

GUIDE TSUNGAI MADIRI

3535 South Ball Street, Arlington VA 22202, Phone +18048880774; Email: gtmmdiri@gmail.com

PROFESSIONAL SUMMARY

Experienced Data Governance & Quality Lead with 8+ years in the banking and consulting sector, specializing in implementing robust data governance frameworks, driving cross-functional data quality initiatives and ensuring regulatory compliance (GDPR, CCPA). Proven leader with a track record of improving data accuracy, accessibility, and integrity through policy development, stakeholder engagement and tool implementation (Collibra, Informatica). Adept at collaborating across global teams and time zones to align data strategy with business goals.

EDUCATION

University of Zimbabwe, Harare

BBA: Business Administration 12/2011

Data Governance Certification

SQL certification.

SKILLS

- Data Governance Frameworks (DAMA, DCAM)
- Data Quality Management & Reporting
- Data Quality Tools: Informatica IDQ, Collibra DQ, IBM Information Analyzer
- ETL & Data Integration: Informatica (IDMC, PowerCenter), Alteryx
- Metadata Management & Governance: Collibra
- Cross-Functional Collaboration and Team Leadership
- Data Platforms & Warehousing: Snowflake, Informatica IDMC, IBM InfoSphere, Alteryx
- Regulatory Risk Management
- Programming & Query Languages: SQL
- Reporting & Analytics: Regulatory and Executive-level reporting
- Soft Skills: Cross-functional collaboration, advisory & consultative leadership, strategic planning

WORK HISTORY

Data Governance Lead

Xcelerate Enterprises

06/2019 – Present

- Led the development of Xcelerate enterprise-wide Data Governance Framework, aligning with DAMA principles and corporate objectives, improving data transparency and control across 4 global business units.
- Developed a robust data Lakehouse architecture on Snowflake, integrating feeds from core banking systems (e.g., FIS, Jack Henry) and credit systems (e.g., Experian, FICO), providing real-time data access for risk, finance, and audit teams.
- Established data quality rules to validate loan origination and servicing data (e.g., APR, LTV ratios, delinquency flags) entering the Snowflake platform, reducing downstream data errors by 40% across mortgage and auto lending products.

- Provided advisory support to the Credit Risk and Compliance teams for aligning data assets with regulatory frameworks like Basel III and CECL.
- Partnered with data stewards and compliance officers to implement Collibra for metadata and data quality tracking, ensuring traceability of data lineage for high-risk attributes like credit score changes, charge-offs, and delinquency flags.
- Collaborated with Compliance and Risk teams to ensure full GDPR and CCPA compliance for customer and financial datasets.
- Redesigned and streamlined the customer onboarding process for lending products (e.g., personal loans and home equity lines of credit).
- Championed the rollout of Collibra as the centralized data catalog and stewardship platform, enabling improved data lineage tracking and stakeholder collaboration.
- Utilized Alteryx to automate reconciliation processes for loan balances and credit utilization across internal GLs and third-party loan servicing platforms.
- Delivered reports on compliance status, actions, and risk assessments.
- Spearheaded a data quality initiative across Retail and Institutional Banking units, increasing data accuracy scores within 12 months.
- Defined and enforced data policies and classification protocols, integrating automated checks and access controls into internal systems.
- Facilitated global training workshops and created a self-service knowledge portal to drive awareness and accountability for data quality.
- Designed over 200 data quality rules using Informatica IDQ, IBM Information Analyzer, and Collibra DQ to monitor data across credit cards, mortgages, and small business loans, improving portfolio integrity and reporting accuracy.

Wells Fargo – Phoenix, AZ Remote
Data Governance Analyst

07/2017 - 05/2019

- Assisted in implementing data governance tools and frameworks for compliance with data privacy laws.
- Assisted in Designing and implementation of a division-wide Data Quality Scorecard using Informatica Data Quality, leading to a 40% reduction in operational data errors across onboarding and KYC processes.
- Utilized Alteryx to automate reconciliation processes for loan balances and credit utilization across internal GLs and third-party loan servicing platforms
- Partnered with IT to deploy automated metadata harvesting and profiling, increasing metadata completeness from 94% across mission-critical datasets.
- Supported the management of data privacy programs, focusing on regulatory obligations such as HIPAA, ITAR, and GDPR.
- Coordinated cross-functional efforts to cleanse, enrich, and reconcile client master data impacting credit risk models and capital reporting.
- Conducted risk assessments and developed recommendations for data security enhancements.
- Facilitated training sessions to improve organizational understanding of data governance principles.
- Supported the rollout of Alation to enhance discoverability of analytical assets and eliminate duplicative data sourcing efforts.

Goldwater Bank Phoenix, AZ Remote
Data Governance Consultant

09/2015 - 06/2017

- Worked with the data steward and data owners in creating metadata, data lineage, data quality rules and guidelines.
- Successfully delivered an enterprise-wide data integration strategy working with lines of business leaders to identify priorities and business value.
- Developed and maintained data dictionaries for enterprise data lake Ingestion.
- Provided training to data consumers on how to navigate and locate their data in Collibra.
- Initiated workflows in Collibra for application business owners to approve their respective data dictionaries.
- Large enterprise data management and analytics.
- Data quality control through creation of audit controls, proactive monitoring and data cleansing techniques.
- Data modeling, data integration, data configuration and general database concepts.
- Planning, designing and implementing an overall risk management process around privacy.
- Provided job aids and assisted application business owners to approve their task in Collibra.
- Maintained data governance policies to manage the operations of data governance effectively.
- Established data quality rules to validate loan origination and servicing data
- Utilized data lineage techniques to gather requirements.
- Experienced in organizing, publishing business and technical metadata and implementing data management technologies.

FedEx Office Plano, TX
Data Analyst

08/2013 - 09/2015

- Designed and implemented tools to support strategic value chain optimization initiatives.
- Gathered and documented data requirements for Commercial Lending products; standardized business definitions across 15 key metrics.
- Participated in data integration projects consolidating client data from 7 legacy systems, contributing to a successful MDM implementation.
- Utilized data visualization techniques to present and explain complex data sets.
- Created executive dashboards for data quality KPIs; collaborated with data owners to resolve quality exceptions in the first year.
- Deployed predictive analytics models to forecast future trends.
- Data Catalog, Data Quality, Master Data Management.
- Worked in data analysis and data integration, cleansing, and transforming large amount of data between multiple systems
- Supported risk data aggregation efforts aligned to BCBS 239 by delivering lineage documentation and gap analysis for key data elements.
- Update and developed SQL scripts and queries to extract and analyze data from multiple sources.

Technical Skills

Collibra | Informatica | Alation | IBM Infosphere | SQL | Tableau | Power BI | Microsoft Purview
| Agile | JIRA | Confluence | Alterix | Information Analyzer(IBM)

Time zone Flexibility: Worked with offshore teams in South Africa; flexible with early/late collaboration hours.
