

FNU DOLSY

(469)-679-1274 | dolsy.j@myjobsmails.com | [LinkedIn](#) | Dallas, Texas

SUMMARY

Detail-oriented Data Analyst with around 4 years of experience delivering data-driven solutions across insurance, banking, and retail domains, including Fortune 500 clients like AIG. Proficient in SQL, Python, Power BI (DAX), Excel (VBA, macros,), and Snowflake, with a strong focus on automation, advanced analytics, and stakeholder reporting. Worked closely with cross-functional teams to solve real business problems turning raw data into dashboards, insights, and decisions.

EXPERIENCE

AIG || Data Analyst

Aug 2024 - Current

- Collaborated with cross-functional stakeholders (marketing, sales, operations) to translate business needs into **analytics requirements**, streamlining **data flow** and aligning **KPIs** with strategic objectives.
- Automated **ETL workflows** using **SQL** and **Python** with **Apache Airflow**, reducing **data processing time** by 20% and saving 12 analyst hours weekly.
- Performed **exploratory and statistical analysis (EDA, Hypothesis Testing, Linear Regression)** to uncover customer behavior patterns, identifying 3 key churn drivers and supporting a 9% boost in retention initiatives.
- Optimized **data pipelines** across **Oracle** and internal systems, raising report accuracy to 96% and cutting manual fixes.
- Designed and deployed 6+ interactive **dashboards** in **Tableau** for leadership, improving visibility into **campaign performance** and accelerating decision-making by 10–12%.

Neon IT Systems || Data Analyst

Feb 2020 - Nov 2022

- Collaborated with cross-functional business teams to define **KPIs** and build **data-driven use cases** for **customer behavior**, **fraud risk**, and **portfolio performance** across **retail** and **banking domains**.
- Automated **data pipelines** using **Python**, integrating **multi-source data (POS, core banking)**, reducing manual consolidation efforts by 60% and enabling **near real-time analytics**.
- Cleaned and validated **300K+ daily transactions** using **Python** and **SQL**, maintaining over **97% data accuracy** for **dashboards**, **risk models**, and **regulatory reporting**.
- Optimized complex **SQL queries (Snowflake)** powering 10+ **reports** used by **risk** and **marketing teams**, cutting **data processing time** by 25% and improving **user experience**.
- Built **ML models for fraud detection** and **customer segmentation**, boosting accuracy and campaign effectiveness by 20%.
- Designed automated **dashboards** and **reports** in **Power BI** and **Excel (VBA)**, leveraging **DAX** for dynamic **KPI calculations** and **time intelligence**, saving 10+ hours weekly and enabling **real-time monitoring** of **campaign ROI**.

SKILLS

- **Programming Language / Cloud:** Python, SQL, R, AWS, Azure Databricks
- **IDEs / Statistical Methods:** Hypothesis Testing, ANOVA, Time Series, A/B Testing, Visual Studio, PyCharm, Jupyter
- **Machine Learning:** Regression analysis, Bayesian Method, Decision Tree, Random Forests, Neural Network, Sentiment Analysis, K- Means Clustering, KNN, Classification, SVM, Natural Language Processing, LLM, CNN, XGBoost
- **Packages:** NumPy, Pandas, Matplotlib, SciPy, Scikit-Learn, PyTorch, TensorFlow, Keras, Spark, Seaborn
- **Visualization Tools / Database:** Tableau, Power BI, Microsoft Excel, Looker, Power Query, MySQL, SQL Server, Oracle,
- **Software/Other Skills:** Jira, Databricks, Data Visualization, Predictive Analytics, Pattern Recognition, JMP, Data Integrity, Quantitative Data, Data Science, Statistics, Statistical Analysis

ACADEMIC PROJECT

All State Prediction Challenge | Machine Learning

Jan 2024 – Apr 2024

- Employed advanced machine learning techniques, including ensemble methods and hyperparameter tuning.
- Collaborated with team members to optimize the deployment process, reducing the model's inference time by 25%, thus enhancing its real-world applicability.

Flight Booking Database | SQL, Database Design

Jan 2023 – Apr 2023

- Designed and implemented an Oracle database to streamline an airline's booking operations, focusing on efficient data storage, retrieval, and system scalability.
- Enhanced database performance by implementing Triggers, Sequences, Views, and Indexes, optimizing SQL query execution and ensuring data integrity throughout the booking process

EDUCATION

University Of Texas at Dallas, Dallas, TX | GPA - 3.91 | MS, Business Analytics and Artificial Intelligence Dec - 2024

ICFAI Business School, India | GPA 3.80 | Bachelor of Business Administration

Jul - 2020
