Authorized to work in the United States under F-1 OPT — No employer sponsorship currently required

PROFESSIONAL SUMMARY

IT and Cybersecurity professional with hands-on enterprise IT support experience and a Master of Science in Cybersecurity (4.0 GPA) from Quinnipiac University. Skilled in Windows administration, Active Directory, Microsoft 365, networking, and security operations, backed by industry certifications including CompTIA Security+, CompTIA CySA+, and AWS Academy Cloud Security Foundations. Proven ability to deliver Tier 1/2 technical support, manage identity and access administration, and support endpoint security in enterprise environments. Authorized to work in the U.S. under F-1 OPT and ready to contribute immediately to an IT support or security operations team.

TECHNICAL SKILLS & CORE COMPETENCIES

IT Support & Systems Administration: Tier 1/2 Technical Support, Help Desk & Service Desk Operations, Remote & Desktop Support, Hardware/Software Troubleshooting, User Account Administration, IT Asset Management

Cybersecurity: Security Operations Center (SOC) Fundamentals, SIEM (Microsoft Sentinel), Vulnerability Assessment & Management, Endpoint Security, Security Monitoring, Incident Response, Risk Assessment

Identity & Access Management: Active Directory, User Provisioning & Deprovisioning, Group Policy, Access Control, Microsoft 365 Administration

Networking: TCP/IP, DNS, DHCP, VPN, LAN/WAN Troubleshooting, Network Infrastructure Support

Cloud Technologies: AWS (Cloud Architecting, Cloud Security Foundations, Cloud Foundations)

Security Tools: Microsoft Defender, Microsoft Sentinel, Wireshark, Nmap

Operating Systems: Windows, Windows Server, Linux

Scripting & Automation: PowerShell, Python

PROFESSIONAL EXPERIENCE

Junior Information Technology Security Officer

Jan 2024 – Dec 2024

Zimbabwe Electricity Transmission & Distribution Company (ZETDC)

Kadoma, Zimbabwe

- Delivered Tier 1 and Tier 2 technical support across a multi-site enterprise IT environment, resolving hardware, software, and network issues while meeting service level agreements.
- Administered Active Directory environment, including user provisioning, deprovisioning, password resets, and group policy-based access controls for enterprise systems.
- Strengthened endpoint security posture by configuring and monitoring workstations and servers in line with organizational security policies and standards.
- Supported network infrastructure operations, troubleshooting LAN/WAN connectivity issues to reduce downtime and maintain business continuity.
- Performed routine system backups and supported disaster recovery procedures to protect critical business data.
- Documented and tracked security incidents and IT support tickets, improving incident response records and knowledge base accuracy.

Information Technology Intern

Jun 2022 – Jan 2023

Zimbabwe Electricity Transmission & Distribution Company (ZETDC)

Kadoma, Zimbabwe

- Assisted in Windows OS deployment and configuration across desktop environments, supporting standardized system builds.
- Provided desktop support and troubleshooting for hardware and software issues, contributing to faster ticket resolution.
- Diagnosed and resolved LAN connectivity issues to support stable network performance for end users.
- Supported new-employee onboarding by configuring user accounts, workstations, and access permissions.

Food Service Operations Assistant (Part-Time, Student Employee)

Mar 2025 – May 2026

Compass Group

Hamden, Connecticut

- Delivered consistent, high-quality customer service in a fast-paced operational environment, resolving concerns in real time.
- Collaborated with team members to maintain smooth daily operations, applying strong communication, adaptability, and problem-solving skills.
- Used digital point-of-sale and inventory systems to support accurate transaction processing and operational efficiency.

ACADEMIC & TECHNICAL PROJECTS

AWS Breach Horizon — Cloud Security Risk Prediction (Time-to-Compromise)

Jan 2026 – May 2026

Master's Capstone, Quinnipiac University

- Built a cloud security risk-prioritization framework using Time-to-Compromise (TTC) analysis to estimate how quickly AWS vulnerabilities could be exploited, complementing traditional CVSS-based scoring.
- Analyzed cloud attack paths and applied threat modeling, vulnerability management, and IAM principles to produce risk-based remediation recommendations for SOC environments.

AWS SOAR Engine — Autonomous Incident Response Pipeline

Dec 2025 – Feb 2026

Quinnipiac University

- Developed a Python (Boto3) SOAR proof-of-concept that automates AWS IAM remediation for compromised identities, including disabling access keys and applying restrictive DenyAll policies to contain incidents.
- Documented a repeatable security automation workflow demonstrating detection-as-code principles for cloud incident response.

Password Hashing & Authentication Automation (Python / SHA-256)

Feb 2025 – Mar 2025

Quinnipiac University

- Built a Python password hashing and verification tool using SHA-256 and hashlib to simulate secure authentication workflows and reduce credential compromise and brute-force risk.

EDUCATION

Master of Science in Cybersecurity

Quinnipiac University

GPA: 4.0 / 4.0

Jan 2025 – May 2026

Hamden, Connecticut

Bachelor of Science in Information Technology

Chinhoyi University of Technology

GPA: 3.1 / 4.0

Aug 2019 – Dec 2023

Zimbabwe

CERTIFICATIONS

CompTIA CySA+ • CompTIA Security+ • Google Cybersecurity Professional Certificate • Advanced Cyber Security – Threats and Governance

AWS Academy Graduate: Cloud Security Foundations • Cloud Architecting • Cloud Foundations
