EXPERIENCE

Senior Data Analyst

August 2023 - Present

Judicial Council of California

San Francisco, CA

- **Validated and optimized ETL pipelines** to achieve a <2% data discrepancy between **Snowflake** and legacy databases with **SQL** and **R** to analyze data, identify issues, and refine logic.
- **Collected and summarized data** with **R** from 58 courts to deliver to an external stakeholder, while collaborating with data engineers to build a **Snowflake warehouse** for automated data collection and **Power BI** visualization.
- **Automated data wrangling, summary statistics calculations, and data visualizations** to generate dynamic PDF reports using **SQL**, **R**, and **R Markdown**.

Analytics Specialist

January 2022 – August 2023

HDR, Inc.

Sacramento, CA

- **Developed predictive and statistical models** to analyze public opinion surveys to extract insights and inform infrastructure project decisions.
- **Created summary visualizations and interactive dashboards** using **Power BI**, **R**, and **Excel** to communicate key insights and trends to clients.
- **Queried and wrangled stakeholder data** from databases using **SQL**, **R** and **Excel** for use in models, dashboards, and visualizations.

Resource Management Analyst

April 2021 – September 2021

Desert Tortoise Preserve, Inc.

Ridgecrest, CA

- **Collected and analyzed ecological data** to inform habitat management decisions for a wild population of desert tortoises in a protected preserve.
- **Managed and visualized tortoise location data** using **R**, conducting spatial analyses to track movement patterns and support conservation planning.

Graduate Research Assistant

June 2018 – July 2020

University of Toledo

Toledo, OH

- **Wrote a quantitative M.Sc. thesis** and peer-reviewed journal articles based on **machine learning models** to forecast **home range** and **turtle survivorship** using **generalized linear models** and **survival analysis** in **R**.
- **Cleaned, manipulated, and visualized data** in **R**, ensuring data quality and preparation for analysis, while creating summary tables and graphs to effectively communicate research findings.

Undergraduate Research Assistant

August 2015 – December 2017

Auburn University

Auburn, AL

- **Wrote peer-reviewed journal articles** using **statistical models** like **generalized linear models** and **linear mixed-effects models** in **R** to analyze lizard thermodynamics.
- **Cleaned, manipulated, and visualized data** in **R**, ensuring data quality and preparation for analysis, while creating summary tables and graphs to effectively communicate research findings.

EDUCATION

Georgia Institute of Technology

May 2026

M.S. in Analytics

- Relevant Coursework: Intro to Analytics Modeling, Computing for Data Analysis

University of Toledo

December 2020

M.S. in Biology

- Thesis: *Threatened Turtle Species in Ohio and Michigan: The Ecology of Hatchlings and Analysis of GPS Devices*
- Relevant Coursework: Advanced Data Management, Biostatistics

- Relevant Coursework: Biocomputing, Advanced Analysis for Ecology

SKILLS

Tools and Languages: R (dplyr, ggplot2, tidyverse, odbc, lme4, randomForest, caret, Rmarkdown), Python (Pandas, NumPy), SQL, PowerBI, Snowflake, Power BI, Excel (pivot tables), Tableau

Technical Skills: Data Analysis, Data Science, Data Modeling, Data Visualization, Data Management, Machine Learning, Statistics, Experimental Design, Forecasting, ETL
