• Business Skills: Google Office Suite, MS Office Suite (Excel, Word, PowerPoint), Supervised and Unsupervised Machine algorithms, Time Series Analysis, Data Extraction, Data Analytics, Data Visualization			
Work Experience			
Business Analyst Emory University, Atlanta, GA			Feb 2024 – Present
• Converting data into digestible business intelligence and creating deliverables to drive effective utilization of key technology platforms like Salesforce.com, Cascade (Website Development), and Monday.com			
• Overhauling the use of Salesforce and gaining new insights into the student lifecycle by developing conversion reporting and KPIs, building reports, and analyzing data to identify trends and shape strategies.			
• Collaborating with across the departments of Curriculum Development, Corporate Learning, Enrollment Services, Marketing, and Programming teams.			
Junior Production Analyst Intern Breads Bakery, New York, NY			Nov 2023 – Dec 2023
• Collaborated on seamless analysis with the Production Analyst and Management Team for accurate production projections in NYC.			
• Utilized a data-driven approach, incorporating relevant information into comprehensive reports to communicate production forecasts effectively and shared findings with production teams, fostering informed decision-making and enhancing operational efficiency.			
• Played a pivotal role in facilitating communication between Breads Bakery locations and related businesses, ensuring an informed approach to production planning and demonstrating a commitment to optimizing processes and aligning strategies with goals.			
Tutor Fordham University, New York, NY			Sept 2023 -Dec 2023
• Taught Python to 105 Students for the Course Computational Finance.			
• Maintain records of student progress, attendance, and grades in compliance with university policies.			
• Worked with other faculty members to ensure alignment of Python instruction with the broader course goals in Computational Finance.			
Graduate Assistant Fordham University, New York, NY			Jan 2023 – Dec 2023
• Instructed and provided guidance to a cohort of 120 graduate students in the field of Machine Learning, which included responsibilities such as assessing their coursework and collating weekly assignments.			
• Contributed to a market analysis and customer segmentation research project, extensively analyzing a retail company's database using Tableau, Excel, and Google Analytics and aided the professor's research goals.			
Risk Analyst Intern Alpha Recon, New York, NY			June 2023 – July 2023
• Collaborated on risk assessment, addressing geopolitical and economic impacts, and devising mitigation strategies with senior analysts.			
• Implementing data quality checks and validation procedures to identify and rectify discrepancies in the data.			
• Designed and implemented a data warehousing solution through ETL (Extract, Transform, Load) processes, utilizing advanced statistical analysis and data visualization techniques to proactively identify potential hazards and vulnerabilities.			
Business Analyst Intern GROUP 22, New York, NY			March 2023 - July 2023
• Worked on market research and competitor analysis, providing insights into industry trends and opportunities for growth.			
• Created 50+ daily Tableau dashboards, visually presenting data for internal stakeholders, enhancing accessibility and understanding.			
• Conducted extensive data analysis using Salesforce to discern customer trends and behaviors, providing invaluable insights for sales and marketing strategies, ultimately leading to a significant 20% increase in customer engagement.			
Engineering Intern Bajaj Auto Ltd, India			March 2021 – July 2021
• Worked with engineers to assess and choose manufacturing materials, optimizing quality and cost-effectiveness for vehicle production.			
• Enhanced man-less gear inspection machine efficiency, cutting man-hours by 10% in a quarter using Python, SQL, and Excel.			
• Provided predictive insights to stakeholders and collaborated with a team of three analysts to implement a new modeling technique, resulting in a significant 100-hour quarterly time savings for the organization.
