Data Analyst

PROFESSIONAL SUMMARY

- Data Analyst and Power BI Developer with a strong foundation in data analytics, business intelligence, and reporting, eager to contribute technical skills to deliver actionable insights that drive business value.
- Skilled in designing and developing interactive dashboards, KPIs, and visualizations using Power BI, Tableau, and Excel, translating complex datasets into intuitive, decision-supporting insights.
- Proficient in data extraction, cleaning, transformation, and validation, ensuring high accuracy and reliability of datasets for analytical and reporting purposes.
- Hands-on experience with SQL, Python, and R for statistical analysis, predictive modeling, and generating actionable insights to support strategic and operational decisions.
- Familiar with ETL processes, data integration, and cloud platforms such as Azure, enabling efficient centralization of structured and unstructured data for scalable analytics solutions.
- Strong understanding of data governance, quality standards, and compliance, with emphasis on secure handling of sensitive business and healthcare information.
- Adept at simplifying complex datasets into meaningful, story-driven insights and delivering them through visually compelling dashboards tailored for both technical and non-technical stakeholders.
- Experienced in collaborating effectively within cross-functional teams, contributing creative ideas, and adapting quickly to dynamic project requirements.
- Proactive and solution-oriented, with a natural ability to identify trends, opportunities, and actionable patterns that enhance business performance and operational efficiency.
- Continuously learning and applying emerging BI tools, cloud technologies, and advanced analytics techniques to deliver high-quality, data-driven solutions.
- Recognized for analytical thinking, problem-solving, and clear communication, with a strong commitment to applying technical expertise to support data-driven decision-making, optimize processes, and create measurable business impact.
- Passionate about turning complex data into actionable insights and delivering impactful dashboards and reports that simplify information for all stakeholders.

TECHNICAL SKILLS

Business Intelligence	Power BI, Tableau, Looker
Database & ETL	SQL Server, PL/SQL, Data Warehousing, Google Cloud Platform (GCP), Azure
Programming & Tools	Python, R, C, MS Excel (Pivot Tables, VLOOKUP, Macros), Pega CSA & CSSA
Data Management & Reporting	Data Validation, Data Analysis, Cohort Analysis
Analytics & Reporting	KPI Development, Dashboard Creation, Data Storytelling
Packages	MS Office (MS Access, MS Excel, MS PowerPoint, MS Word)
Other Tools	Pega Systems, Cloud Storage & Reporting Tools

PROFESSIONAL EXPERIENCE:

Tata Consultancy Services (TCS) | Hyderabad, India
Systems Engineer

May 2021 – Jul 2023

Responsibilities:

- Analyzed and validated 50+ system use cases, reducing post-production issues by 15%, enhancing data integrity, and ensuring alignment with business requirements.
- Designed and executed comprehensive performance, regression, and functional testing strategies, improving system reliability, accuracy, and end-user confidence in decision making.
- Streamlined business processes by interpreting data patterns, uncovering key insights, and providing recommendations that enhanced operational efficiency and supported strategic decisions.
- Automated repetitive testing workflows and reporting pipelines, reducing manual effort by 40%, improving efficiency across cross-functional teams, and enabling faster delivery of analytical insights.
- Coordinated UI enhancements and performance optimization initiatives, resulting in faster response times, smoother user interactions, and an improved overall user experience.
- Monitored and managed client facing builds, achieving a 98% on-time delivery rate while maintaining rigorous quality standards and minimizing operational risk.
- Collaborated closely with developers, business analysts, and product managers to identify system bottlenecks, implement process improvements, and optimize overall workflow efficiency.
- Performed root cause analysis for recurring system issues, proposing solutions that reduced downtime and improved operational stability.

- Supported end to end activities, including requirements analysis, testing, and deployment, ensuring smooth transitions from development to production.
- Documented testing methodologies, system configurations, and issue resolutions to create knowledge resources for team members and enhance process transparency.
- Applied data governance and compliance principles throughout testing and reporting activities, ensuring all outputs adhered to regulatory standards and organizational policies.

PROJECTS:

Sales Process Automation (PRPC)

- Automated end to end vehicle sales processes including quoting, purchasing, financing, and leasing, improving workflow efficiency and reducing manual effort.
- Configured dynamic pricing rules, sales tax calculations, registration fees, and promotional discounts, ensuring accurate and consistent pricing for all customer transactions.
- Developed and implemented automated lead assignment and escalation for email-based quote requests, improving response times and ensuring no customer inquiries were delayed.
- Simulated external vehicle lookup services for VIN based inventory data, supporting accurate tracking, selection, and validation of vehicles in the system.
- Coordinated with cross functional teams including sales, finance, and management to capture requirements, streamline workflows, and define reporting metrics.
- Designed role-based access and permissions, ensuring that salespersons, managers, and branch managers could only view relevant data, maintaining data security and compliance.
- Assisted in end to end testing of workflows, identified process gaps, and recommended improvements that enhanced accuracy, efficiency, and user experience.
- Supported reporting automation by creating structured data views and dashboards for sales performance, profitability analysis, and order tracking, enabling data-driven decision-making.

AI Learning Hub – Online AI Education Platform

- Developed a comprehensive online learning platform for AI and machine learning, providing free and premium courses, interactive quizzes, AI news, and community forums to enhance user engagement.
- Implemented user authentication and role based access controls, ensuring secure access to premium content while maintaining data privacy and compliance.
- Built course progress tracking, quiz evaluation, and subscription management features, enabling users to monitor learning advancement and manage subscriptions efficiently.
- Integrated third party APIs including YouTube (for video tutorials), Stripe (for payment processing), and OpenAI to enhance platform interactivity and functionality.
- Designed responsive web interfaces using Django, JavaScript, HTML5, and Bootstrap/Tailwind CSS, ensuring seamless user experience across desktop and mobile devices.
- Deployed the platform on Google Cloud Platform using Cloud Run, Cloud Build, and Cloud SQL, establishing a scalable, reliable, and automated CI/CD pipeline for continuous deployment.
- Developed detailed dashboards and reporting mechanisms to track user engagement, subscription metrics, and course completion rates, enabling data driven decisions for platform improvement.
- Conducted end to end testing of workflows, including course access, subscription upgrades/downgrades, and payment processing, ensuring robust functionality and seamless user experience.

EDUCATION

Florida Atlantic University
Master’s in Computer Science

PROFESSIONAL CERTIFICATIONS

- Pega Certified System Architect (CSA)
- Pega Certified Senior System Architect (CSSA)
