May 2025

Relevant Courses: Python Programming, Data Structures and Algorithms, Problem Solving and Object-Oriented Programming, Introduction to Statistics, Programming in C

TECHNICAL SKILLS

Programming Languages: Java, Python, C, C++, LaTeX

Data Visualization: Microsoft Excel, Tableau

PROJECTS

Teacher-Student Management Software | Purdue Project | May 2022

- Collaborated with a team of four to design and implement a robust software application featuring a graphical user interface to simulate teacher and student roles with distinct access controls.
- Developed concurrent processes using Java multithreading and ensured data consistency through synchronization techniques.
- Integrated buffered I/O operations to enable dynamic text document editing, with session data persistently carried across user logins.

Online Shopping Platform | Purdue Project | May 2023

- Partnered with a team of three to engineer a comprehensive GUI-based software system replicating an online shopping environment with role-based permissions for shoppers and shop owners.
- Implemented functionality for users to manage online shopping carts, supporting item storage and retrieval.
- Leveraged real-time updates to synchronize item quantities and shop inventory across concurrent user sessions, ensuring seamless multi-user interaction.

PROFESSIONAL EXPERIENCE

Restaurant Industry Worker | Hyde-Away Restaurant | Newton, NJ

Oct. 2019 - Present

- Interacted with customers in a friendly and professional manner, taking orders accurately, answering questions about menu items, and ensuring guests have a positive dining experience.
- Provided attentive service by promptly delivering food and beverages to tables, ensuring orders are correct, refilling drinks as needed, and promptly addressing any concerns or special requests from customers.
- Worked closely with kitchen staff, bartenders, and other servers to coordinate food and beverage orders, maintaining cleanliness and organization in the dining area, and supporting team members to ensure efficient and smooth restaurant operations.

CRM Donor Services Intern | Tunnel2Towers | Staten Island, NY

June 2024-Aug. 2024

- Managed large datasets containing thousands of donor contacts in Excel, conducting detailed comparisons to identify potential duplicates.
- Accessed and utilized the organization's CRM system to verify or reject duplicate entries, ensuring accurate data consolidation.
- Ensured consistent formatting across all contact records, maintaining data integrity throughout the deduplication process.
