

Anas Khan

(716) -538 -9884 | anaskhan4it@gmail.com

PROFESSIONAL SUMMARY

Data & Systems Analyst with hands-on experience in SQL, Python, and Django, specializing in data analysis, reporting, and full-stack web development. Strong background in technical research, stakeholder communication, and building scalable applications. Certified Oracle APEX Cloud Developer, skilled in low-code development, interactive dashboards, and reporting solutions. Adept at leveraging data-driven insights and system improvements to support business growth and drive operational efficiency.

EDUCATION

Ontario Tech University	Oshawa, Ontario
Bachelor of Information Technology (Honors)	Graduated: 2023
Major: Technology Management	

Certifications

Oracle Cloud Infrastructure 2025 Certified AI Foundations Associate	Oct 2025
Oracle APEX Cloud Developer Certified Professional	Sep 2025

SKILLS

- **Databases & ETL:** Oracle, SQL Server, PL/SQL, SQL Developer, ETL Pipelines (SQL, Python)
- **Data Visualization & Reporting:** Tableau, Power BI, Excel, Oracle APEX (Dashboards, forms, Interactive reports)
- **Programming & Web Development:** Python, HTML, CSS, Django, Bootstrap, REST APIs
- **Cloud & Platforms:** Oracle Cloud Infrastructure (OCI), AWS
- **Development Methodologies:** Agile, Scrum, Waterfall
- **Core Competencies:** Analytical Problem-solving, Data Analysis, Data Visualization

EXPERIENCE

Data and System Analyst - Children of Hope (Canada)	Jan 2023 – Aug 2025
• Data Analysis & Database Management: Utilized SQL/Oracle queries to analyze donor database performance, troubleshoot data inconsistencies, and validate data integrity across Oracle databases. Developed and optimized PL/SQL procedures, functions, and triggers for data processing, while preparing technical documentation aligned with business requirements. • Application Development & Reporting: Designed and maintained dashboards, forms, and interactive reports using Oracle APEX to support donor and fundraising activities. Created database users and roles tailored to organizational needs, ensuring data security and access control. • Automation & Maintenance: Developed and maintained PowerShell and Unix shell scripts to automate repetitive tasks such as log cleanup, data extraction, and file transfers across shared drives, improving operational efficiency.	

- **Incident & Service Management:** Resolved over 50 monthly technical issues through ServiceNow with 98% SLA compliance. Addressed critical outages during donation campaigns, restoring websites and application functionality within minutes through systematic troubleshooting.
- **Testing & Deployment Support:** Prepared test data using SQL*Loader, coordinated release cycles between development and QA teams, and documented defect resolutions in collaboration with quality assurance teams.
- **Cross-Functional Collaboration:** Bridged communication between developers, fundraising teams, and management to ensure technical requirements were aligned with business goals. Facilitated deployment, prepared SLA reports, and communicated incident resolutions to stakeholders.
- **Process Improvement & SEO Impact:** Enhanced website performance and donor engagement by implementing SEO strategies and checkout-page optimizations, contributing to a 25% increase in organic traffic. Authored user guides and provided training/support for staff to improve adoption of IT systems.

ACADEMIC PROJECTS

Financial Analysis Tool with Machine Learning Integration

Technologies: Python, Django, TensorFlow, Scikit-learn, Pandas, Yahoo Finance API, HTML, CSS, JavaScript

- **Data Acquisition:** Architected a robust data pipeline using Yahoo Finance API to gather and preprocess historical stock data. Applied data cleaning and normalization techniques and integrated Django ORM for efficient database management.
- **Predictive Analysis:** Built a multi-algorithm predictive model using Linear Regression, Random Forest, and LSTM neural networks to enhance forecasting accuracy for stock prices.
- **Technical Indicators:** Incorporated SMA, EMA, and RSI for trend and momentum analysis, providing actionable insights for investment decisions.
- **Full-Stack Development:** Developed a scalable web application with Django backend and an interactive front-end using HTML, CSS, and JavaScript. Machine learning models implemented in TensorFlow and Scikit-learn; Pandas used for data manipulation.

Restaurant Management System

Technologies: Python, Django, PyCharm, SQLite, Kivy

- **Cross-Platform Development:** Developed an integrated system with Django for web and Kivy for mobile apps, connected through SQLite. Ensured consistent user experience across platforms.
- **Database Architecture:** Designed and optimized SQLite database to maintain data integrity and performance for both desktop and mobile apps.
- **Deployment Solutions:** Packaged the Kivy desktop app into a standalone executable using PyInstaller for streamlined installation on Windows.
- **User Interface & Features:** Crafted intuitive UI with touch-friendly controls and adaptive layouts. Implemented order tracking, table reservations, and menu customization to enhance operational efficiency and customer satisfaction.
