EDUCATION

Master of Public Health (MPH) in Epidemiology & Biostatistics

June 2025

CUNY Graduate School of Public Health & Health Policy

Relevant Coursework: Applied Biostatistics I & II, Epidemiological Methods I & II, R & SAS for Data Management, Public Health Research Design, GISc, Quantitative & Qualitative Analysis

Bachelor of Science (BS) in Biology

December 2020

City College of New York

LABORATORY EXPERIENCE

NYC Department of Health & Mental Hygiene Public Health lab

Manhattan, NYC

Laboratory Microbiologist (Contract)

April 2023 – Current

- Tested mosquito and tick samples for vector-borne pathogens, supporting early detection and response efforts to mitigate disease outbreaks
- Performed multiplex real-time RT-PCR analysis and document results
- Maintained detailed records and ensure data integrity through accurate sample identification
- Developed corrective action plans and tracked system enhancements based on audit findings

Pandemic Response Lab

Queens, NYC

Clinical Lab Specialist

January 2021 – February 2023

- Managed high-volume RT-PCR testing for COVID-19 and influenza, ensuring timely and accurate reporting
- Maintained and validated lab equipment; trained staff on SOPs and documentation protocols
- Supported automated workflows and system validation, contributing to operational excellence
- Trained and supervised five staff in lab workflows, improving efficiency and accuracy

RESEARCH & DATA ANALYSIS EXPERIENCE

NYC Department of Health & Mental Hygiene

Queens, NYC

Data Analyst Intern– Office of Research and Evaluation, Bureau of Mental Health

Feb 2025 – May 2025

Project Title: Analysis and Quality Checking of Population Mental Health Survey Data

- Utilized SAS to clean, merge, and analyze 2023 NYC Community Health Survey data, identifying key mental health outcomes and disparities across demographic groups
- Conducted statistical testing and quality assurance to ensure data integrity
- Developed visualizations, reports, and presentations to communicate findings to stakeholders
- Documented analytic processes and findings to support ongoing improvement in public health operations

NYC Health + Hospitals/Elmhurst

Queens, NYC

Research Analyst

August 2024 – December 2024

Project Title: Patient-Provider Communication for Sexual and Reproductive Health Care

- Applied strong interviewing and case investigation skills to identify and assess communication barriers within sexual and reproductive health care settings
- Efficiently managed research activities by administering surveys, coordinating study tasks, and facilitating seamless communication across research teams
- Demonstrated meticulous data management skills through accurate data entry, thorough cleaning, and effective organization of large datasets using Qualtrics, Excel, and R
- Assisted with statistical analysis and contributed to manuscript development, presenting findings to senior researchers and stakeholders

SKILLS

- **Technical Tools:** R, SAS, SQL, Power BI, Excel, Qualtrics, ArcGIS, Cerner, LIMS, Qualtrics, Redcap, Endnote, and Microsoft Access
- **Laboratory Skills:** Specimen collection & processing, sample tracking, record-keeping, lab safety procedures, PCR techniques, SOP development, audit response, data reconciliation, general research methods
- **Soft skills:** Critical thinking, problem-solving, organization, time management, and ability to work independently or in teams
