EDUCATION

- **University of Toronto** Toronto, ON
Honours Bachelor of Science *Sept 2021 - August 2025*
 - Mathematics & Its Applications (Probability/Statistics)

SKILLS SUMMARY

- **Tools & Languages:** Python, SQL, Git, Microsoft Excel, LaTeX, Jira, Confluence
- **Industry Knowledge:** Mathematical Modelling, Probability/Statistics, Databases

EXPERIENCE

- **Department of Mathematics @ University of Toronto** Toronto, ON
Teaching Assistant *September 2024 - April 2025*
 - Supported a professor in the smooth operation of lectures of 400+ students, facilitating student engagement through interactive discussions and answering questions in real-time.
 - Instructed two weekly classes of 20+ students, facilitating hands-on learning exercises and class discussions to reinforce mathematical concepts.
 - Graded assignments and exams, offering detailed feedback to support student progress.
 - Fostered an inclusive learning environment by addressing students' questions and personal academic challenges with empathy.
- **Information Technology Services @ University of Toronto Libraries** Toronto, ON
Student Library Assistant *Oct 2023 - May 2024*
 - Provided efficient, tactful support to library patrons and staff by troubleshooting hardware and software issues, ensuring seamless technology use across library systems.
 - Assisted in inventory management, hardware maintenance, and documentation using Jira and Confluence.
 - Generated custom reports by querying SCCM views with SQL to track resource allocation.
- **Freelance** Remote
Private Mathematics Tutor *Oct 2020 - June 2024*
 - Provided one-on-one tutoring for youth and university students, tailoring instruction to individual learning styles.
 - Developed customized curricula based on student goals, continually adapting content to maximize engagement and comprehension.
 - Provided regular progress reports to parents, detailing student achievements, challenges, and recommendations for further academic development.

EXTRACURRICULAR PROJECTS

- **Traffic Flow Model:** Developing a new mathematical model for traffic flow on multi-lane straight roads with both motor vehicle and cyclist user classes and stochastic pedestrian interference, focusing on extending macroscopic models through refined interaction terms based on microscopic traffic research.
- **My Only Manager:** For NSBEHacks 2024, optimized Cohere's API (including Classify and Generate), multithreading for time-sensitive reminders, and chat storage in MongoDB to create a AI-integrated productivity Telegram chatbot.

COMMUNITY INVOLVEMENT

- **Bridges International**
University of Toronto
 - Coordinated social events for an international student club to foster community and cultural exchange among members from diverse backgrounds.
- **Chinese Christian Fellowship**
University of Toronto
 - Successfully organized the executive election process, managing a body of roughly 100 members.
 - Led a 12-week book discussion group by developing a concrete curriculum and facilitating weekly discussions. Organized social events to build community and engagement throughout the program.
