SUMMARY

Business Analyst with **3 years** of experience supporting technology and operations teams. Skilled in translating business needs into clear requirements and data-driven solutions using **SQL, Python, Tableau, Power BI**, and **cloud platforms** like **AWS, Snowflake**, and **Azure**. Experienced in leading **stakeholder workshops**, developing **business cases**, and automating manual processes to save over **3,000 work hours** annually. Familiar with agile project management and delivering digital initiatives that improve reporting and reduce **costs**.

PROFESSIONAL EXPERIENCE

Business Analyst | Dell Technologies | USA

Jun 2025 – Present

- Implementing **Tableau** sales dashboards using **AWS Redshift** queries, delivering real-time metrics that are uncovering **\$500K in upsell opportunities** for five regional managers.
- Defining business requirements for a new service feature, leading **12 stakeholder workshops**, and documenting **45 functional** requirements to secure executive approval for a six-month initiative across three product teams.
- Developing a business case and prioritizing **30** user stories for a predictive retention strategy based on customer usage insights, enabling early outreach that is safeguarding **\$300K** in annual recurring revenue.
- Standardizing client feedback aggregation by consolidating **4,000** monthly **Salesforce** inputs into **Snowflake**, saving the product management team **416** manual work hours annually.

Business Analyst | Tech Mahindra Americas Inc. | USA

Jun 2024 – Aug 2024

- Spearheaded the development of an interactive Power BI dashboard by synthesizing data from **SQL queries** and market intelligence, delivering critical **Q2 strategic insights** that identified **\$250K in potential** cost-saving opportunities.
- Automated a key operational reporting process by leveraging Advanced Excel functions and **SQL** to mine **equipment data**, saving **40 hours** of manual effort each month for the maintenance team.
- Architected a predictive model to optimize pricing strategy using **Python** for **data analysis**, enabling a fact-based decision framework adopted by **5 product managers**.
- Orchestrated the definition of new metadata standards by conducting stakeholder interviews, streamlining **reporting workflows** and eliminating **3 redundant reports** to enhance organizational clarity.

Business Analyst | KPMG | India

May 2021 – Jul 2023

- Architected **SAP Digital** Boardroom dashboards consolidating **transactional and sensor data** from **BigQuery**, enabling **real-time executive visibility** and eliminating **900 hours** annual manual reporting across 3 business units.
 - Engineered ETL pipeline automation using **Google Cloud Dataflow** and **Cloud Functions**, implementing data quality validation frameworks that eliminated **2,600 hours** annual manual processing and reduced error rates by **85 percent**.
 - Facilitated **business case** development and functional requirements documentation for client analytics portal on **SAP Business Technology Platform**, securing **C-suite** approval for 6 million rupee digital transformation initiative.
 - Directed enterprise risk analysis designing Monte Carlo simulation models in BigQuery ML to quantify **supply chain** disruption scenarios, enabling executives to mitigate potential losses of **8 million** rupees annually.
 - Championed requirements-gathering workshops with **cross-functional teams** to define Google Cloud migration scope, preventing **1.6** million rupees in rework **costs** through **early stakeholder consensus** and comprehensive project scoping.
 - Streamlined customer journey analytics pipeline from Microsoft Azure Application Insights to **BigQuery** using Dataflow SQL, accelerating insight generation **by 30 percent** for product teams and reducing time-to-market by **6 weeks**.
-

PROJECTS

AI-Driven Personal Finance Optimization Tool

- Spearheaded the development of an **AI-driven financial** tool by integrating a **Google Gemini chatbot** via **REST APIs** and a rule-based engine, which secured a **\$150K projected value** and attracted over 5,000 active student users.

Conagra Foods Retail Analytics

- Orchestrated a comprehensive retail analytics initiative using Random Forest and **DBSCAN** for **customer segmentation** and demand forecasting, enabling targeted marketing that secured the **#2 market position** for a key product line.
-

TECHNICAL SKILLS

- **Programming & Databases:** SQL, Python (Pandas, NumPy), R, PostgreSQL, MySQL, Google BigQuery
 - **BI, Visualization & Reporting:** Power BI (DAX, Power Query), Tableau, Excel (PivotTables, VBA, Power Query), KPI Dashboards, Data Modeling
 - **Data Processing & Cloud:** ETL/ELT (Airflow, Power Query), Azure Data Lake, AWS (basic), API Integration
 - **Business Analysis & Documentation:** Requirements Gathering, BRD/FRD, Business Case Development, Cost-Benefit Analysis, Process Mapping, BPMN 2.0, Gap Analysis, As-Is/To-Be Analysis, Change Impact Analysis, Feasibility Studies
 - **Project Management & Agile:** Agile/Scrum, Jira, Confluence, Sprint Planning, Backlog Grooming, User Story Writing
 - **Data Analysis & Statistics:** A/B Testing, Regression Analysis, Root Cause Analysis, Statistical Analysis, Trend Analysis
 - **Testing & Quality Assurance:** UAT Coordination, Test Case Writing
 - **Tools & Platforms:** Salesforce, SAP, Microsoft Visio, Google Analytics
 - **Modeling & Design:** UML Diagramming, Use Case Modeling, Data Flow Diagrams, Wireframing, Prototyping
 - **Governance & Compliance:** Data Governance, Risk Assessment, Documentation Standards
-

EDUCATION

Master of Science in Business Analytics & Artificial Intelligence | USA

Aug 2023 – May 2025

University of Texas at Dallas

Bachelor of Engineering in Electronics and Communications Engineering | India

Jun 2019 – May 2023

VNR Vignana Jyothi Institute of Engineering
