Certified System Administrator

Summary:

As an experienced ServiceNow developer **with 6+ years of experience**, I have handled several modules (**ITSM, HRSM, HRSD, ITBM, ITOM, ITIL** (Orchestration, Integration, and Event Management)) independently while also working collaboratively with my team to deliver bug-free results within tight deadlines. I have experience with App Engine Studio and Virtual Agent, creating customized topics and flows for Virtual Agent as per business requirements. I have also worked on 3rd party integration Web Services (SOAP and REST API), scripted Web Services, AJAX, Business Rules, JavaScript, SOAP, and REST. Expertise in Java script, debugging, optimizing the performance and working of Client Scripts, Catalog Client Scripts, Server-Side Scripting, UI scripts and UI Policies. Conducted regular audits and data reconciliations to ensure CMDB integrity and compliance with organizational standards and policies. Hands on experience on various ServiceNow Modules like Service Catalog, Incident, Problem, Change Management, SCRUM, Asset, Knowledge, Release, SLA, ACL's, Reporting and Integration with Web Services. Moreover, I have automated routine production support activities and developed a service catalog, and used JavaScript to create business rules, client scripts, UI policies, and UI actions. I am also experienced in Agile and Scrum methodologies, and I have documented all my implementations and best practices defined within my team.

Skills:

- ServiceNow ITSM, HRSM, ITBM, ITOM, HRSD, ITIL (Orchestration, Integration & Event Mgmt.)
- SOAP and REST API, GRC, Service Mapping, Discovery
- JavaScript, AJAX, Business Rules, UI Policies, and UI Actions
- Agile and Scrum Methodology
- Excellent communication, collaboration, and problem-solving skills
- Angular, CSS, XML, HTML, SQL, Python.

Education:

Bachelors from JNTUH, Hyderabad, India – 2018.

Work Experience:

May'22 – Present

ServiceNow Developer/Administration

Commonwealth Financial Network (Financial), Remote

- Worked closely with clients, engagement managers and software developers to analyze system and business requirements to create and develop high quality, user centered solutions, web page job aids and tutorials, with emphasis on usability, consistency, and aesthetics.
- Extensive experience on technical implementation of various ServiceNow modules such as Change Management, Incident Management, Problem Management, Service Catalog, Configuration Management, Asset Management and Knowledge Management.
- Implemented and customized HRSD Module in ServiceNow, streamlining HR processes and enabling efficient employee service requests and case management.
- Created several workflows for ITSM, Service Catalogs, GRC, Security Operations, Performance Analytics and HRSDs
- Successfully designed and implemented HRSM modules in ServiceNow, including employee onboarding, offboarding, and case management, resulting in improved HR service delivery and increased employee satisfaction.
- Developed and customized CSM processes within ServiceNow to enhance customer service operations, including incident and problem management, service level agreement (SLA) enforcement, and customer self-service capabilities.

- Writing scripts like JavaScript for automating the work of creating new flow designers and creating new MID Server Script files.
- Implemented automation solutions using ServiceNow Flow Designer, reducing manual effort, and improving productivity in inventory management, catalog request fulfillment, and HR processes.
- Leveraged Flow Designer and Integration Hub spokes to seamlessly integrate ServiceNow with key platforms, including Azure, DevOps Boards, and Microsoft Teams
- Strong working knowledge of ServiceNow ITBM components such as Discovery, Service Mapping, Cloud Management, Event Management, and CMDB Design
- Led the upgrade and migration of ServiceNow instances, ensuring a seamless transition and minimal disruption to inventory management, catalog items, HRSM, CSM, and Flow Designer functionalities.
- Successfully integrated external systems and APIs with ServiceNow using App Engine Studio, enabling seamless data exchange, and improving system interoperability.
- Implemented and customized various ServiceNow modules like ITSM, ITOM, HRSD following ITIL processes and best practices.
- Implementation, Customization and Maintenance of ITIL modules such as Incident, Change, Problem, Knowledge, Service Catalog Management, CMDB and Service Portal
- Collaborate with the GRC team on the development of the GRC solution.
- Created several workflows for ITSM, Service Catalogs, GRC, Security Operations, Performance Analytics and HRSD.
- Created SLAs and participated in running SLAs and responsible for closing successfully.
- Implemented automation solutions using ServiceNow Flow Designer, reducing manual effort, and improving productivity in inventory management, catalog request fulfillment, and HR processes.
- Composed a script to automate routine tasks being done in ServiceNow by creating an access control rule (ACL) using scripting tools and ServiceNow functionality.
- Developed custom ServiceNow reports and dashboards to provide real-time insights into inventory levels, catalog item usage, and HR service metrics, enabling data-driven decision-making.
- Conducted regular scanning and exploration activities to update the CMDB and maintain accurate configuration data.
- Developed Client Scripts, UI Actions, Business Rules and Script Includes for full filling the requirements.
- Led the upgrade and migration of ServiceNow instances, ensuring a seamless transition and minimal disruption to inventory management, catalog items, HRSM, CSM, and Flow Designer functionalities.
- Understanding client mobility processes and employee service needs and working with the client to demonstrate how ServiceNow will support these processes.
- Performing successful tests with two or more legacy systems using the REST and SOAP modules.
- Designed and implemented new functionality using UI Policies and Data Policy.
- Form Layouts and Form Design in the Agent Workspace.
- Creating and adding custom elements within the ITSM workspace and scoped incident and case applications.
- Worked on Email Notification, Reports and Database views.
- Developed and implemented advanced scripting solutions using JavaScript within the ServiceNow platform to extend the functionality of Virtual Agent and App Engine Studio, enhancing automation and process efficiency.
- Responsible for creating various workflows for Incident Management, Change Management, Problem Management, Service Requests and SLA's.

Feb'20 – Apr'22

**ServiceNow Developer/Administration
Infosys (Health Care), Remote**

- Developed and customized CSM processes within ServiceNow to enhance customer service operations, including incident and problem management, service level agreement (SLA) enforcement, and customer self-service capabilities.

- Collaborated with cross-functional teams to map relationships between CIs (configuration items) and build a comprehensive CMDB (configuration management database).
- Experience on creation of workflows for Service Catalog items in ServiceNow.
- Worked on configuring the Business Rules, Client Scripts, UI Policies, UI Actions, and SLAs in ServiceNow.
- Strong knowledge in ServiceNow ITSM, ITOM (Discovery, ServiceMapping, Orchestration), HRSD, Asset Management modules with an end to end implementation experience.
- Functional knowledge and implementation experience of IT Operations Management (ITOM) ServiceNow Discovery, Event Management, CMDB and Service Mapping and experience working directly with customers and clients
- Expertise in Unit testing using postman and Automated Test Framework (ATF). Created transform maps for importing CMDB data.
- Hands-on experience with Glide Forms, Glide Record, Scratchpad, Glide AJAX, and Glide System used in UI Actions, Business Rules, Client Scripts, email Script, Script Include and workflow activities.
- Experience in Server Script (Business Rules/Script Include/Event process/Inbound email action/UI Actions/workflow activities).
- Conducted regular audits and reconciliations to ensure data accuracy and integrity within the CMDB.
- Implemented and customized UI Appearance for Incident Management and Problem Management based on ITIL best practices.
- Created ACLs to restrict table and field level access to authorized users.
- Led the implementation of ServiceNow Discovery and MID Servers, resulting in improved visibility and accuracy of the CMDB.
- Created new Catalog items, workflows. Modified existing catalog items.
- Created new Table, fields and automated the creation of records in this table via catalog item.
- Expert-level proficiency in ITSM, ITBM, ITOM, HRSD, CMDB and Integrations; intermediate-level proficiency in GRC, CSM, SecOps, SAM and Virtual Agent Implementation knowledge of FSM, DevOps and Integration Hub at the beginner level
- Created Email Templates as per the Company requirements and then scheduled the Email notifications which will trigger in different scenarios.
- Used Client Scripts, UI policies, UI Actions, Business Rules, Script Includes, UI Pages, Access Control lists, Background Scripts, Notifications, Inbound email actions in building deliverables.
- Transitioned already existing business rules, client scripts, or any smaller end-to-end implementations into Flow Designer.
- Used flow triggers within flow actions to set up payloads, establish connections, and handle errors.
- Providing Table level and Field level security by Access Controls based on rules.
- Experience in migrating the changes across various environments in ServiceNow using Update Sets.
- Utilized the REST Script step to set up the complete authentication and end points within the flow action.
- Integrating with various third-party applications using REST, SOAP, and custom API's.
- Perform requirements gathering and validate requirements with process owners for process enhancement.

Mar'18 – Jan'20

ServiceNow Developer/Analyst
Qualcomm (Telecom), Hyderabad, India

- Project deals with implementation of, process, ITSM and Software Asset Management on Service-now Tool.
- Tool management caters to various process of ITIL: Incident, Change, problem, Service request and CI related functions.
- Service-now is integrated with various other tools which are used by clients, which are maintained by us.
- Customized forms and Lists of Incident and Problem Management tables in Service now.

- Utilized Java Scripting to deliver solutions that automate and audit business processes using UI Policy, Client Script, UI Action and Business Rules.
- Used Transform maps to import Data to Configuration Management in Service now.
- Creating variable sets and variables as per the requirement for record producer and catalog Items.
- Maintaining product catalog to import configuration item records in Service now.
- Used Update Sets for moving group of customizations from one instance to another.
- Created, monitored, modified, and published workflows with approvals
- Importing Data in different formats (excel, csv, xml) via attachments in Service now.
- Implementing HRSD COEs and services
 - Flow Designer
 - Employee Service Center
 - Lifecycle Events
 - Inbound email actions
- Details around implementing onboarding, offboarding, and Leave of Absence Workflows.
- Written Business Rules for customizing tool in Service now.
- Developed UI Appearance for Service Catalog Requests.
- Worked on setting up Service portal content so that it's only available to authenticated users.
- Deploying update sets to from non-production to production instances.
- Experience with Service Portal to determine users logging in to portal and customization with combination of system properties and script include.
- Responsible in building Catalog items in Service now.
- Extensively worked on Catalog items, Record producers, Order guides, Change Module, Incident Module, Problem module Knowledge Module, Workflow's, Transform map, Inbound email actions.
- Responsible in building SLA and generating Reports in Service now.
- Defined users, groups and roles and providing accessing permissions in Service now.
- Worked with Import and Update sets in Service now.
- Created Email notifications and scheduled in Service now.
- Written scheduled jobs in Service now.
