

DALHAT KADIRI

Data Analyst

Dallas, Texas | dalhatanalyzes@gmail.com | 469-607-9875

SUMMARY

- Experienced **Data Analyst** with **5 years** of expertise in managing and analyzing large datasets, creating predictive models and presenting data-driven
- Hands-on experience in **Data Analysis, Data Warehousing, Data Migration, Data Cleaning, Statistical modeling**, and SQL programming.
- Proficient in **Python** libraries like **Matplotlib, Pandas**, and **Numpy** for data visualization, generating visually appealing charts and graphs.
- Automated complex statistical models in **SAS**, reducing manual processing time by 50% and improving the accuracy of forecasts.
- Utilized statistical and machine learning techniques for analyzing complex datasets, improving efficiency and accuracy in **Python** and **R**.
- Developed intuitive visualizations in **Tableau** and **Power BI**, monitored process efficiency, and ensured compliance with system life cycle procedures.
- Skilled in utilizing multiple databases including **MySQL, MongoDB**, and **SQL Server**, ensuring efficient data retrieval and manipulation.
- Created data mappings and transformations to maintain data consistency, accuracy, and integrity throughout the **ETL process**.
- Executed **data cleaning, transformation**, and **loading** processes to prepare data for analysis, ensuring it is accurate, complete, and ready for use.
- Created **Power BI Desktop** reports in Report view for the Power BI service using Power BI Desktop reports
- Developed and deployed reports using **SSRS**, customizing reports to meet business needs and providing timely insights into performance metrics.
- Understanding and querying the master data tables to develop the **KPIs** to measure the actual data quality to increase the efficiency of customer and vendor master data.
- Collaborated with **cross-functional teams** to align **data insights** with business objectives, leading to the successful launch of three major products and achieving a 25% increase in user engagement.

SKILLS

Programming Languages: Python (Pandas, NumPy), R, SQL, SAS

Visualization: Tableau, Power BI, Matplotlib, Azure, Version Control

ETL Processes: Data Cleaning, Transformation, Loading

Cloud Data: Google Big Query

Data Analysis Techniques: Data Modeling, Data Mining, Data Cleaning, Data Warehousing, Data Visualization

Reporting Tools: SQL Server Reporting Services (SSRS), EXCEL

Database Management: SQL Server, MySQL, MongoDB

Soft Skills: Analytical Thinking, Problem-Solving, Communication, Attention to Detail, Team Collaboration

EDUCATION

Bachelor of Science in Computer Science Jun 2017

University of Lagos | Lagos State, Nigeria

CERTIFICATION

Certified in Data Management

Certified Analytics Professional

EXPERIENCE

Data Analyst

Epsilon, Irving, TX

| Aug 2022 – Present

- Utilize SQL and Python expertise to query and manipulate relational databases, extracting relevant data for analysis and reporting.
- Conducted statistical analysis using SAS to predict customer behavior, resulting in a 10% increase in customer retention through targeted marketing strategies.

- Execute variance analysis and financial forecasting using advanced R features, increasing data processing efficiency by 35% and improving financial insight reliability by 25%.
- Develop and implement interactive dashboards in Tableau for real-time data visualization, enabling swift decision-making and garnering praise from stakeholders.
- Construct high-performance database queries with Microsoft SQL Server, contributing to robust data processing.
- Optimize product pricing strategies by creating dynamic pricing models using Python (NumPy, Pandas), leading to a 15% increase in profit margins.
- Maintain and generate reports using SQL Server Reporting Services (SSRS) and Tableau, delivering key insights to stakeholders.
- Incorporate custom visualizations in Power BI and external source charts based on business requirements.
- Perform data analysis and maintenance on various databases including MySQL, MS SQL Server, and MongoDB.
- Prepare and present comprehensive financial reports, dashboards, and visualizations using Power BI and Microsoft Excel, enhancing stakeholder satisfaction with financial reporting by 30% and improving decision-making speed by 20%.
- Automate data collection processes through ETL pipelines, cutting data processing time by 40% and significantly boosting analysis accuracy.
- Apply data cleansing and analysis techniques in Excel, using pivot tables, formulas (V-lookup and others), data validation, conditional formatting, and graph and chart manipulation.
- Leverage Google BigQuery for large-scale data analysis and querying, enabling fast and efficient data processing for complex analytical tasks.
- Craft complex SQL queries for data extraction, transformation, and loading (ETL), ensuring accurate and efficient data retrieval from various databases.

Data Analyst
Dell Technologies, Austin, TX

| May 2019 - Jul 2022

- Applied statistical methods like hypothesis testing and regression to draw inferences from data and quantify relationships.
- Designed interactive and insightful dashboards in Tableau, enabling stakeholders to easily interpret complex data and derive actionable insights.
- Automated data processing tasks and custom data integrations using Python.
- Generated regular and ad-hoc reports to monitor KPIs, track progress, and inform decision-making.
- Optimized MySQL management for large datasets, reducing query times by 35% and enabling faster insights into sales performance.
- Utilized R for advanced statistical analysis and data modeling, producing detailed reports.
- Enhanced data integrity by leveraging Pandas and NumPy in Python for efficient data cleaning, improving accuracy by 15%.
- Developed custom reports using SSRS and Microsoft Report Builder to meet business needs and support decision-making.
- Managed ETL processes to populate data warehouses from various sources, ensuring data consistency and accuracy.
- Implemented Power BI solutions for visualizing complex financial and operational data, improving data-driven decision-making by 30%.
- Executed A/B testing on the patient portal, increasing user engagement by 30% and reducing call center volume by 20%.
- Applied Excel for data analysis and reporting, creating complex formulas, pivot tables, and charts to effectively present data.

PROJECTS

Retention Strategies to Improve Customer Satisfaction and Gaining New Customers

- This project focuses on analyzing key data from a retail company to devise effective retention strategies. By leveraging SQL queries, we will extract insights from various datasets to understand customer behavior, identify satisfaction drivers, and formulate actionable strategies.
