EDUCATION

Wheaton College, Norton MA: Bachelor of Arts (B.A.) - Computer Science

May 2025

TECHNICAL SKILLS

Programming languages: C++, Python, R, SQL, HTML, CSS, JavaScript

Computer Skills: Microsoft Word, Google extensions, PowerPoint, MongoDB, Azure

CODING EXPERIENCE

Software Engineer

May 2024 – Present

Outlier.AI

- Analyzed outputs from an AI tool in response to complex programming prompts. Identified the superior response by comparing functionality, efficiency, and adherence to best practices. Documented reasoning for selection
- Provided intricate programming prompts to an AI tool, guiding its learning and development process, evaluated the effectiveness of the AI's responses and identified areas for improvement
- Assessed the quality and efficiency of code written by fellow engineers, provided constructive feedback to enhance code maintainability and functionality

Software Engineer Intern

RANB Consulting Inc

June 2023 – September 2023

- Developed and optimized a data visualization tool, enhancing system performance by 20% and improving user insights into large datasets
- Collaborated with a cross-functional team to design, implement, and test APIs using Python, resulting in seamless integration with the client's front-end application
- Conducted code reviews and implemented best practices, reducing bugs by 15% and ensuring maintainable code for a scalable web application

Robotics Engineering Competition

January 2023 – May 2023

- Developed a C++ program enhancing decision capabilities, led a comprehensive engineering assessment
- Completed Robotics Engineering Report, finished in a first-place winning position in Robot Maze Test Race

SKILLS EXPERIENCE

IT Services

August 2022 – December 2022

- Troubleshoot and resolve hardware and software issues for over 200+ students
- Monitor and maintain network infrastructure by providing technical support for remote users via phone/email

Data Science Tutor

January 2022 – May 2022

- Assisted over 30 computer science and data science students
- Guidance in R coding and comprehensive support in various data science topics
