

Amrutha Balumuri

Data Analyst

+1(786) 784-3533 | amrutha@myjobtech.com | GA, USA | [LinkedIn](#)

SUMMARY

Data analyst with 3+ years of experience in crafting, deploying and refining data infrastructure and ETL workflows. Experience in SQL, and Python for the processes like data extraction, data manipulation, and analysis to present actionable insights to the upper management and stakeholders. Experience in data visualization, reporting, and automation using tools like Tableau and Power BI. Well-versed in cloud technologies including AWS and Azure with experience in creating automated machine learning pipelines using Python and libraries like TensorFlow.

SKILLS

Methodology: SDLC, Agile, Waterfall

Language: SQL, Python, R, Spark

IDEs: Visual Studio Code, PyCharm, Jupyter Notebook

Packages: NumPy, Pandas, Matplotlib, Scikit-learn, ggplot2

Visualization Tools: Tableau, Power BI

Statistical Analysis Techniques: Regression Analysis, Cluster Analysis, Random Forest

ETL Tools: SSIS, Talend

EXPERIENCE

Data Analyst | HCA Healthcare, USA

January 2024-Present

- Pioneered implementing Agile practices in a cross-functional environment, leading to a 35% reduction in project timelines and a 20% enhancement in overall team productivity.
- Improvement In data processing time and a 15% reduction in data errors, boosting overall data quality and efficiency.
- Facilitated migration of MY SQL Server and MySQL databases to Amazon Redshift, Implementing scripting and indexing methods, which enhanced database performance by 20% and reduced query response times by 15%.
- Extensive experience in Python programming for data analysis and manipulation. Proficient in libraries such as Pandas, NumPy, Matplotlib, Seaborn, and Plotly to efficiently handle and analyze large datasets.
- Engineered a data visualization dashboard, streamlining data comprehension for stakeholders, resulting in a 25% improvement in data accessibility and expedited decision-making processes by 15%.
- Leveraged Power BI to create diverse reports and dashboards, resulting in a 30% Improvement in data visualization clarity and a 25% uptick in stakeholder satisfaction.
- Proficient in leveraging AWS services such as S3, Redshift, and RDS to manage, store, and analyze large datasets, enabling scalable and efficient data processing for actionable insights.

Data Analyst | Aplus Datalytics, India

June 2020-August 2022

- Executed a transition to the Waterfall methodology for development processes, resulting in a 40% decrease in project delivery timelines and a 25% Increase In on-time product launches.
- Orchestrated cross-functional efforts with application development business analysts to translate business needs into data designs, ensuring strategic alignment with organizational goals and achieving a 30% Improvement In operational efficiency.
- Created data analysis packages such as Pandas, NumPy, SciPy, and Matplotlib, achieving a 20% boost in data processing speed and a 15% decrease in analysis time.
- Championed collaboration across departments to Integrate data from sources Into Azure data storage systems, leading to a 20% enhancement in data consolidation and a 15% Increase In data quality.
- Maintained SQL queries, stored procedures, and functions to support data processing and analysis, ensuring data quality.
- Gathered, cleaned, organized, and analyzed data to create machine learning models using Python, leading to a 25%rise in model precision and a 20% enhancement in predictive capabilities.
- Applied ETL tools like SSIS and Talend to design, develop, and manage data integration workflows, ensuring seamless data extraction, transformation, and loading across diverse systems.
- Leveraged IDEs such as PyCharm and Visual Studio Code for preparing different projects, resulting in a 25% Increase in coding efficiency and a 20% decrease in coding mistakes.
- Identified discrepancies in source data, conducted in-depth root cause analysis, and restructured ETL processes; achieved a 33% progress in data Integrity metrics.

Data Analyst | Bytes Soft Solution, India

July 2019-May 2020

- Championed new data collection processes that improved communication between customers' needs and 25 product development teams; exceeded Q2 KPI goals by 82%.
- Cooperated with management in identifying real-time insight into 17 key performance areas that boosted revenue by 13% in the first month of employment.
- Analyzed the behavior patterns of 2K customers using cluster analysis; improved marketing campaigns by 72%.
- Influenced In creating and documenting ETL (Extract, Transform, Load) plans for data warehouse population from sources, leading to a 20% decrease in data processing errors and a 15% boost in data quality.

EDUCATION

Masters in Computer Science, Florida International University, FL, USA

August 2022-April 2024

Bachelors in Computer Science, Panimalar Engineering College, Chennai, India

August 2017-August 2021
