

Atharva Narendra Nalawade

Dallas, Texas; 214-430-9209; atharvannalawade@gmail.com; www.linkedin.com/in/atharva-n-nalawade

Data Analyst with experience building scalable ELT pipelines, advanced SQL analytics, and operational dashboards to support real-time decision-making. Skilled in Python, data pipelines, and large-scale data modeling within cloud environments.

EDUCATION

The University of Texas at Dallas | *MSc in Information Technology and Management*

December 2026 (Expected)

SKILLS

- **Data Analysis & BI Tools:** Tableau, Power BI, Data Analysis, Google Analytics, Adobe Analytics, KPI Tracking, Ad Hoc reporting, A/B testing, Hypothesis Testing, Schema Design, Model Evaluation, ELT, Machine learning, troubleshooting, DAG
- **Databases & Programming:** SQL, Python, R, C, C++, MySQL Workbench, PostgreSQL, MongoDB, EDA, Databricks, TensorFlow, Snowflake, Data Warehousing, Data Pipeline Development, GCP, Azure, HTML, CSS, JavaScript, Firebase, CNN, Microsoft Fabric, Business Intelligence, AWS S3, AWS Glue, Sage maker, Root cause analysis, Operational analytics
- **Internet Of Things:** GUI, Arduino, Raspberry Pi, ESP32, ESP8266, NodeMCU, LoRa, Zigbee.
- **Project Management & Research:** JIRA, Scrum, Kanban, Agile, Canva, Hadoop, Spark, transformation, ERP systems, Process automation, Performance monitoring, Stakeholder engagement

PROFESSIONAL EXPERIENCE

Elara Caring (Elara Holdings LLC) | *Business Intelligence Intern*

June 2026 – August 2026

- Migrated 21+ dashboards of varying complexity from Tableau to Power BI, redesigning visualizations and DAX-based measures to preserve reporting accuracy while improving load performance and interactivity.
- Built end-to-end data pipelines processing an average of 10M records per project, sourcing from CSV, Excel, and SQL Server systems, and using SQL for extraction, cleaning, and filtering prior to transformation in Power Query.
- Designed relational data models and established table relationships within Power BI to support scalable, single-source-of-truth reporting across multiple business dashboards.
- Partnered directly with cross-functional stakeholders to gather requirements, deliver interactive Power BI dashboards, and walk teams through dashboard logic and functionality, driving adoption of self-service reporting.

Birla Management Centre Services Ltd. (Aditya Birla Group) | *Data Analyst*

June 2023 – December 2024

- Led end-to-end development of scalable ETL pipelines using Python (Pandas, NumPy) and SQL, integrating cloud and API data sources to improve data reliability and reduce processing time by 38%.
- Created and deployed 15+ dashboards (Power BI / Tableau) with advanced KPI tracking, data modeling, and business intelligence reporting, improving cross-functional decision-making efficiency by 25% across operations, and marketing.
- Prepared and optimized machine learning forecasting models (Random Forest, XGBoost), improving demand prediction accuracy by 18% and enabling data-driven inventory planning that reduced stock imbalances and improved operational efficiency.
- Served as a key contributor within the Group Data Center & Cloud division, independently managing analytics initiatives and resolving 50+ cross-functional technical challenges to enhance data governance, system stability, and enterprise-wide reporting scalability.

PROJECTS

Real Estate Listings Platform | *SQL Database & Business Analytics Project*

- Devised and normalized a multi-entity relational database (17 tables) supporting users, properties, transactions, reviews, analytics, and verification workflows, improving data integrity and eliminating redundant records across the property lifecycle.
- Implemented 6 stored procedures, 5 analytical functions, and 5 automated triggers (transaction completion, review updates, verification logs), reducing manual property status updates and enabling real-time business logic execution.
- Implemented advanced SQL analytics to identify top-performing agents, high-revenue cities, and conversion trends, enabling data-driven pricing strategy and performance benchmarking across multi-city operations.

LEADERSHIP EXPERIENCE

INDIAN STUDENT ASSOCIATION- University Of Texas At Dallas | *Outreach Officer*

- Optimized volunteer management by maintaining a reserve volunteer pool, ensuring consistent support for all events requiring 25 volunteers and reducing recruitment efforts.
- Led event execution, managing logistics, scheduling, and 50+ volunteers for major cultural events, enhancing student engagement for 800+ attendees and cultural representation.
- Directed cross-functional execution of ISA's flagship 2-day event **Sangam (1,000+ attendees)**, managing artist coordination, sponsor engagement, ticket sales strategy (30-day campaign), and end-to-end stage operations to drive attendance growth and successful event delivery.

Aerodynamic Modelling Competition | SAE Aero Design West – *Team Vaayushastra (Team Manager, Avionics)*

- Engineered real-time telemetry systems with Arduino, Raspberry Pi, and ESP32, enhancing in-flight data stability by 30% and contributing to a world #4 rank; developed a Python-based GUI for live flight analytics.
- Led a 15-member cross-functional team across aerodynamics, propulsion, electronics, and structures, achieving a 15% performance boost and a global #11 design ranking.
