

HARSHIT ARORA

Boston, MA | (508) 762-7575 | harshit56arora@gmail.com | [LinkedIn](#)

SUMMARY

Detail-oriented data analyst with 6+ years of experience, specializing in transforming raw data into actionable insights. Proficient in leveraging advanced SQL queries, statistical techniques, and business intelligence tools to solve real business problems. Expertise in Excel, Tableau Desktop and Power BI. Passionate about uncovering meaningful patterns in data to drive strategic marketing decisions. Demonstrated success in improving internal business processes and enhancing end user experience.

EDUCATION

Master of Science in Business Analytics Clark University – Worcester, MA	Feb 2021 to Dec 2022
Bachelor’s in Business Administration Indraprastha University – Delhi, India	Aug 2015 to May 2018

SKILLS

Area of Excellence: Data Science, Data - Driven Analysis, Machine Learning, Business Intelligence, Business Analytics, Statistical Techniques
Technical and Soft Skills: Data Mining, Data Pipelines, Data Extraction, Decision Tree, Clustering, Data Munging, Statistical Analysis, Data Cleaning, Predictive Analytics, Data Visualization, DBT, SSAS, SSIS, A/B testing, Problem solving, Team Player, Detailed Oriented, Communication.
BI Tools: Salesforce, Jira, R, SAS, Python, Looker Studio, MYSQL, Advanced Excel, MS Access, Lucid charts, Azure, Tableau, Data ETL, Google Analytics 4, VS Code, MS Power BI, QlikView, Tableau Desktop
Certificates: SAS Certified Statistical Business Analyst using SAS 9: Regression and Modeling, Python in Data Science, Advanced Google Analytics, Digital Marketing Certification, Advanced Excel
Cloud Technologies: Google Cloud Platform Big Data & Machine Learning modules - Cloud Storage, Cloud Dataflow, Salesforce Marketing Cloud; Tableau Cloud

WORK EXPERIENCE

Digital Marketing Data Analyst Johnson & Johnson , Raynham, MA	Jan 2025 to April 2025
- Develop and maintain real-time performance dashboards using MS Power BI to monitor content, emails, social media and web channel metrics for multiple JJI business units across the digital marketing channels. - Analyzed website traffic, user behavior and content performance using Google Analytics 4 and Looker studio, helping the upper management in providing actionable insights about video content views, performance and future recommendations regarding new campaigns. - Performed SQL queries to perform analysis, providing valuable insights from large databases which initiated strategic decision-making and connecting Power BI data to Salesforce Marketing Campaigns databases ensuring optimization, accuracy and consistency across all reporting activities. - Supported global campaigns by effectively collaborating with JJI and JMT teams to develop strategies, forecast & hindsight promotional effectiveness across brand events. Automated Power BI dashboards and Excel reports, enhancing overall team productivity and reducing manual work for Q1, 2025 and future quarterly reports.	

Data Analyst Sonesta International Hotels , Newton, MA	Apr 2023 to Aug 2024
- Conducted extensive data cleansing, manipulation, and analysis utilizing advanced Excel functions such as VLOOKUP, PivotTables, Filters, IF statements, INDEX/MATCH, and complex nested formulas, enhancing the accuracy and forecasting Sonesta’s inventory across multiple hotel lines. - Leveraged Power Query and VBA to develop efficient macros and automated hotel transitions and operational processes for repetitive tasks, ensured hotel inventory is regularly updated with new orders and suppliers which significantly reduced manual labor by 30% - Utilized SQL analytical queries to perform in-depth analysis, providing valuable insights from large databases which initiated strategic decision-making in opening new hotel brands across South America and contributing to a cost reduction initiative by 14% - Collaborated with cross functional teams to develop commercial planning strategies, forecast & hindsight promotional effectiveness across brand events, utilizing other promotional marketing levers to drive sales and build ad hoc reports to track risk- profitability ratio associated with new projects. Power Automating dashboards and reports, aiding non-technical team members and stakeholders by breaking down business drivers and monitoring Sonesta’s previous year’s performance which resulted in increased quarterly sale by \$ 550K.	

Data Reporting Analyst Robert Half (Lafarge Holcim) , Boston, MA	Jan 2022 to Dec 2022
- Designed and developed intuitive dashboards and reports in Tableau Cloud, effectively translating complex data sets into easily understandable visual narratives. These tools tracked global key performance indicators (KPIs), in-app orders, transportation costs & routes, and Front-Line Risk Assessments (FLRAs) across multiple business lines, facilitating data-driven decision-making. - Established data normalization, data mining and build a stream that automatically retrieves data from old to new systems and sources (SQL databases, external data such as social network data, user reviews, new software updates) and generated ELT data pipelines of buyer’s data to predict their behavior. - Rollout company’s monthly performance indicators such as Paperless tickets generated with respect to targets sets, Order response time, message time across Europe and America using Qlik Sense and reported to Stakeholders aiding in business decision making and tracking company’s overall efficiency across years. - Managed databases, created new tables and performed data transformation using SQL queries on MS Access, used multiple joins and subqueries to combine multiple tables and implemented optimized stored procedures. These enhancements increased database integrity and efficiency, underpinned by comprehensive Entity Relationship Models to effectively layout database relationships. - Performed regular meeting and ad hoc reporting to the management using Tableau dashboards to help them in decision making for company’s transportation needs, product delivery, in app order time and delivery time throughout the year and recommended new routes for product transportation. - Conducted root cause analysis and trend analyses for supplier efficiency programs and supply chain initiatives, providing valuable insights into potential impacts on KPIs and informing future strategic decisions.	

Data Analyst Mittal Metalloys Private LTD , Delhi, India	Mar 2017 to Jan 2021
- Collaborated with stakeholders to understand and validate data requirements, devising marketing solutions to complex challenges. Ensured quality control of aluminum products and played a crucial role in developing future marketing models and mix. - Conducted data exploration, preparation, and cleaning of raw customer data for aluminum products. Built a Python-based classification model to predict customer buying behavior, successfully improving the model's accuracy by 13%. - Applied statistical techniques, including multiple regression analysis and hypothesis testing, to deploy loss minimization and optimization strategies, helping the company navigate price fluctuations and mitigate financial risk. - Automated routine tasks and organized financial data using Excel functionalities, thereby improving efficiency. Developed interactive budget reports utilizing Pivot tables and conducted descriptive statistics and time-series analysis to extract key financial insights and drivers to improve predictability. - Implemented quantitative and qualitative data analysis using Google Analytics and Qualtrics to understand customer’s behavior for products marketing	

- campaigns, media advertisements and generated surveys for gathering primary data about customer preferences.
 - Generated ad-hoc reports and dashboards reflecting key performance indicators (KPIs) such as net sales, business units, and billing hours using Tableau. Enhanced user experience by enabling filter options through slicers and dicers, resulting in **\$ 750K increased sales in aluminum products.**
 - Leveraged on BI tools like **Tableau Desktop to develop business dashboards** enabling leaders for decision making, predefined new calculated fields, report designing and forecasting the number of production orders/sales on monthly basis.
 - Coordinated with **marketing teams to execute A/B testing** for the e-commerce website, developed effective call-to-actions, and defined new marketing segments. These initiatives contributed to a **17% improvement in click-through rates and conversion rates.**
