SUMMARY

Data Analyst with almost 5 years of experience across healthcare, financial services and global consulting firms. Skilled in Python, SQL and data visualization, with expertise in automating ETL pipelines, building predictive models and developing 40+ Tableau and Power BI dashboards. Proficient in AWS, Agile methodologies and JIRA-based collaboration to deliver scalable, data-driven solutions.

WORK EXPERIENCE

Data Research Analyst, Syracuse University, NY, USA

Jun 2025 – Present

- Analyzed LMS engagement and student performance data using Python, identifying 12 learning-behavior clusters that guided course redesign and strengthened data-driven instructional strategies across three academic departments.
- Optimized PySpark pipelines to preprocess and integrate over 200K+ student records, enhancing early-risk detection accuracy by 28%, to support intervention by academic advisors and faculty stakeholders.
- Evaluated statistical correlations between engagement and performance through regression and hypothesis testing, designed Tableau visualizations highlighting learning trends, hence increasing student retention rates by 30% across consecutive semesters.

Data Analyst, iConsult Collaborative (Client: J.P. Morgan Chase & Co.), NY, USA

Aug 2024 – May 2025

- Consolidated client and transaction data from Salesforce CRM using Excel Power Query, cleansing and standardizing 1M+ records, which accelerated monthly portfolio reporting by 25% and improved cross-team data availability for planning and risk reviews.
- Developed 12+ interactive Power BI dashboards visualizing portfolio growth, client retention and expense metrics, reducing monthly report turnaround by two business days and giving stakeholders real-time visibility into key performance indicators.
- Executed forecasting and variance-analysis models in Excel, integrating validated financial inputs that increased projection reliability by 20% and enabled more accurate funding allocation across business units during quarterly reviews.
- Automated reconciliation and anomaly-detection workflows in Python, cutting manual validation effort by 10 hours per cycle.

Data Engineering Analyst, Accenture, Mumbai, India

Jun 2021 – Jun 2023

- Delivered scalable business intelligence solutions by designing and deploying ETL pipelines using Talend Studio and IBM DataStage, boosted data extraction and transformation speed by 1.5x and job success rates by 30% for quarterly and ad hoc reporting.
- Refined high-volume SQL queries in AWS Redshift and Snowflake, performing root cause analysis (RCA) and ETL pipeline troubleshooting on pharmaceutical retail and non-retail healthcare data, eliminating 6+ hours/week of system downtime.
- Collaborated with cross-functional and client-side teams to manage PROD/DEV/QA/UAT environment deployments, accelerating release cycles by 15% and ensuring consistent data integration across business units.
- Authored data governance framework for HIPAA-compliant healthcare datasets, facilitating cross-functional alignment with legal/compliance teams to standardize metadata tracking for 200+ critical tables.
- Developed and maintained 25+ real-time KPI dashboards using QlikView and Qlik Sense, integrating operational data to deliver daily/weekly/monthly data performance reports and data-driven insights for leadership teams.
- Led Agile sprint planning and delivery of 10+ high-priority tasks while mentoring Junior analysts and utilizing ServiceNow for incident/change management, SDLC documentation and stakeholder communication, hence improving sprint throughput by 40%.

Financial Data Analyst, KPMG, Mumbai, India

Jul 2020 – Apr 2021

- Built interactive Tableau dashboards for Procurement, Business Expense and Treasurer teams, enabling stakeholders to track productivity metrics and task complexity in real time, reducing query-resolution time by 5 hours per week.
- Deployed and scaled Power Automate workflows to move Outlook attachments into SharePoint for Tableau data feeds, eliminating manual steps and saving 16 analyst-hours per week across the team.
- Integrated SQL joins, mapping 10+ tables from Oracle DB to enable cross-system analytics for 50K+ monthly purchase orders.

Data Analyst Intern, KPMG, Mumbai, India

May 2020 – Jun 2020

- Modernized capital-spend forecasting by translating legacy R models into Python (Pandas, SciPy), improving model accuracy and accessibility for the Treasurer department and increasing forecast reliability for a \$50M annual budget.
- Implemented Tableau RBAC security and SOX compliance controls, aligning permissions and cutting access tickets by 30 per month.

TECHNICAL SKILLS

Programming & Scripting: Python, R, SQL, Java, C/C++, VBA, HTML, CSS, JavaScript

Databases: Snowflake, AWS Redshift, MS SQL Server, Oracle PL/SQL, MySQL, Azure Data Studio, SAS

ETL Automation: Talend, IBM DataStage, Informatica, Apache Airflow, PySpark, Alteryx, Power Automate

BI Tools & Visualization: Tableau, Power BI (DAX), QlikView, Qlik Sense, Looker, Excel (Power Query, PivotTables, VLOOKUP)

Cloud & Productivity Platforms: AWS Services, Google Analytics, Microsoft Word, PowerPoint, Outlook

Methodologies & Compliance: Salesforce CRM, JIRA, ServiceNow, Agile & Scrum, SharePoint, Data Governance (HIPAA/GDPR)

Certifications: [Microsoft Excel 2019 Associate](#), [Oracle Certified Java SE 8 Associate](#)

PROJECTS

Customer Sentiment Analyzer (AI Chat Review Insights): Analyzed 50K+ customer reviews using Python and NLTK, uncovering sentiment patterns that improved service response time by 20% and enhanced customer experience through data-driven insights.

Cloud-Based Sales and Revenue Analytics System: Stored 100K+ sales records in AWS S3 with secure IAM roles, automated workflows with AWS Lambda and built QuickSight dashboards that reduced data latency by 40% and increased forecasting accuracy by 30%.

EDUCATION

Master of Science in Information Systems, Syracuse University, USA

Aug 2023 – May 2025

Bachelor of Engineering in Information Technology, University of Mumbai, India

Jun 2017 – May 2021
