

ADITYA DESHPANDE

New York, NY | (+1) 551-261-2249 | amd9295@nyu.edu |  [aditya-m-deshpande](#) |  [adityadeshpande](#)

EDUCATION

NEW YORK UNIVERSITY - COURANT & STERN

New York, US

Master of Science in Information Systems [GPA: 3.7/4.0]

Sep 2023 - May 2025

- Coursework: Data Science, Database Systems, AI in Business, Product Management, Operations Management

UNIVERSITY OF MUMBAI

Mumbai, IN

Bachelor of Technology in Mechanical Engineering [GPA: 3.9/4.0]

Aug 2019 - May 2023

- Coursework: Project Management, Supply Chain Analytics, Big Data Analytics, Machine Learning, Data Networking

EXPERIENCE

COVENANT HOUSE

New York, US

Data & Business Analyst Intern

Feb 2025 - Present

- Developing NLP pipelines to extract sentiment/themes from **3K+** surveys, driving **12%** higher engagement
- Automating end-to-end ETL processes with Python, and SQL, enhancing data accuracy and reporting speed by **25%**
- Designing Tableau dashboards to help outreach and policy teams track impact metrics and act on real-time insights

CANTOR FITZGERALD

New York, US

Risk Analyst Intern

June 2024 - Aug 2024

- Led development of ML models on Sentinel logs to enhance cyber risk detection, increasing threat precision by **15%**
- Developed ETL pipelines in Python, SQL, Power Automate to process **10M+** logs/day, reducing triage time by **20%**
- Built Power BI dashboards integrated with Sentinel for real-time SOC monitoring of anomalies and critical alerts
- Created an ML-driven chatbot in Power Automate to filter RSS feeds for CVSS > **8**, improving alert quality by **15%**

BHABHA ATOMIC RESEARCH CENTRE

Mumbai, IN

Machine Learning Research Intern

Feb 2023 - June 2023

- Researched ML-based rotor unbalance detection, reducing balancing time and operational costs by **2%**
- Trained time-series classifiers with Scikit-learn on **500K+** signals, improving fault detection and diagnostics by **30%**
- Engineered temporal features using NumPy, Pandas, and visualized patterns via Matplotlib for interpretability
- Deployed diagnostic pipelines via Flask APIs and integrated with PostgreSQL dashboards used by plant engineers

REWORKED AI

Florida, US

Data Science Intern

June 2022 - Nov 2022

- Developed Python models to predict landowners likely to respond, enabling targeted outreach in property acquisition
- Engineered geospatial features using Geopy and automated pipelines in Pandas, improving prediction accuracy by **5%**
- Created Power BI dashboards that prioritized outreach targets, directly impacting investor engagement strategies

ADVENTURE ADVERTISING

Mumbai, IN

Data Analyst Intern

June 2021 - Aug 2021

- Applied cohort-based churn models using Pandas to analyze customer behavior, improving customer retention by **6%**
- Boosted campaign ROI by **10%** via A/B testing and funnel optimization using Google Analytics, SQL, and segmentation

ACADEMIC PROJECTS

INSTACART NEXT-BASKET RECOMMENDER SYSTEM | Python, Data Analytics

- Engineered a next-basket recommender system for Instacart using TIFU-KNN, analyzing historical purchase behavior to forecast items and improve recall to **37%**, enhancing user experience
- Built a Decision Tree model to identify high-intent snack buyers by targeting users with **≥15** repeat orders, enabling personalized marketing and strengthening retailer collaboration

TECHNICAL SKILLS

- Skills: Data-Driven Decision Making, Business Analysis, Agile Development, A/B Testing, AI, Machine Learning, AWS
- Programming Languages: Python (Numpy, Pandas, Scipy, Seaborn, Pytorch, Tensorflow, Matplotlib), C, SQL
- Analysis & Visualization Tools: Power BI, Tableau, Excel, Google Analytics, Azure Data Studio, Jira, Slack, Figma
- Database Management Systems: Microsoft SQL Server, MySQL, PostgreSQL, Microsoft Sentinel

ADDITIONAL INFORMATION

- International Research Journal of Engineering and Technology - "[Shipment Time Prediction using Machine Learning](#)"
- Design Patent - "A Prosthesis Hand" (Patent No. 202321057730, Issued Dec 8, 2023)
