

PROFESSIONAL SUMMARY:

- Informatica Data Governance Associate with a proven track record & technical expertise in Informatica DG and data management tools. Demonstrated leadership in implementing data governance frameworks and enhancing data quality, complemented by agile methodology expertise.
- Renowned for strategic problem-solving and technical documentation skills, significantly improving data standards and compliance with a total of 7 years of experience.

TECHNICAL SKILLS:

- Informatica Data Governance ,Data Catalog and Data management
- Informatica administartor
- Tools: Informatica AXON, Enterprise Data catalog, Manta, IDQ (Informatica Data Quality), Powercenter, CDGC, IICS, Putty, CDQ
- Waterfall and agile environment methodologies
- Basic Knowledge: Basics of SQL, Power bi
- Unix/ Linux Commands, Cloud AWS
- JIRA and ADO platform
- Service Now, MS power point and Microsoft office & excel
- Notepad++, Outlook, Sharepoint

CERTIFICATION:

- AWS cloud practitioner

ACCOMPLISHMENTS

- On the spot award for zero defect delivery
- Excellence award for star performer

EDUCATION:

- Master's in Information Technology from Kurukshetra University, India 2016
- Bachelor's in Information Technology from Kurukshetra University, India 2014

PROFESSIONAL EXPERIENCE:

Cognizant Technologies Solutions, USA
11/2024

12/2022 –

Client:Financial services, USA

Responsibilities:

- Implemented a comprehensive data governance framework and established data governance policies and procedures within cross-functional teams.
- Administered Informatica Data Governance solutions encompassing Data Profiling, Data Quality management, Data Catalog, and Data Marketplace fas per industry standards.
- Integrated Axon and EDC to facilitate collaboration between business, information management, and IT users.
- Configured Informatica EDC to extract metadata from Oracle, SAP Business Objects, SQL, Tableau, Powercenter, DB2, Json
- Organised data into various Axon facets and created both custom and default workflows.
- Used the REST API as per the technical requirements for large data sets.
- Developed data profiling, mapping, policies and classification strategies based on sensitivity and business process criticality for data security as per business requirements.
- Led change management initiatives to adhere to regulatory requirements and improve client trust in data governance.
- Ensured adherence to data governance policies, business rules and regulatory compliance, like GDPR and CCPA, to maintain data processing for continuous improvement & implementing solutions
- Developed and implemented data governance policies to monitor data and compliant data storage practices across the organization
- Developed data standards and quality rules to ensure robust data integrity & quality assurance
- Utilized data quality & governance KPIs to identify and address data inconsistencies, ensuring data integrity and reliability
- Gained foundational knowledge of Informatica CDGC and CDQ
- Created data governance policies and procedures using CDGC, ensuring data quality and compliance of information systems. Utilized CDGC to establish and maintain data stewardship roles and responsibilities.
- Performed data classification into different categories like confidential, private etc.
- Gather business and technical requirements to capture metadata and lineage in Enterprise data catalog
- Utilized data profiling and quality tools of ETL to address data issues, manage metadata & implement data governance controls and standards.

- Administered data management processes implementation to ensure data quality, integrity, and compliance within the Informatica data governance framework
- Worked on technical documentation and created standard operating procedures document for all processes
- Learning programming languages like python

Tata Consultancy Services, India
12/2022

03/2018 -

Client: Pharmaceutical firm
Data Governance Lead

Responsibilities:

- Served as Information Data Governance and developer for US-based client Giant healthcare Company based in Indianapolis for four years.
- Extracting the data from multiple source systems (Data Integration) like Oracle 12g, SQL Server, T-SQL, flat files.
- Data upload in Axon data governance tool by categorizing data into different Axon facets.
- Experienced in default and custom workflow creation in Axon.
- Worked on Axon and data quality integration using score card
- Utilized MANTA for comprehensive IT solution implementation and lineage creation in enterprise data management.
- Designed custom data domains in EDC to enhance system capabilities.
- Created data lineage in EDC to show data transformation throughout lifecycle.
- Extracted metadata from various sources like Oracle, SQL, Powercenter, IICs, SAP HANA for EDC and created lineage for the same
- Participated in each phase of the Software Development Life Cycle to enhance data standards and domains. Supervised the setup of scanners and the construction of lineage across assets in EDC
- Participated in POCs to implement new features in Informatica tools
- Evaluated key performance indicators to track access management efficiency as per functional requirements.
- Collaborated with onshore counterparts & stakeholder management, gathering data to drive process improvements.
- Upgraded Informatica environments from old version to new version and applied hot fixes. For example, upgrading from 10.2.0 to 10.2.2 HF1 SP2 and from 10.2.2 HF1 SP2 to 10.4.1.1.
- Work on installation of Informatica Powercenter 10.x version , IICS secure agent.
- Managed Informatica administration for Powercenter, EDC, and Axon tools, worked on LDAP and SSO in PC
- Soft skills: Strong written Communication skills, Presentation skills, Interpersonal skills, strong problem-solving skills, attention to detail, provide creative solutions, accountability, Flexible, detail-oriented, ability to work independently, management skills, accountability, motivated, teamwork spirit
