SUMMARY

AI/ML Engineer with around 3 years of experience designing, developing, and deploying scalable Artificial Intelligence, Machine Learning, and Generative AI solutions across enterprise environments. Expertise in LLM integration, RAG architectures, Agentic AI, NLP, Deep Learning, Computer Vision, MLOps, and Big Data technologies using Python, LangChain, PyTorch, TensorFlow, Spark, Databricks, Kafka, and cloud platforms including AWS, Azure, and GCP. Proven track record of building production-grade AI applications, optimizing model performance, deploying scalable inference systems, and delivering measurable business outcomes through intelligent automation, predictive analytics, recommendation engines, and advanced AI-driven solutions.

SKILLS

Programming & Scripting: Python, SQL, Bash (Pandas, NumPy, SciPy, FastAPI, Flask)
AI Application Development: LLM Integration, RAG Systems, Embedding Models, Vector Databases (FAISS, Pinecone), LangChain, Prompt Engineering, Chatbot Development, Agentic AI
Machine Learning Engineering: Supervised & Unsupervised ML, Feature Engineering, Model Evaluation, Experiment Tracking, Recommender Systems, Time-Series Forecasting, Scikit-learn, XGBoost, LightGBM
Deep Learning: CNNs, RNNs, LSTMs, Transformers, Autoencoders, GANs, Vision & Text Multimodal Models, PyTorch, TensorFlow, Keras
NLP: BERT, GPT Models, NER, Text Classification, Topic Modeling, spaCy, NLTK, LlamaIndex
Computer Vision: OpenCV, YOLO, Image Classification, Object Detection, OCR, Transfer Learning
Big Data & Distributed Processing: Apache Spark, PySpark, Spark MLlib, Kafka, Databricks, Hadoop, Dask
Data Engineering & Storage: ETL Pipelines, Data Modeling, Delta Lake, Parquet, PostgreSQL, MySQL, MongoDB, Redis, Snowflake
MLOps & Deployment: Docker, Kubernetes, MLflow, Kubeflow, DVC, CI/CD (GitHub Actions, Jenkins, GitLab CI), Model Monitoring
Cloud Platforms: AWS (SageMaker, Lambda, ECR, EC2, S3), Azure ML, GCP AI Platform
Model Serving & Optimization: ONNX, TensorFlow Serving, TorchServe, A/B Testing, Hyperparameter Tuning (Optuna / GridSearchCV / RandomizedSearchCV), Model Drift Detection
Visualization & Analytics: Power BI, Tableau, Plotly, Matplotlib, Seaborn
Version Control & Processes: Git, GitHub, GitLab, Agile/Scrum, SDLC

EXPERIENCE

Slack Technologies AI/ML Engineer	Nov 2025 - Present USA
- Architected enterprise-grade Agentic AI solutions leveraging LangChain, Pinecone, GPT-based LLMs, and RAG frameworks, improving knowledge retrieval accuracy by 43% while reducing support resolution times across collaboration platforms. - Led development of intelligent chatbot ecosystems using embedding models, vector databases, FastAPI, and prompt engineering techniques, enabling automated handling of over 1.5 million monthly user interactions. - Designed scalable AI inference platforms utilizing AWS SageMaker, Kubernetes, Docker, and TorchServe, achieving 99.95% service availability while reducing model deployment time by 58%. - Spearheaded multimodal AI initiatives integrating Transformers, OCR pipelines, and vision-language models, improving document understanding accuracy by 37% and accelerating enterprise workflow automation. - Implemented MLOps frameworks using MLflow, Kubeflow, DVC, GitHub Actions, and model monitoring solutions, decreasing release cycles by 45% while strengthening model governance and reproducibility. - Optimized recommendation and personalization engines through advanced feature engineering, LightGBM, XGBoost, and experiment tracking, increasing user engagement metrics by 26%. - Engineered real-time data processing architectures using Kafka, PySpark, Databricks, and Delta Lake, reducing large-scale data processing latency by 41% across AI workloads.	
Quytech AI/ML Engineer	Aug 2022 - Jul 2024 India
- Developed machine learning solutions utilizing Scikit-learn, Python, SQL, and feature engineering techniques for classification, regression, and forecasting use cases, improving prediction accuracy by 24% across multiple client engagements. - Designed NLP applications using BERT, spaCy, NLTK, GPT models, and LlamaIndex to automate text classification and entity recognition processes, reducing manual review effort by 35%. - Built end-to-end ETL pipelines integrating PostgreSQL, MongoDB, Snowflake, and Parquet datasets, improving data quality standards and reducing preparation time for analytics teams by 40%. - Implemented computer vision models using OpenCV, YOLO, CNN architectures, and transfer learning techniques, achieving 93% object detection accuracy and improving automated inspection capabilities. - Optimized deep learning workflows through TensorFlow, Keras, PyTorch, and hyperparameter tuning frameworks, increasing model performance by 22% while reducing training costs and experimentation cycles. - Engineered distributed machine learning pipelines using Apache Spark, Spark MLlib, Hadoop, and Dask, accelerating large-scale model training and feature processing workloads by 47%. - Created Tableau dashboards to monitor model performance, business KPIs, and experiment outcomes, enhancing executive visibility and improving data-driven decision-making. - Supported CI/CD deployment initiatives using Jenkins, GitLab CI, Docker, and SDLC best practices, reducing production deployment effort by 30% and improving release reliability.	

EDUCATION

Masters in Artificial Intelligence University of Bridgeport, Bridgeport, CT	Apr 2026
Bachelors in Computer Science and Engineering Navrachana University, Vadodara, Gujarat, India	May 2024
