Word, Excel, PowerPoint, and Outlook.

PROFESSIONAL PROFILE

Results-driven Tech Engineer with over 5 years of experience in software development and data analysis, specializing in site reliability engineering and cloud infrastructure. Seeking to leverage my expertise in software engineering and cloud services to contribute to the Site Reliability Engineering team.

WORK EXPERIENCE

Advanced Application Engineer

Accenture | Remote | 2022 – 2024

Lead the data team to ensure accurate data in the several development environments.

- Led technical initiatives to improve the reliability of global data infrastructure, focusing on reducing manual intervention through automation.
- Developed and maintained software tools and automation processes to facilitate seamless data ingestion from multiple third-party APIs into various environments.
- Collaborated closely with engineering teams to troubleshoot production issues, ensuring minimal downtime and rapid incident resolution using Postman and PgAdmin.
- Championed a culture of operational excellence, training new hires on best practices and mentoring team members on technical processes.

Data Engineer

Rekor | Remote | 2020 – 2022 |

- Designed and implemented end-to-end ETL pipelines for traffic data, automating processes to ensure data accuracy and reliability across production environments.
- Conducted incident risk analysis using Python ML libraries, proactively identifying and resolving potential operational issues.
- Assisted in onboarding clients onto the platform, ensuring smooth integration and operational success through effective communication and support.
- Collaborated cross-functional teams to perform complex data analyses, improving operational efficiency and data quality.

Data Science Associate

D4BL Pitt-Hub | Pittsburgh | 2018 – 2019

- Facilitated the data science team in analyzing data to support initiatives aimed at improving the lives of marginalized communities.
- Utilized Python, Pandas, and Matplotlib to extract, clean, and analyze data from MySQL, generating insights for data-driven decision-making.
- Created visualizations using Tableau to effectively communicate findings to stakeholders, ensuring data transparency and understanding.
