SUMMARY

Data scientist with extensive programming and mathematical education background and diverse career experience. Over the past several years I've tackled data-driven challenges in numerous contexts, from image processing to survey insights to member data to industry quality. I adapt to and use multiple software programs and tools for the gathering, governance, exploration, analysis, modeling, and presentation of data to stakeholders, and maintain data hygiene with an eye towards longevity in data usability. I can draw on my software experiences to bring new or expanded implementations to the attention of company leadership for process improvement. As data management improves and the role of analytics grows in an organization, I look to advance the analytical context from descriptive and diagnostic insights to predictive and prescriptive insights, to keep clients ahead and give them room for new opportunities and growth. I'm always searching for new skills to add to my repertoire, and look forward to connecting with any like-minded professionals who want to network or anyone looking for data analytics insight.

TECHNICAL/LANGUAGE SKILLS

- Object-Oriented programming languages (Java, C++)
- Data processing tools (Alteryx, KNIME)
- Documented typing speed of 77 WPM
- Choice-Based Conjoint (including Sawtooth Software)
- Microsoft data ecosystem (SSIS, SSAS, SSRS, PowerBI)
- Mathematical/statistical software (MATLAB, R, STATA)
- Relational databases (SQL Server, FileMaker Pro Advanced)
- VBA scripting (Excel, Word, PowerPoint)
- Business Intelligence and analytics tools (Tableau, Shiny)
- Model monitoring tools (Aporia)

CURRENTLY EXPLORING

- Programming/Scripting/Markup languages: JavaScript, XML, .NET, PHP, Python, Perl
- Machine Learning: Neural Nets, Gradient Boosting (xgBoost, AdaBoost), Genetic Algorithms (optimizing prototype designs)
- Cloud-based data solutions (Amazon Web Services, S3, Sagemaker Studio)

PROFESSIONAL EXPERIENCE

Data Specialist – auticon, Columbus, OH (remote)

2023 – 2025

- As part of Model Lifecycle Management, incorporated existing and upcoming models into our model monitoring solutions (such as Aporia) to track feature and outcome drift. Developer reports in tools such as Tableau and PowerBI in support of this goal.
- As part of Innovation, performed exploratory data analysis and modeling on new sources of data, to better understand and communicate our resources to our business partners.

Senior Data Analyst – Health Homes of Upstate NY, Rochester, NY

2021 – 2022

- Provides leadership for data collection and data integrity across the organization.
- Ensures that data reporting to key stakeholders such as Department of Health (DOH), Managed Care Organizations (MCOs), HHUNY, the Health Home Leads and their associated Care Management Agencies is accurate and relevant.
- Oversees the completion of reports involving data both on-going and for special projects.
- Developing on-going data collection relevant to demonstrating the viability and impact of Health Home Care Management and other programs relevant to the work of HHUNY.

Software Testing Engineer – PeerPlace Networks, Rochester, NY

2020 – 2021

- Executed testing procedures to ensure that software meets established quality standards.
- Developed testing scripts and plans (including staging data sets) to test logic, error handling and system workflows.
- Expanded the QA team's library of SQL scripts to automate common testing tasks, and documentation library.

Reporting Analyst – MVP Health Care, Rochester, NY

2019 – 2020

- Created and maintained custom reports and dashboards in SSRS and Power BI.
- Created database stored procedures and table definitions, and maintained existing stored procedures to adapt to business needs.
- Solicited requirements for new requests, and created and executed test cases against those requirements.
- Automated manual processes and ad-hoc requests from the operations department.

2019

Health Systems Analyst – Monroe Plan for Medical Care, Pittsford, NY

- Provided analytical expertise as it relates to Monroe Plan medical management and decision-making.
- Prepared ad-hoc reports on request from internal and external customers.
- Developed cost, utilization, and quality of care reports by querying Microsoft SQL Server databases.
- Prepared cost-effectiveness, value-based and ROI analyses, utilizing health care data.
- Created and maintained Tableau reports based on internal and external data, for presentations and for internal stakeholders to query as self-service reports to reduce ad-hoc requests.

2017 – 2019

Data Analyst/Programmer – Rochester Precision Optics, West Henrietta, NY

- Responsible for the creation and maintenance of information systems used for collecting and presenting manufacturing data.
- Conferred with department heads to identify current data collection challenges and areas of analytic weakness, and spot opportunities for process improvement and standardization.
- Expanded RPO's business intelligence capabilities by introducing Tableau dashboards to effectively summarize data for company-wide consumption, and integrated RPO's FileMaker server with Tableau to pull data directly from the assembly and inspection floors, as well as MATLAB-based measurement tools, to give management access to up-to-date overviews of line performance and areas of weakness to address.
- Worked to implement a "visual factory" to map all stages of production, merging data from multiple sources while addressing gaps in data collection to gain total flow-through information.

2016 – 2017

Marketing Analyst – SIGMA Marketing Insights, Rochester, NY

- Collaborated/coordinated with clients and co-workers to gather requirements, interpret data, perform analyses, and develop reports.
- Determined appropriate quantitative methods for addressing clients' marketing challenges.
- Performed exploratory data analysis and mining, aggregating data from multiple sources (including large national datasets).
- Evaluated the productivity and profitability of marketing campaigns.
- Developed insightful, high-quality interactive business intelligence reports and dashboards using Tableau.

2014 – 2016

Associate Methodologist – KJT Group, Honeoye Falls, NY

- Wrote R scripts to perform statistical analysis on data generated from surveys on numerous healthcare and life sciences topics.
- Designed choice-based conjoint experiments for use in surveys, and advised research teams on efficient survey design and protocol and proper use of analytical research methods.
- Programmed Excel-based, VBA-powered market simulators and other deliverables for clients.
- Wrote PowerPoint slides summarizing analysis results alongside research team findings to give context to client business decisions.
- Proofread survey documents for logical consistency and grammar.
- Wrote and edited infographics and proposal templates that illustrated KJT Group's analytical methods and processes to prospective clients to differentiate the firm.

EDUCATION

Rochester Institute of Technology, Rochester, NY

2018 – 2022

Master's of Science – Data Science

2012 – 2014

Bachelor's of Science – Computational Mathematics

GPA

3.61

SUNY Brockport, Brockport, NY

2011 – 2012

Achievements:

- Member, Tau Sigma National Honor Society

COURSES AND PROJECTS

- Numerical Analysis
- Stochastic Modeling
- Numerical Linear Algebra
- Perturbation Theory
- Advanced Java Programming
- Cryptography
- Software Engineering for Data Science
- Differential Equations
