

Gagan Kumar
Sr .Net Full Stack Developer

+9173105619

ratakondagagan5@gmail.com

Professional Summary:

- IT experience with 6+ years core expertise in Microsoft .Net technologies involving all the stages in software development life cycle from requirement analysis, design, development, testing, implementation, support, coordination, and client interaction for various business.
- Experience with Software Development Life Cycle (SDLC) namely Waterfall, Agile and Prototype, and good knowledge in SCRUM methodology.
- Experience in Designing, Development and Deployment of High-Performance, Scalable, Distributed, ASP.NET Applications.
- Experience in developing applications in PowerApps using Common Data Service CDS, SQL, Flow, Excel, and SharePoint.
- Expertise in using DAX and generated dashboards & reports and integrating with PowerApps.
- Strong experience on Software technologies like ASP.NET MVC, MVP, XSLT, C# 10.0 .NET 6, VB.NET, ADO.NET, .NET CORE, WCF, PHP, Web Services, Web API, LINQ, Entity framework, SQL Server, Oracle Developer, HTML5, PHP, JavaScript, jQuery, SQL Business Intelligence tools to build web applications, web pages, windows applications, classes, re-usable user controls etc.
- Imported data from flat files to SQL Server database using SSIS. Also used Azure for Scaling and checking the reliability of the applications which were developed during the project.
- Developed Single Page Application (SPA) with Vue JS, Angular JS and Entity Framework.
- Experience in data accessing using Data Adapter, Data Reader & Data Set, Entity Framework in ADO.NET and Language Integrated Query (LINQ), LINQ to SQL & LINQ to XML
- Developed T-SQL (Procedures/Functions/Triggers, and SSIS to automate the Admission Process. For example, utilized Fuzzy Lookup, and (TF) Taskforce SSIS tool to identify duplicate applicants.
- Written various T-SQL Queries, Stored Procedures, views for accessing data from the SQL Server 2017.
- Worked as .Net / Azure solutions architect on Azure and Azure IOT projects using, Azure IOT Hub, Azure Edge, Azure Device Provisioning Service, Azure service bus, service fabric, queue, topics, streaming analytics jobs, app service, Azure SQL server, Azure storage.
- Developed .NET Core applications using C# to deliver efficient and scalable solutions.
- Built JSON-based APIs using C# to facilitate seamless communication between various systems and services.
- Utilized JMETTER to conduct performance testing and ensure the reliability of applications under different load scenarios.
- Implemented DevOps practices, primarily focusing on Azure DevOps, to enable continuous integration and continuous deployment (CI/CD) workflows.
- Integrated automated testing into CI/CD pipelines, ensuring code quality and minimizing risks in the software development lifecycle.
- Experience creating rich UI applications using WPF (Windows Presentation Foundation).
- Proficient in developing and deploying .NET applications on the Amazon Web Services (AWS) cloud platform.

Technical Skills:

Microsoft Technologies	.NET Framework 5.0, ASP.NET, ADO.NET, ASP, ADO, WCF, LINQ
Programming Languages	C, C++, C#, .net, VB.Net, Knowledge in Python, COBOL, JCL, Razor
Web Scripting Languages	JavaScript, JSON, jQuery, CSS, HTML, DHTML
Web Technologies	ASP.NET, HTML5, CSS3, Java Script, JQUERY, Angular8, Angular11, Angular14, XML, JSON, XAML, XSL, XSLT, Kendo UI, Azure, Knockout JS, Angular JS, Marionette.js, Require JS, Ajax, Web Services, Boot Strap.

Database Technologies	SQL Server (Stored Procedure, Triggers, User Defined Functions, Views), MS Access, T-SQL, PL/SQL, ODBC, MySQL, SQL Server client management studio, MongoDB, Oracle 10g/9i/8i.
XML Technologies	XML, XHTML, DHTML, SOAP, WSDL, Web Services
Operating Systems	Windows 2007, Windows 10, and Windows server 2012/ 2016/2019
Software/Tools	Jenkins, Docker, Kubernetes
Modelling Tools	UML, Rational Rose, Design Patterns, MVC
Cloud	Azure. AWS
Testing Tools	MS-Test, N unit, Mocking, Visual Studio Unit Test, J unit, Jasmine.
Version Control Tools	Visual Source Safe (VSS), Team Foundation Server (TFS), VSTS, GIT
Tools	SQL Server Reporting Services, Redis, PostgreSQL, OData, RDF Crystal Reports (2010/9/8.5/8), SQL Server Integration Services, UML, MS Visio, SharePoint, Visual SourceSafe, Subversion, Team Foundation Server, Delphi, Xpedit, Adobe Experience Manager.

Professional Experience:

Centene Corporation, St Louis, Missouri

Aug 2022 - Present

Sr .Net Full Stack Developer

Responsibilities:

- Proficient in building JSON-based APIs using C# to facilitate seamless communication between applications and services.
- Experienced in using JMETER to conduct performance testing and ensure optimal application performance under different load scenarios.
- Utilized Spec Flow as a tool for Behavior Driven Development (BDD), enabling effective collaboration between development, testing, and business stakeholders.
- Designed and developed applications in an Agile environment, following MVP and MVC patterns to ensure separation of concerns in the presentation logic.
- Demonstrated expertise in creating automated unit tests and employing Repository frameworks to interact with data stored in relational databases using strongly typed .NET 6 objects.
- Developed T-SQL Queries, Stored Procedures, and views to access data from SQL Server databases efficiently.
- Led Salesforce-related projects, including Salesforce Market Integration and developing processes for data management through Salesforce APIs.
- Supervised the development and architecture of cloud-based CM Salesforce and Marketing Automation tool Eloqua, collaborating with Sales and Marketing Senior leadership.
- Proficient in utilizing Angular 8 to design and implement effective web interfaces, including building Angular 8 components and consuming REST services using Component-based architecture.
- Successfully upgraded existing systems from Angular 7 to Angular 8, ensuring the latest features and improvements were integrated into the applications.
- Developed loosely coupled application using WF, C#, MWM pattern, LINQ, dependency Injection container Unity Container, NHibernate.
- Closely worked with different application Teams to modernize their existing process using Power Platform.
- Extensively worked with Node.js applications, utilizing PM commands and Package .JSON for managing dependencies and dev-dependencies.
- Actively involved in creating and maintaining database packages, stored procedures, views, and functions using PL/SQL programming language in Oracle to support application development and optimize database performance.
- Demonstrated expertise in implementing Microservice architecture, leveraging AWS services like EC2, S3 Bucket, SNS, and SQS to build, test, and deploy Identity Microservices.
- Developed SOAP and REST API-based internal tools, deployed on Cloud Foundry, AWS S3, and Kubernetes, to enhance code quality and performance.

- Proficient in using Jira to track and manage support tickets efficiently.

Environment: .NET 5, ASP.NET 4.5, .Net Core 3.0, MVC 5, .Net Framework, Angular JS 13, Windows 10, CID, PWA, DEV Apps, JIRA, Jenkins, AWS, User Controls, Visual Studio 2019, GITLAB, TFS, ER/Studio, Data Modeling, ODP.NET, VB6, SharePoint 2013, VB.Net, Web Forms, JSON, Web API, AJAX, Bootstrap, SQL, Cosmos DB, PostgreSQL, MS SQL 2016 R2 enterprise server, swagger, XML, Active Directory, C#, SOA, IIS8.0, JQUERY and CSS, HTML5, SOAP, LINQ, JavaScript, HTML.

Blue Coat Systems, Sunnyvale, CA
Senior .NET Full Stack Developer

May 2020 - July 2022

Responsibilities:

- Responsible for maintenance of applications with technologies such as .NET C#/SQL Server/Oracle/jQuery/HTML5/JavaScript/Angular 11/Bootstrap/jQuery.
- Prepare and dispense work assignments, provide guidance, and/or review the work of other team members.
- Designed user interface for ASP.NET 4.8 applications in C#.
- Extensive knowledge and hands-on experience in designing, implementing, and consuming RESTful web service interfaces.
- Skilled in designing and implementing logical and physical data models using tools like Oracle SQL Developer Data Modeler, ensuring scalability, flexibility, and adherence to industry best practices.
- Proficient in implementing backup and recovery strategies using Oracle Recovery Manager (RMAN), ensuring data availability and minimizing downtime in the event of system failures or data corruption.
- Demonstrated understanding of REST principles, including stateless communication, resource identification, and uniform interface design.
- Successfully led the TDD initiative for the AMS team, resulting in a reduction in bug counts and improved overall code quality.
- Proficient in writing unit tests, integration tests, and end-to-end tests for Node.js applications using testing frameworks like Jest, Mocha, or Chai, ensuring code quality and reliability.
- Extensive experience in writing complex T-SQL queries, stored procedures, views, and functions to retrieve, manipulate, and analyze data efficiently from large-scale databases.
- Demonstrated ability to design and optimize database structures, including table schemas, indexes, and partitions, to enhance query performance and ensure data integrity.
- Developed and implemented a comprehensive suite of automated tests to ensure the stability and reliability of AMS applications.
- Collaborated with the AMS team to identify and resolve critical production issues quickly and efficiently, minimizing downtime and ensuring customer satisfaction.
- Extensive experience with Git as a distributed version control system (DVCS).
- Extensive experience leveraging LINQ to query and manipulate data from various data sources such as databases, collections, XML, and JSON, resulting in efficient and concise code.
- Developed User Controls, used .NET web controls and improved the performance of the application by configuring the caching.
- Application components are developed in an agile environment utilizing a Test-driven development approach.
- Worked closely with database administrators to optimize database schema and indexing for better query performance and data consistency.
- Integrated Entity Framework with other Microsoft technologies such as ASP.NET MVC, Web API, and Azure Services to deliver end-to-end solutions.
- Collaborated with cross-functional teams to define acceptance criteria, wrote unit tests, and ensured code quality by running tests automatically on every build.
- Worked on Azure Site Recovery and Azure Backup- Deployed Instances on Azure environments and in Data centers and migrating to Azure using Azure Site Recovery and collecting data from all Azure Resources using Log Analytics and analyzed the data to resolve issues.
- Configure Continuous Integration from source control, setting up build definition within Visual Studio Team Services (VSTS) and configure continuous delivery to automate the deployment of ASP.NET MVC applications to Azure web apps and managed Azure Active Directory, Office 365 and applied upgrades on a regular basis.

- Implemented a CI/CD pipeline using Azure DevOps (VSTS, TFS) in both cloud and on premises with GIT, MS Build, Docker, Maven along with Jenkins's plugins.
- Created login-based member's area that displays ASP.NET pages based on access levels and assigned Roles.
- Designed and implement a complex data integration solution using SSIS that handled data from multiple sources and performed advanced transformations such as data cleaning, aggregation, and enrichment.
- Managed a team responsible for providing AMS for a critical application, ensuring that the application remained functional and met the needs of the business.
- Maintained detailed documentation of AMS processes and procedures, ensuring that knowledge was shared across the team and reducing reliance on individual team members.
- Worked with advanced concepts of ASP.NET Core MVC such as Models and Providers, Filters used for developing backend technology.
- Developed and maintained several Angular-based applications, implementing robust and scalable front-end architectures using Cypress for E2E testing.
- Expertise in programming languages such as C#, Java, or C++.
- Implemented rolling updates, blue-green deployments, and canary deployments using Kubernetes, minimizing downtime and enabling seamless application updates and rollbacks.
- Integrated Kubernetes into CI/CD pipelines using tools like Jenkins, GitLab CI/CD, or CircleCI, automating the building, testing, and deployment of containerized applications to Kubernetes clusters.
- Developed robust and scalable applications using OOP concepts such as encapsulation, inheritance, and polymorphism to improve code maintainability and reusability.
- Designed and implemented end-to-end testing frameworks using Cypress and created test plans, test cases and scripts.
- Worked closely with cross-functional teams including UX/UI designers, backend developers, and QA engineers to deliver high-quality software products.
- Guided teams in adopting Agile best practices, ensuring efficient collaboration, and removing impediments to achieve project objectives.
- Implemented and followed industry-standard Git workflows such as GitFlow or GitHub Flow.
- Implemented custom Razor templates and extensions to enhance productivity and code reuse.
- Developed reusable components and layouts using Razor's partial views and layouts, resulting in streamlined development and improved consistency across projects.

Environment: Visual Studio 2019, .Net Framework 5.0, Visual Basic 6.0, AIM Basic, Mainframe, Lotus Note, Cosmos DB, MS Access, MS Excel, Web Services, C#, VB.Net, LINQ, ADO.Net, Win Forms, AMS, ASP.Net, AJAX, Java script, CSS, JQUERY, SQL Server 2005/2008, T-SQL, Visual SourceSafe, Oracle10g, UML, MS Visio, Agile Methodologies, SOAP, SOA, XML, HTML, IIS 6.0.

Client: Truist Bank, Charlotte, NC

June 2019 to April 2020

Role: Sr.Net Developer

Responsibilities:

- Worked as Full stack .Net Developer in the team for designing and developing the application using Visual Studio.Net Framework, C#, ASP.NET, SQL Server and LINQ Entity Framework.
- Effectively involved in various stages of development of the project starting from the project planning until production and maintenance using Agile Methodology.
- Developed the classes using C#, which incorporates N-tier architecture.
- Involved in requirement analysis and application designing sessions Designed and implemented the Web Pages of project using ASP.NET and C#.
- Worked on Visual Studio/.Net Core Framework to implement Business Logic.
- Designed and implemented reusable React.js components, enhancing development speed and maintaining consistent UI/UX across the application.
- Created Custom SharePoint Hosted solutions for several apps.
- Enhanced existing custom web parts using C#.Net and SharePoint Object Model for integration.
- Developed the UI using React JS and Restful services using ASP.Net WEB API.
- Created and developed independent WEB API services and defined service contracts for specific functionality in search module.
- Managed local deployments in Kubernetes, creating local cluster and deploying application containers.

- Designed and developed Customer Lookup tool, which is helping customer in expediting Azure outage assessment and end-customer communication workflow.
- Container management using Docker by writing Dockerfiles, set up the automated build on Docker HUB, installed, and configured Kubernetes.
- Experience on creation, configuration and monitoring Shards sets. Analysis of data to be shared, choosing a shard Key to distribute data evenly. Architecture and Capacity planning for MongoDB clusters. Implemented scripts for mongo DB import, export, dump and restore.
- Designed the MS build system to enable modular functionality through configuration settings.
- Used user interface controls, which use JQuery to validate client side validations.
- Used JSON to transmit data between server and Web Application, an alternative to XML Serialization.
- Implemented AJAX features to reduce full post back, for improving the efficiency and interactivity across web applications.
- Used LINQ to SQL (object relational mapping) for integrating data validation and business logic rules into data model.
- Developed and Implemented HTML and JavaScript Functions.
- Docker/Kubernetes Containerization of cloud-based applications and maintaining the overall infrastructure.
- Developed Web Services to communicate to other modules using XML based SOAP and WSDL.
- Performed querying to database using LINQ to SQL and querying to XML files using LINQ to XML.
- Performed and resolved cross-browser issues and Unit Testing.
- Worked on using TFS as version control system.

Environment: C#, ASP.NET MVC, Entity framework, XML, TFS, Visual Studio, Azure Web apps, Deployment, CI/CD, Docker, Kubernetes, .Net Framework, .NET CORE, SQL Server, SharePoint, Agile
