EDUCATION

University of New Haven

Master's degree in Computer Science (CGPA: 3.67/4)

West Haven, CT

Jan'23- May'24

- **Coursework:** Distributed Database Systems, Web Development, Python, Artificial Intelligence, Machine Learning, Cloud Computing

Institute of Aeronautical Engineering

B.Tech, Computer Science and Engineering (GPA: 8.9/10)

Hyderabad, India

June'18- June'22

- **Coursework:** Cloud Computing, Data Warehousing, C/C++, Web Technologies, Machine Learning, Research-Based Learning

EXPERIENCE

University Of New Haven

Research Assistant

West Haven, Connecticut

Jan '24 - Apr '24

- Analyzed large datasets using Python (Pandas, NumPy) and SQL to uncover trends that informed research decisions.
- Built and maintained data pipelines integrating Snowflake with Power BI, enabling automated reporting and reducing data latency.
- Collaborated with faculty to design data models and improve the efficiency of academic data processing workflows.

Cognizant Technology Solutions

Data Analyst (Azure Focused)

Hyderabad, India

Mar '22 - Jan '23

- Developed and managed cloud-based data pipelines using Azure Data Factory, supporting scalable analytics for enterprise systems.
- Delivered automated Power BI dashboards, improving business reporting and reducing manual effort by 15+ hours weekly.
- Wrote Python scripts for ETL orchestration and data validation, improving reliability of downstream processes.
- Deployed and maintained services on Docker and Kubernetes, ensuring high availability and performance in production environments.
- Worked with cross-functional teams to debug and enhance system performance, optimizing cloud resource usage.

Virtusa

Oracle PL/SQL and .NET Developer

Hyderabad, India

Jan '21 - March '22

- Refactored complex PL/SQL queries, reducing execution time by over 60% and improving data retrieval efficiency.
- Designed and implemented ETL workflows to connect on-premise databases with cloud infrastructure.
- Assisted in developing backend services using .NET, contributing to scalable enterprise applications.
- Supported system automation efforts using Linux shell scripts and tools like Ansible to streamline deployments.

SKILLS

- **Languages:** Python, SQL, JavaScript, PL/SQL, C/C++, R, Java
- **Cloud Platforms Tools:** Azure (Data Factory, Functions), AWS (S3, EC2, RDS), Docker, Terraform, Kubernetes
- **Data Engineering Tools:** Spark, Airflow, Hive, Kafka, Splunk
- **Databases:** MySQL, PostgreSQL, SQL Server, MongoDB, Snowflake
- **Data Visualization:** Power BI, Tableau, Excel
- **Other:** Git, Agile, ETL pipelines, Machine Learning, Data Warehousing, CI/CD

PROJECT HIGHLIGHTS

Revenue Dashboard (Tata Consulting Simulation)

Created interactive dashboards in Power BI and Tableau, visualizing revenue trends with advanced DAX measures. Built backend pipelines to deliver clean, timely data to business stakeholders.

Sales Forecasting (HM Data Challenge)

Used Python and Scikit-learn to identify trends in customer purchases. Built models to forecast future sales and inform marketing strategies.

Automated Attendance (Face Recognition System)

Developed a real-time attendance solution using Python and OpenCV, leveraging face recognition to automate check-ins and ensure reliable performance in varied lighting environments.
