Result-oriented and experienced **Business Analyst** with over **3+ years** of expertise in cross-functional collaboration, analytical techniques, and delivering actionable recommendations. Skilled in managing extensive datasets and driving strategic decision-making plans. Proficient in **Python, SQL, PowerBI, Tableau**, and **Salesforce**. **Actively seeking opportunities** to contribute expertise to innovative analytics projects

PROFESSIONAL EXPERIENCE

Jennison Associates LLC

New York, NY

Business Analyst

Jun 2023 – Nov 2023

Leveraged advanced data analytics to drive strategic decision-making for the Investment management firm's marketing initiatives

- Analyzed clickstream data from **Google Analytics** to identify user behavior patterns, optimize website content, improve user engagement, and increase conversion rates
- Developed a Portfolio Management report framework in collaboration with cross-functional teams, using **SQL** for data extraction and **Python** for integration and analysis, making data access easier for executive presentations
- Built a customer dashboard using **Power BI** to gain insights into customer satisfaction scores, new customer acquisition rate, and churn rate. Leveraged advanced features like slicers and **DAX** measures to enhance dashboard functionality and usability
- Led workshops to present insights from dashboards and reports, demonstrating the impact of data-driven strategies on product development and **campaign optimization** through data cleaning, correlation, and statistical analysis in Excel and **Power BI**
- Leveraged Tableau to present and analyze **multi-channel marketing campaign** strategies by defining key metrics such as engagement rate, click-through rate, impressions, bounce-back rate, sentiment analysis, etc.
- Planned and executed **A/B tests** to evaluate different marketing tactics and performed **post-campaign analysis**
- Worked on **Predictive Modeling POC** for Lead scoring that assigned a score to each lead based on their likelihood of conversion using machine learning algorithm Logistic Regression and Random Forest
- Created reports and **interactive dashboards** in **Tableau** and **Salesforce**, including a sales dashboard for an integrated overview of opportunities and sales activities and a client service dashboard to compile critical **KPIs**
- Implemented and customized **JIRA** for internal use, creating custom forms to streamline data and reporting requests, enhancing request management efficiency, and improving user satisfaction by providing a structured and user-friendly ticketing system

Software Engineer

Feb 2020 – Oct 2022

Improved ERP real estate software(RentCafe) quality through automation testing and developing an ETL pipeline, utilizing SQL and Python, leading to a significant reduction in manual testing efforts

- Created automation scripts and **integrated APIs** using Python to enhance data connectivity and functionality in ERP systems, enabling efficient testing of cash flow and financial analytics reports
- Built a **Python-based ETL pipeline**, meticulously mapping data to automate the consolidation of leads, deals, and lease data into the data warehouse
- **Analyzed requirements** and partnered with account managers to accommodate clients' requests in the Property Management ERP Software, translating user needs into technical specifications
- Improved software by **writing test plans, and test cases** and performing Functional, Performance, Regression, Mobile compatibility, Integration, and E2E testing
- Created complex **SQL queries** to extract, manipulate, and perform calculations to fulfill adhoc data and reporting requirements
- Collaborated with developers to create, modify, and **debug SQL** scripts to generate data comparisons for testing financial reports
- Leveraged **JIRA** to track bugs & maintained extensive documentation of updated functionality on Confluence pages
- Deployed JMeter for **automating performance testing**, achieving an 85% reduction in testing time
- Integrated **agile practices** into project management, facilitating iterative requirements collection and continuous metrics updates within Excel
- Trained and mentored new team members about the product functionality and business processes
- Star Performer Award (Winter and Spring 2021): Recognized by the Manager for delivering high-quality results

Leoni Cable Solutions

Pune, India

Data Analyst

Oct 2017 – Feb 2020

Project 1: Supported Sales and marketing team with data and reporting requirements, analyzed sales data and consumer trends, and developed financial analysis reports in Power BI

- Implemented sales and business strategies by analyzing the previous year's sales data and consumer trends
- Developed accurate **sales forecasts** and allocated marketing budgets effectively based on historical performance
- Developed Profit analysis and MIS reports in **Power BI with DAX** to create calculated columns for real-time financial analysis, streamlining and automating monthly performance review
- Created Apex class to automate Opportunity creation in **Salesforce CRM** with pre-populated fields during 'Qualified' Lead conversion
- Utilized Excel power pivot tables, macros, lookup, and advanced formulas to **analyze market trends**, prepared market research report and **competitor analysis** report for the launch of 8 new product

Project 2: Streamlined and automated processes across SAP modules, enhancing efficiency while ensuring data integrity and customer complaint resolution

- **Managed processes** across Sales, Customer Relationship, Supply Chain, and Finance modules of SAP, executing tasks from order processing to financial reporting, reducing turnaround time by 20%

- Served as a key **Salesforce** user, addressing account activation, and deactivation issues, monitoring automated **jobs**, managing profiles and permissions for user groups, utilizing data import tools to add/update bulk data
- Implemented Trigger to validate Opportunity data upon conversion, ensuring **data integrity** and compliance with company standards
- Developed corrective actions by investigating customer complaints and conducting **root-cause analysis**
- Maintained accuracy and consistency of master data in **ERP SAP** by implementing data validation rules and resolving discrepancies
- Utilized **SAP** to automate the cost calculation of products by developing algorithms within the ERP system

PROJECTS

Analyzing IMDB Movie Datasets [Key Tools: AWS EMR, AWS S3, Python]

- Analyzed movie data, including genre, ratings, timeline, and actors, identifying relationships between variables; conducted data cleaning and visualized IMDB score distributions by rating and decade
- Provisioned a Spark Cluster on AWS Elastic Map Reduce (EMR), linked it to a Jupyter Notebook, read data from an S3 bucket, and ran queries in Python with DataFrame API to perform analysis of four IMDB datasets

World Happiness Data Analysis [Key Tools: SQL, Python - NumPy, Pandas, Matplotlib, Seaborn]

- Conducted in-depth analysis of global happiness data using advanced data cleaning, transformation, and visualization techniques in Python and SQL
- Calculated correlation coefficient to determine major factors affecting a country's overall happiness score

Analysis of Citi Bike Data [Key Tools: Snowflake, SQL-Window functions, Joins, CTE]

- Performed analytics on Citi Bike riders' data to determine the correlation between rides and weather. Created stages, databases, tables, views, and virtual warehouses in Snowflake
- Worked with structured and semi-structured data, and created interactive dashboards in Snowflake
- Utilized advanced SQL such as window functions and Common Table Expressions(CTEs) to execute data transformations, aggregations, and analysis

SKILLS

- **Analytics/Visualization Tools:** Tableau, PowerBI, Looker, Alteryx, Salesforce, Google Analytics
- **Languages and Database:** Python (Pandas, NumPy, Matplotlib, Seaborn), SQL, Oracle, MySQL
- **Cloud Stack:** AWS (EC2, S3, EMR, Lambda, Kinesis, Glue, Athena), Snowflake
- **Project Management:** JIRA, Microsoft Office Suite (Access, Visio, Excel), Lucidchart, Confluence, Sharepoint
- **Technical Tools:** Jupyter Notebook, JMeter, Git, SAP (Sales & Distribution, CRM, Quality Management)
- **Analysis Techniques:** Data Cleaning and Transformation, Data Modeling, Correlation and Regression Analysis, Statistical Analysis, A/B Testing, Data Integration and ETL, Financial Analysis, Marketing Analysis, KPI Dashboards

EDUCATION

Baruch College, Zicklin School of Business
Master of Science in Information Systems (GPA: 3.8/4)

New York, US
May 2024

Rajiv Gandhi Proudyogiki Vishwavidyalaya
BE in Electronics & Communication Engineering

Bhopal, India
