

SANTHOSH KUMAR CH eDiscovery DATA SPECIALIST

Jersey City, NJ | +1 (805)657-8281 | Email - Santhosh.avs123@gmail.com | LinkedIn URL - [linkedin.com/in/santhosh-kumar-6b2900157](https://www.linkedin.com/in/santhosh-kumar-6b2900157)

Career Objective:

eDiscovery professional with over 5 years of experience in Forensics, Operations and productions with Masters in Information Science. Has extensive experience in Data managing and analyzing electronic data for legal proceedings across civil law, patent issues, and real estate, ensuring compliance with legal and regulatory requirements. Specializes in Data Collections, Preservations, Analysis, Processing, legal hold, document review, Management, Migration, Culling, TAR (Technology Assisted Review), Email threading and quality checking, hosting, using industry-standard tools such as NUIX, Relativity, LAW Pre-discovery, and e-discovery different tools. Including key pain points, propose solutions to meet Client SLAs. Collaborate with product management, project delivery and engineering teams to deliver the appropriate technical solutions and establish credibility and trust with the clients.

- Identified and addressed data quality issues by working in a high-pressure deadline driven environment.
- Adept at problem-solving, collaboration, and communication with legal teams, ensuring seamless integration of systems and workflows for complex eDiscovery projects.
- Strong oral and written interaction abilities with both technical and non-technical teams and multi-task with work Commitment and reports tasks involve work independently.
- Dynamically involved in supporting (Litigation Support Hosting Platforms) reinforcing operations such as running queries, generating reports from the database, FOIA requests, Downloading the data and processing it with client specific configurations.
- Fervent team player and go to person for all the Office of General Counsel projects.
- Production efficiency rating of 99%, Use SQL queries to extract data from files and load it into the database.

Education Qualification:

Masters in Information Science, Trine University, USA.

Bachelors in Computer, Osmania University, India.

eDiscovery Skills:

Processing Tools:	XEDD (In House tool), FOIA Processing and Compliance
Office Tools:	Microsoft Outlook365, Excels with Formulas and Adobe, Doc
Restoration Tools:	PST & Stamp, Scan PST, OST extraction, Archive Files
Tools:	Native OCR, Render OCR, IPRO OCR, ABBY, NSF Manager OCR
Tiffing Tools:	Imaging, Z Render, MSG render, Excel render, Server Viewer
Hosting Environment:	NUIX, Relativity, RalativityOne, Server Viewer, DISCO, eCapture, IPRO, SQL, Cellebrite, LexisNexis, Everlaw, iCONNECT v10, VenioOne, CloudNine.

Professional Experience:

eDiscovery Data Specialist – UBS, Weehawken, NJ

February 2025 to Current

Job Responsibilities →

- Performing data collections and preservation of ESI using different e-discovery tools and database.
- Meeting expectations-priorities deadlines to serve our law department operations clients, maintain a tracking and reporting system used for metrics.
- handle multiple projects at once, meeting tight deadlines while keeping work quality high.
- Use SQL to pull and generate eDiscovery litigation reports from the Enterprise Data Warehouse (EDW), ensuring all reports meet legal and regulatory standards.
- Ensured proper data handling procedures, email extraction and chain of custody as part of computer forensic services.
- Perform quality checks to maintain data accuracy, using expertise in EDW systems, SQL, and business processes.
- Communicate technical details in a clear and simple way to colleagues, managers, and clients.
- Conducted forensic data preservation and collection using Relativity, EnCase, FTK, and Cellebrite, ensuring defensible and legally compliant processes.
- Review and analyze Excel reports, identifying missing data or errors and resolving them to ensure reliable reporting.
- Keep EDW scripts, documentation, and SOPs up to date, making sure everything is accurate and well-documented.

eDiscovery Analyst – Merck & Co Inc, Rahway, NJ

February 2024 to January 2025

Job Responsibilities →

- As a Data Analyst, I worked on data collection, processing, and production to generate insightful reports for pharmaceutical manufacturing processes, for legal hold and compliance using MS Excel, SQL, and using eDiscovery applications tools such as Relativity and Nuix also Merck's proprietary tech portal.
- Enhanced R&D quality assurance capabilities through the development of innovative data science solutions.
- Conducted data cleaning and preparation tasks, including removing duplicates, filling in missing values, and transforming data into a usable format.

- Conducted data collection using Encase, FTK Imager, Cellebrite, and Access Data, and executed Nuix-based data processing projects, ensuring quality control and media integrity throughout.
- Programmed data preservation solutions, including archival, digital conversions, and native/PDF/TIFF file formats.
- Experienced in Ringtail load file creation, manipulation, and producing final client deliverables based on specifications.
- Performed imaging, OCR, markup sets, saved searches, and productions in Relativity, including text extraction from OCR and native file loading.
- Managed documentation reviews and ensured accurate data production for investigations and litigation support.
- Designed and implemented advanced analytics solutions, improving operational efficiency and data-driven decision-making processes.

eDiscovery Data Analyst, Law in Order Pvt Ltd, INDIA

December 2017 to March 2022

Job Responsibilities →

- As a Data Analyst, I work with eDiscovery tools like Relativity and Nuix Workstation to manage electronic data, generate reports, and ensure smooth data processing, hosting, and quality assurance.
- Well versed with Relativity Productions and Review Support counting DTSearch, Persistent Highlight Sets, Redactions & Annotations, Excel rendering, Document coding, Search Term Reports, Mass Operations etc.
- Developed knowledge on EnCase and LIO proprietary tools for extractions, Nuix and Law Pre-Discovery Tool for processing and Intella, Relativity for hosting, Mentoring on OGC projects and production tasks.
- Extensive ability and efficiency to host millions of records and process terra bytes of data which includes migration data.
- Performed Tiffing (Imaging) and image conversion, Image File Manipulation using IPRO tool (Endorsement, OCR) File Conversion using third-party tool and quality control.
- Worked with other eDiscovery analysts to deliver legal data used in court proceedings through FTP & SFTP.
- Oversee and coordinate eDiscovery projects, developing and implementing plans for both internal and external litigation technology solutions.
- Collected, processed, and imported data into corporate eDiscovery review/Batching tools, ensuring proper access, data integrity, Data analytics includes email-threading, dustering, EPM technology.
- Provided eDiscovery technical support to internal and external legal teams, adapting to a dynamic work environment.
- Hosting and exporting data using Relativity desktop client and troubleshooting any errors encountered.
- Performed data de-duplication, filtering, and culling to reduce document review scope and costs, Post processing .DAT files as per the standards and loading them into Relativity.
- Conducting complex Boolean searches, generating reports and execution of various SQL scripts within script library in Relativity.
- Coordinated, responded, and resolved high priority data productions & processing tickets, Ecosystem, Troubleshooting complexities and errors in eDiscovery technologies across different phases (EDRM).

Certification

ACEDS – eDiscovery Technology Certificate (eDTech)
