PROFESSIONAL EXPERIENCE

Industrial Engineer

Lockheed Martin, Greenville SC

April 2023 – Present (2+ years)

- Developed, maintained, and managed product schedules ensuring timely delivery of components in various areas of the plant. Communicated product progression, obstacles, and process improvement opportunities to site and executive leadership.
- Created automatic KPI data visualization dashboards for use at multiple organizational levels using Tableau Data visualization. The dashboards were utilized to identify process improvement opportunities and monitor the success of projects.
- Utilized production data to maintain value stream capacity simulation and modified as needed to aid operations and investment strategies. Analyzed simulation results and provided model result Tableau visualizations to site leadership.
- Developed and maintained excel based tools that identified recurring defects between products and the resulting cost, then routinely presented the data to site leadership to drive improvements and reduce waste.
- Utilized SQL database tables pulling information from various systems. Automated daily management reporting and shop floor visualizations.
- Assisted / Led the implementation of various continuous improvement projects leading to \$100+ thousand per year operational cost savings.
- Conducted regular procedures to maintain and update work standards as well as maintenance of operational crew plans and production budgets.
- Studied individual work operations to eliminate waste using 6 Sigma methodology resulting in both standard work cost savings and reduction of non-standard work due to poka-yoke.

Industrial Engineer Intern Rotational Program

Bosch Rexroth, Fountain Inn SC

August 2019 – May 2022 (1 year experience)

- Developed automated earned value management tool for site that eliminated repetitive team weekly tasks.
- Implemented replenishment system on production lines to allow for rapid replenishment via water spiders, thereby eliminating the necessity for operators to leave their workstations to replenish items themselves and leading to significant cost savings.

EDUCATION

BS Industrial Engineering

Clemson University,
Clemson SC

Graduated Dec 2022

SKILLS

Career Attributes

- Strategic thinking and project planning.
- Independent process design and implementation.
- Continuous improvement and project management.
- Data analysis and visualization.
- Problem solving and critical thinking.
- Clear and concise technical communication.

Software Knowledge

- Simio process modeling.
- Tableau data visualization.
- Excel project planning, budgeting, forecasting.
- PowerPoint visual communication.
- Word procedure creation and formatting.
- SQL database navigation and data prep.
- SAP navigation.

Programming Languages

- SQL
- C
- VBA
- Python

CLEARANCE

Active US Secret Clearance
