

Salomon Ulysse

Columbia, Maryland 21045

sulysse1@umbc.edu (240) 441-8684

Security clearance level: Interim Top Secret

SUMMARY OF QUALIFICATIONS

Enthusiastic, passionate developer with over 3 years of professional development experience. Charismatic, creative leader with the ability to inspire, motivate, and smoothly collaborate with fellow developers and other team members.

PROFESSIONAL EXPERIENCE

Software Developer

Prescient Edge

Tyson's Corner, VA

12/2023-04/2024

- Created Bash scripts to build software and do complex tasks in Linux.
- Did peer code reviews for the project and other Linux programs.
- Coded and tested software on hard drives across multiple private servers.

Jr. Software Developer

SONA NETWORKS

Hunt Valley, MD

09/2021-10/2022

- Applied C++ for processing images into the computer.
- Managed code maintenance in C, C++, and embedded C.
- Used HP-UX for OS.
- Used Informix for database management.

Software Engineer Intern

Fearless

Baltimore, MD

07/2021-08/2021

- Used Agile & Scrum methodology to efficiently get work done in a team.
- Contributed to the team and personal experience by asking questions and engaging with everyone through 1:1s.
- Learned about how Docker streamlines CI/CD pipelines and Cloud Software Engineering.

CERTIFICATES/AWARDS

- Linux Mastery Course (Udemy)

PERSONAL PROJECTS

Dockerized Playlist Scraper:

- An app that takes in a link to a playlist of a music streaming service (Soundcloud, YouTube Music, etc..) and sends to a database after parsing the data. Developed with CI/CD pipelines.
- Technologies applied: Docker, Python, Flask, HTML/CSS, JavaScript, BeautifulSoup, Selenium, and Bootstrap.

Chat server:

- An app that allows multiple people to enter a chat server and message each other.
- Technologies applied: Node.js, Express.js, Socket.io, HTML/CSS. Embedded JavaScript, JavaScript, and jQuery.

Playlist Manager:

- An app that manages mp3 metadata through an API and database.
- Technologies applied: Java Spring Boot, IntelliJ, REST API, and PostgreSQL.

Pokemon Battle:

- This is a game made remotely in a team of 5. I implemented the battle system and the database. The database was used for retrieving and updating data before and after a battle respectively.
- Technologies applied: AJAX, Apache, HTML/CSS, JavaScript, JSON, XAMPP, PHP, MySQL/MariaDB

DisGen:

- Redistricting/mapping software that prevents gerrymandering.
- Made remotely in team of 6
- Technologies applied: AJAX, Apache, HTML/CSS, JavaScript, JSON, XAMPP, PHP, MySQL/MariaDB

ADDITIONAL SKILLS

Technologies: Linux, Bash scripting, Kali Linux, Windows, Github, Visual Studio, PuTTY, AWS (RDS & EC2), LAMP stack, WAMP stack, MySQL, C, C++, HTML/CSS, JavaScript, Java/Spring Boot, Python, MATLAB, PHP, Docker, and SQL.
