

AASHISH MUDUGULA

Data Analyst

Kansas, USA | mudugulaaashish@gmail.com | +1 913-238-8013 | LinkedIn

SUMMARY

Data Analyst with 3+ years of experience in analytics, intelligence, and predictive modeling across healthcare, insurance, and digital domains. Proficient in Python, SQL, Spark, Tableau, Power BI, and Snowflake to design dashboards, optimize data models, and automate ETL workflows. Proven ability to deliver actionable business insights that drive cost savings, risk mitigation, and customer engagement through robust data pipelines, forecasting, and cross-functional collaboration in Agile environments.

EDUCATION

Master of Science in Computer Science – University of Central Missouri, Lee's Summit, Missouri

(Aug 2023 – May 2025)

Bachelor of Technology in Information Technology – Joginpally B.R. Engineering College, Hyderabad, India

(June 2018 – July 2022)

CERTIFICATIONS

- **Microsoft Certified: Power BI Data Analyst Associate (PL-300)** ([Link](#))
- **SQL (Intermediate)** by Hacker Rank ([Link](#))
- **Google Advanced Data Analytics** by Coursera ([Link](#))
- **Databricks Fundamentals Accreditation** by Databricks Academy

SKILLS

- **Programming & Analysis:** Python (Pandas, NumPy, Scikit-learn, Statsmodels, Plotly), R, VBA, Regex, APIs
- **SQL & Data Warehousing:** Complex Joins, CTEs, Indexing, Explain Plan, Snowflake, Redshift, PostgreSQL, SQL Server, BigQuery, Delta Lake, Synapse, dbt (dbt Cloud)
- **Visualization & BI:** Tableau (LOD, Parameters, Blending), Power BI (DAX, Drillthrough, Row-Level Security), Looker (LookML), Qlik, Excel (PivotTables, Solver, Macros), Google Data Studio, Streamlit, Alteryx
- **Data Engineering & Orchestration:** PySpark, Databricks, AWS Glue, Talend, Apache Airflow, Kafka, Docker, Jenkins, Terraform, Data Lake Partitioning, Data Lake
- **Statistics & ML:** Logistic/Linear Regression, Clustering (K-means, DBSCAN), Isolation Forest, LightGBM, Time-Series (ARIMA, ETS), Hypothesis Testing, A/B Testing, Feature Scaling, PCA, SHAP Interpretability, MLflow, SageMaker, Feast
- **Data Quality & Governance:** Collibra, Alation, Great Expectations, Validation Scripts, Anomaly Detection, Data Cataloging, Controlled Access, GDPR & HIPAA Tagging, OAuth2, RBAC
- **Project & Delivery:** Agile, Scrum, JIRA, Confluence, Storyboards, BRDs, FRDs, UAT, Stakeholder Workshops
- **Marketing & CRM Analytics:** Google Analytics, Salesforce, HubSpot integration

EXPERIENCE

Capital One, USA

Data Analyst

Jan 2025 – Current

- Designed and maintained robust ELT workflows integrating dbt Cloud transformations on Snowflake with SQL Server data marts, processing large datasets for advanced data management and data warehousing to support weekly dashboards that improved visibility into business performance and KPI metrics.
- Developed LightGBM churn prediction and forecasting models tracked via MLflow, leveraging regression and statistical methodologies to automate scoring and enhance process improvement initiatives.
- Conducted detailed ad-hoc data analysis on operations and logistics trends using Python and PostgreSQL, providing actionable business intelligence recommendations that informed pricing and customer segmentation.
- Automated critical month-end close processes by building Excel VBA and Macros tools with Power Query and Solver, shortening financial reconciliation from 5 days to under 48 hours.
- Partnered with cross-functional teams in supply chain, marketing, and finance to define key performance indicators (KPIs), embedding them into LookML models that standardized metrics across executive reports.
- Implemented Great Expectations validation scripts across Snowflake staging tables, proactively flagging anomalies and enhancing trust in data modeling and reporting accuracy.
- Documented data lineage, glossary definitions, and transformation logic in Confluence, while managing Agile sprints and backlog priorities in JIRA, achieving a 95% on-time delivery rate for analytics initiatives.

- Engineered end-to-end ingestion and transformation pipelines using Talend, Kafka Streams, and PySpark for large-scale data management and data warehousing, supporting actuarial models for payer business strategies.
- Designed Tableau dashboards using LODs, bullet charts, and parameter controls to track KPI metrics and performance dashboards, providing business intelligence insights that improved care management.
- Developed robust A/B testing and regression frameworks in Python (Statsmodels, SciPy) and R, applying statistical methodologies for forecasting engagement trends and improving ROI by 20%.
- Implemented Apache Airflow for orchestrating Snowflake ELT jobs and data modeling pipelines, improving process improvement workflows and reducing manual handoffs by 80%.
- Managed Alation data catalog, tagging PHI/PII columns for GDPR & HIPAA compliance, improving data traceability and reducing audit turnaround times by 50%.
- Collaborated with cross-functional stakeholders including compliance, actuarial, and operations teams to design scalable business intelligence workflows supporting regulatory and analytical needs.
- Automated actuarial Excel models using ODBC live Snowflake pulls and macros, empowering teams to perform ad-hoc analysis without IT dependencies, reducing cycle time by 2 weeks.
- Coordinated JIRA sprints and authored BRDs & FRDs aligning with regulatory audit schedules and supply chain logistics requirements.
