Profile

Data and Operations Analyst with experience in data operations, data quality analysis, and process improvement, delivering quantitative insights and cross-functional collaboration. Reduced orphaned product items by 60% through taxonomy optimization and automated weekly KPI reporting, cutting manual effort by 70%. Skilled in SQL, Python, Excel, and Tableau, collaborating with cross-functional teams to enhance operational efficiency. Aiming to leverage analytical and operational expertise to drive data-driven decisions and boost business performance.

Professional Experience

Philtech, Inc

Nov 2024 - Nov 2025

Operations Analyst

Taguig City, Philippines

- Reduced orphaned product items by 60% by optimizing taxonomy, improving categorization logic, validating cross-system data and catalog operations improvements.
- Automated weekly KPI reporting workflows using Visual Basic and Excel, creating **KPI dashboards** and cutting manual effort by 70%
- Conducted data governance audits and validation checks using Excel and ServiceNow, ensuring catalog integrity across multiple systems and reducing data discrepancies
- Performed website QA testing to ensure correct display of product attributes and prevent customer-facing errors.
- Resolved cross-system issues in ServiceNow through root-cause analysis and structured troubleshooting, cutting system downtime by improving issue-resolution speed
- Processed 20–30 daily requests from stores, divisions, corporate teams, and external vendors via email and ServiceNow, using BigQuery SQL to investigate issues and apply corrective actions, ensuring timely resolution and minimizing operational impact
- Standardized product data, descriptions, and images to improve search relevance and customer experience.
- Led cross-team training sessions to support a major catalog cleanup initiative, enabling additional manpower to contribute effectively and accelerating project completion.
- Collaborated with third-party vendors, fulfillment, and IT teams to investigate data issues using SQL queries and quantitative analysis, performed root-cause analysis, and applied corrective actions in ServiceNow, resulting in cleaner data and fewer downstream errors

WTW

Apr 2024 - Oct 2024

Data Analyst

Taguig City, Philippines

- Cleaned, validated, and structured datasets with Excel, VBA macros, and SQL, enabling the analytics team to generate accurate reports on schedule
- Executed end-to-end ETL workflows for country data files, using SQL and Excel to extract raw inputs, remove HIPAA-sensitive information, load cleaned datasets, and transform them into compliant, reporting-ready outputs.
- Validated datasets of 100 to 25,000 rows using Excel VBA macros to detect anomalies and applied SOP-based corrective or escalation actions, ensuring data quality standards were met and reducing downstream data issues
- Conducted anomaly detection and data integrity checks using SQL to reduce reporting errors by 25%.
- Maintained detailed documentation of validation steps, methodologies, and outcomes in Google Sheets and Confluence, enabling reproducible processes and reducing onboarding time for new analysts

Education

Bachelors of Science, Information Technology

Aug 2019 - Jul 2023

Centro Escolar University Makati

Makati, Philippines

• **GPA:** 1.64

• **Coursework:** Database Systems, MySQL, MSSQL, MongoDB, Java, Web Development, Cybersecurity, IT Infrastructure, Networking

Certifications

- Google Data Analytics by Google on Coursera:
 - Completed 9-course program including SQL, R, spreadsheets, Tableau, and Python
 - Verified Certificate ID: B9FY0I32NLUC
 - Completed: Feb 9, 2026

Skills & Interests

- **Technical Proficiencies:** SQL, BigQuery, Python, Visual Basic, Excel, Google Sheets, Tableau, Data Analysis, Data Cleaning, Data Validation, Data Governance, Data Integrity Assurance, Catalog Operations, Reporting, Dashboard Development, Documentation, QA Testing, Taxonomy & Catalog Management, Ecommerce Analytics, Process Automation, Google Sheets Automation, Automation, Building Automation, Root Cause Analysis, ETL, Incident Response, Incident Management, Ad-hoc Analysis, Operations, Dashboard Building, Hardware Knowledge
- **Tools & Platforms:** ServiceNow, BigQuery, Jira, Google Workspace, MS Office, Excel, VSCode, Git
