

Aman Sahu

Business Data Analyst

TX, USA | (551) 310-1088 | amansahu220199@gmail.com | [LinkedIn](#)

SUMMARY

- **Business Data Analyst** with 5+ years of experience in Healthcare, Financial Services, and Supply Chain, driving requirements analysis, process optimization, and stakeholder collaboration to deliver enterprise-wide digital transformation.
- Skilled in **Agile, Scrum, and Waterfall**, with strong expertise in **BRDs, FRDs, user stories, process flows, and wireframes**, ensuring seamless alignment between business goals and IT solutions.
- Proficient in **SQL, Excel, Tableau, Power BI, JIRA, Confluence, MS Visio**, with a track record of delivering data-driven dashboards, KPIs, and performance reports to improve strategic decision-making.
- Expertise in claims management, healthcare compliance, financial reporting, fraud analytics, and **ERP-based supply chain operations**, ensuring adherence to **HIPAA, SOX, GDPR, and FDA standards**.
- Proven ability to lead **UAT, SIT, and data governance initiatives**, implementing workflow automation and risk management strategies that consistently enhanced efficiency, reduced costs, and improved **ROI**.

TECHNICAL SKILLS

Data Analysis:	Excel (Advanced, VBA, Pivot Tables, Macros, VLOOKUP), SQL, Python
Methodology:	SDLC, Agile, Waterfall, Kanban
Documentation:	BRD, FRD, SRS, BPMN, User Stories, Use Cases, Test Plan, User Guide
Project Management Tools:	Jira, Confluence, Trello, MS Project, MS Excel, MS SharePoint, Primavera
Visualization Tools:	Tableau, Power BI, QlikView, Qlik Sense
UML & Prototyping Tools:	MS Visio, SmartDraw, IBM Rational Rose, Balsamiq Mock-ups, Sketch
Business Analysis:	Cost/Benefit Analysis, Impact Analysis, GAP Analysis, Risk Analysis, SWOT Analysis, KPI, Requirement Gathering, User Story Creation, JAD
ERP Planning & CRM:	SAP, MS Dynamics NAV, Salesforce, HubSpot
Technical & Data Skills:	KPI, User Acceptance Testing (UAT), Alteryx, Google Analytics, Data Analysis, Data Modeling, Apache Airflow, MS Visio, JAD, MS Office, Software Development & Testing, Database Knowledge, BI Tools, Process Mapping, UX Understanding, QA Knowledge, Prototyping, Regression, A/B Testing, Predictive Modeling
Data Warehousing & Cloud:	Amazon Redshift, Snowflake, Google BigQuery, AWS, Azure
Soft Skills:	Business Intelligence, Stakeholder Engagement, Time Management, Leadership, Problem-Solving, Negotiation, Decision-Making, Documentation, Presentation, Verbal Communication
Version Control:	Git/GitHub

EXPERIENCE

Business Data Analyst | Optum, USA

Aug 2024 – Present

- **Spearheaded end-to-end requirements analysis** for an enterprise **healthcare analytics and care management platform**, translating complex clinical, operational, and regulatory needs into scalable technical solutions supporting **100K+ patient records**.
- **Drove process optimization initiatives** by analyzing end-to-end patient journeys, claims workflows, and care coordination processes, eliminating redundancies and improving operational efficiency by **22%**.
- Authored high-impact **BRDs, FRDs, user stories, and BPMN process flows**, reducing requirement ambiguities by **30%** and accelerating development cycles across cross-functional Agile teams.
- Designed and delivered executive-level dashboards using **Power BI, SQL, and DAX**, enabling real-time visibility into patient outcomes, treatment adherence, and cost drivers, improving leadership decision-making accuracy by **18%**.
- **Partnered with data engineering teams** to define data models, validation rules, and governance standards, improving data accuracy and consistency by **25%** across reporting and analytics platforms.
- Enabled predictive analytics initiatives by supporting data preparation, feature analysis, and model validation for identifying high-risk patients, contributing to a **14%** reduction in avoidable hospital readmissions.
- **Led User Acceptance Testing (UAT)** efforts, including test strategy, test case development, defect triage, and stakeholder sign-off, achieving **98% acceptance** on first production release.
- **Ensured HIPAA, CMS, and internal compliance adherence** by embedding regulatory controls into system requirements, increasing audit readiness scores by **29%**.

- **Facilitated cross-functional JAD sessions and Agile ceremonies**, improving stakeholder alignment and reducing requirement rework by **20%**, accelerating time-to-market for analytics features.

Business Data Analyst | Cognizant, India

Nov 2020 – Jul 2023

- Delivered analytics-driven solutions for a large-scale healthcare data platform, eliciting and prioritizing **50+ business and functional requirements** across clinical, IT, and operations stakeholders, improving requirement clarity and reducing change requests by **20%** during UAT.
- Performed advanced data analysis using **SQL (CTEs, window functions) and Python** to identify utilization trends, cost variances, and data quality gaps, improving reporting accuracy and reducing manual reconciliation effort by **25%**.
- Partnered with data science and care management teams to support development of predictive risk stratification models, contributing to targeted intervention strategies that reduced avoidable readmissions over two quarters.
- Defined ETL, data modeling, and reporting requirements for a **Snowflake-based analytics warehouse**, improving data refresh frequency from weekly to daily and reducing report turnaround time by **35%**.
- Designed and deployed executive dashboards using **QlikView and Advanced Excel**, enabling leadership to monitor patient outcomes, LOS, and operational KPIs, accelerating decision-making cycles by **20%**.
- Conducted post-implementation performance and adoption analysis, identifying reporting gaps and usability issues, which increased dashboard adoption across business teams by **30%** and improved stakeholder satisfaction scores.

Jr. Business Data Analyst | Cognizant, India

Dec 2019 – Oct 2020

- Collaborated with **10+ sales**, operations, and finance stakeholders to gather requirements for a real-time revenue analytics solution, defining **5+ KPIs** including hourly sales, conversion rate, average order value, and regional performance using **Agile ceremonies and Jira**.
- Cleaned and transformed **1M+** streaming sales records per month using Python, resolving missing timestamps, duplicate entries, and inconsistent product IDs, improving data quality and **KPI accuracy by 30%**.
- Developed **20+** optimized SQL queries, window functions, and stored procedures to automate KPI calculations, enabling real-time tracking of revenue and sales performance **across 8+ regions**.
- Built **5+ interactive Tableau dashboards** to visualize regional and product-level sales trends, enabling executives to identify opportunities faster and improving **sales strategy responsiveness by 20%**.
- Performed **data validation across 50K+ monthly transactions** using **Excel (Pivot Tables, VLOOKUP)** by reconciling dashboard metrics with finance reports, improving reporting accuracy by 35% and strengthening data governance.

PROJECTS

HR Analytics Dashboard – Employee Attrition & Workforce Insights | Tableau, Excel

- Developed an interactive HR Analytics dashboard in Tableau analyzing workforce data of 1,470+ employees, delivering insights on attrition rate, workforce demographics, job satisfaction, and departmental performance KPIs.
- Built advanced Tableau visualizations and KPI scorecards to identify key attrition drivers (salary band, job role, tenure), enabling data-driven HR decision-making and reducing attrition risk by 12% through targeted insights.

Business Intelligence Solutions for E-commerce | Tableau, Snowflake, Python, Excel

- Designed end-to-end Business Intelligence dashboards in Tableau integrating data from Shopify, Excel, and Google Analytics, tracking sales KPIs, customer segmentation, marketing ROI, and conversion funnel metrics.
- Developed ETL data pipelines using Python and SQL to extract and load multi-source data into Snowflake cloud data warehouse, implementing star schema data modeling to optimize analytical query performance by 35%.
- Implemented predictive analytics and machine learning models (Regression & Time-Series Forecasting) using Python (pandas, scikit-learn) achieving 80%+ forecasting accuracy, improving inventory planning, demand forecasting, and revenue optimization.

EDUCATION

Master of Science in Information Technology

Aug 2023 – May 2025

Worcester Polytechnic Institute (Worcester, Massachusetts, USA)

Bachelor of Engineering in Computer Science

Aug 2016 – Jun 2020

Rajiv Gandhi Proudyogiki Vishwavidyalaya, Bhopal, MP, INDIA

CERTIFICATE

Certified Scrum Product Owner
