EDUCATION

DePaul University, Chicago, IL

Bachelor of Science

Nov 2025

Major in Computer Science

Dean's List 2023, 2024

GPA: 3.96/4.0

Coursework: AI and Machine Learning, Data Structures, Algorithms, Computer Systems, Agile Development

EXPERIENCE

Moonsworth LLC

Software Developer | Java, MongoDB, OpenGL, Gradle

February 2019 – March 2022

- Implemented and orchestrated a state-of-the-art customer support system with Java, successfully connected millions of players to dedicated customer support agents for the #1 Minecraft client with 1.5 million monthly users and over 10+ Million downloads.
- Demonstrated exceptional organizational and project management skills ensuring the seamless integration of the support system across a diverse user base.
- Engineered scalable solutions to accommodate growing user community with AWS Lambda, resulting in consistent high levels of user satisfaction.

FrozenOrb LLC

Software Developer | Java, Python, Django, Electron, SCSS

August 2016 – January 2017

- Directed and led a dynamic team of 20+ professionals, overseeing support ticket management and ideation for a prominent Minecraft server and client CheatBreaker.
- Engineered an innovative client-side anti-cheat system featuring advanced packet analysis and comprehensive logging capabilities, establishing new standards for game security.
- Reduced backend hosting costs by migrating Self-Hosting to AWS API Gateway and AWS Lambda, eliminating overhead cost and streamlining processes to serverless.

PROJECTS

SportsHub | React / Vite, Together.ai, FastAPI,

September 2025 – Present

- Developed a comprehensive sports analytics platform supporting NFL, NBA, and MLB teams with real-time data integration from ESPN API and AI-powered insights using Together AI's API to relay prompts B2B.
- Built responsive frontend with interactive data visualizations, team comparison features, and dark mode functionality, paired with a robust FastAPI backend handling CORS, data validation, and external API orchestration.

ACTIVITIES & VOLUNTEER WORK

William E. Hay Leadership Accelerator, Member

March 2024 – Jan 2025

- Selected for competitive leadership development program focused on professional effectiveness and ethical leadership.
- Participated in intensive workshops and experiential exercises to develop essential leadership and workplace skills

DePaul Computer Science Society, Member

August 2023 – Nov 2025

- Participated in numerous coding challenges, Hackathons, and code/game jams offering experience outside the classroom, networking, community, and problem solving.
- Emphasized teamwork and communication with peers to learn algorithms and application design.

SKILLS

Languages: Python, Java, Scala, JavaScript, C, SQL

Developer Tools: Git, Linux, AWS, Gradle
