

Profile

Data Analyst with an MBA in Data Analytics and a passion for connecting data to business strategy. I thrive at the intersection of insights and impact—digging into complex datasets, building dashboards, and crafting content that drives client growth. At Technology Partners, I work across tactical analytics and strategic initiatives—driving business proposals and turning data into stories that unlock opportunities and deliver results.

Skills

Python	R Programing	Data Mining	Client Strategy
Tableau	Power BI	Java Programing	Relationship Analysis
Excel	SQL	Looker Studio	Proposal Development

Education

MBA, Saint Louis University, Saint Louis, Missouri, GPA 3.94	May 2024
Bachelor of Technology in Computer Science, India, CGPA: 8.52	May 2023

Professional Experience

Data Analyst, Technology Partners **Jul 2024 - Present**

Projects

- **Academic Behavior Dashboards**, Washington University **Jul 2024 - Present**

Collaborated in a cross-functional team to build Tableau dashboards analyzing student behavior and performance. Worked on designing visual layouts, building views, and translating academic metrics into actionable insights for faculty and leadership.

- **Inventory Management**, Compana Pet Brands **Feb 2025- Present**

Working on an interactive dashboard for inventory management, order optimization, and safety stock tracking. Translated operational logic into Power BI visualizations and used Python to automate backend data cleaning and transformation.

- **Finance – Bonus Outlier Detection MVP**, Washington University **Dec 2024 - Jan 2025**

Built a Python-based MVP that flagged anomalies in bonus distributions, helping the finance team replace error-prone spreadsheets and improve transparency across departments in Tableau with the backend work on python.

- **Marketing Proposal**, Mers Goodwill **Jan 2025 - Present**

Analyzed market trends and competitor offerings to inform a data and AI transformation strategy. Developed the proposal structure and content, helping leadership package the 60-day engagement into a scalable offering for mid-sized organizations.

MBA Consultant, Technology Partners **Sep 2023 - Apr 2024**

Data Analyst in a team of five for a Washington University School of Medicine project under Technology Partners. Used Python and Databricks to analyze academic behavior, segment students, and provide data-driven recommendations.

Graduate Assistant, Saint Louis University **Sep 2023 - May 2024**

Extended StatsBuddy, a data analysis code generator, from R to Python. Led coding, debugging, and optimization while assisting in teaching through course material prep, grading.

Data Analyst Intern, Iamplus Electronics Private Limited, Singapore **Jul 2022 -Dec 2022**

Built a specialized sentence predictor, optimizing for memory and latency. Used Python libraries like PyAudio, Pydub, and Webrtcvad to clean and preprocess audio. Conducted extensive research to identify the best model for Next Sentence Prediction.

Project - Based Experience

Unmask **Jul 2020 - Jan 2021**

Developed the "Unmask" website, allowing users to answer psychological questions, pointing personality traits or mental health insights, also provides matching individuals and free consultations with experts. Utilized Python, HTML, CSS, JS.

Chatbot using Transformer Model **Aug 2022 - Apr 2023**

Analyzed global mental health trends using Python and built a domain-specific chatbot with the RoBERTa transformer model (Hugging Face). Deployed it on the Unmask platform using Python, HTML, and CSS.

Certifications
