Summary

Data Analyst experienced in collecting, validating, and analyzing large datasets to deliver reliable business insights. Skilled in SQL, Python, Power BI, Tableau, data transformation, statistical analysis, and dashboard development, with experience standardizing metrics and automating reporting workflows. Partners with cross-functional stakeholders to translate analytical requirements into accessible reporting solutions.

TECHNICAL SKILLS

- **Programming:** SQL, Python, Pyspark, DAX, MQuery, R
- **Business Intelligence:** Power BI, Tableau, Power Query, Semantic Models, Dashboard Development, KPI Reporting, Looker, Microsoft Excel
- **Microsoft Fabric:** Fabric Pipelines, Dataflow Gen2, OneLake, Data Agent
- **Data Science:** Pandas, NumPy, Scikit-learn, Exploratory Data Analysis, Statistical Analysis, Regression, Classification
- **Databases:** SQL Server, AWS Redshift
- **Cloud Platforms:** AWS, Microsoft Fabric, Azure
- **Data Engineering:** ETL, Data Modeling, Data Transformation, Data Validation, Data Cleaning, Query Optimizations
- **Automation:** Power Automate, Logic Apps

PROFESSIONAL EXPERIENCE

Pennymac

May 2025 - Present

Data Analyst

- Enhanced Power BI dashboards tracking delinquency, foreclosure, forbearance, and portfolio-servicing KPIs for operations and business stakeholders, supporting clear trend analysis and reporting.
- Developed Microsoft Fabric pipelines to onboard new data sources, validate incoming data, and automate scheduled refreshes, reducing manual processing time by 45%.
- Built and maintained Dataflow Gen2 transformations in Fabric, improving data consistency across multiple Power BI reports.
- Modeled reporting datasets using OneLake, semantic models, and Power Query, supporting standardized metrics and consistent data analysis across servicing and operations teams.
- Created DAX measures and semantic models supporting delinquency aging, loss mitigation, loan modification, and foreclosure performance reporting.
- Developed Power Automate workflows for report approvals, dataset refresh alerts, and scheduled report distribution, reducing manual operational tasks.
- Investigated production issues involving report refresh failures, DAX calculations, and servicing data mismatches, improving reporting accuracy and business confidence.
- Optimized SQL queries, Power Query transformations, and Fabric data models, improving report generation speed and enabling high-volume servicing reports and monthly portfolio analysis.
- Performed ad hoc analysis on mortgage servicing, escrow, payment, and default trends using Microsoft Excel, delivering insights that supported operational and regulatory reporting.

CSAA Insurance Group

Nov 2021 - Dec 2023

Data Scientist

- Analyzed and cleaned customer, policy, and claims data spanning 35M records, identifying behavioral trends that improved retention initiatives across multiple business units.
- Developed 8 Tableau dashboards and self-service Looker reports tracking customer, operational, and financial KPIs, reducing manual reporting effort by 42% and improving reporting accessibility.
- Integrated customer data from Amazon Redshift and Amazon S3 into centralized analytical datasets, applying data cleaning and validation processes that reduced data preparation time by 35%.
- Partnered with product and business teams to define analytical requirements and deliver self-service reporting solutions adopted by 150+ business users.
- Built customer segmentation models using Python and Scikit-learn, improving campaign targeting precision and increasing marketing engagement rates.
- Designed predictive models for customer renewal and churn analysis, achieving 84% prediction accuracy and supporting proactive customer retention strategies.
- Performed exploratory data analysis and feature engineering using Python and R on large structured datasets, identifying key behavioral patterns that improved forecasting accuracy by 15%.
- Automated recurring data preparation workflows using AWS Glue, SQL, and Python, reducing weekly reporting turnaround time by 60% while improving data consistency.
- Optimized analytical queries using joins, CTEs, window functions, and query tuning techniques, improving Tableau dashboard performance by 40% for high-volume reporting.
- Presented analytical findings and predictive model insights through Tableau dashboards and executive reports, enabling faster, data-driven decisions across marketing, operations, and customer experience.

CERTIFICATIONS

- Microsoft Azure Data Fundamentals (DP – 900)
- Power BI Data Analyst Associate (PL - 300)

EDUCATION

MASTER OF SCIENCE, DATA SCIENCE AND ANALYTICS

Jan 2024 - Dec 2025

University of Oklahoma

- **GPA:** 3.8 / 4.0
