

Mahitrinadh Reddy Chilukuri

(571) 201-3808 — mahii132ss@gmail.com — LinkedIn

Professional Summary

M.S. Computer Science graduate with experience in Python, Bash, Linux, Git/GitHub, SQL, and software development, with knowledge of Docker, AWS, CI/CD, and cloud technologies. Experienced in developing automation scripts, troubleshooting application and data issues, working with source control, building REST APIs, and supporting data-driven applications. Strong problem-solving, debugging, collaboration, documentation, and technical learning skills with an interest in DevOps, cloud infrastructure, and application deployment.

Technical Skills

DevOps & CI/CD: Git, GitHub, CI/CD, Docker, Containerization, Jenkins, GitHub Actions

Cloud: AWS, Microsoft Azure, Cloud Infrastructure, Virtual Machines, Storage, Networking Fundamentals

Operating Systems: Linux, Unix, Bash, Shell Scripting, System Troubleshooting

Programming: Python, Bash, Java, JavaScript, TypeScript, C++, SQL

Development: REST APIs, Flask, Spring Boot, React.js, Application Debugging, Error Handling, Software Development

Databases: MySQL, MongoDB, SQL, NoSQL, Database Design, Data Management

Tools: VS Code, GitHub, IntelliJ IDEA, Docker, AWS

Professional Experience

YBI Foundation

Aug 2023 – Jul 2024

Data Analyst

Remote

- Developed Python and SQL scripts for data processing, automation, validation, and troubleshooting of recurring data workflows.
- Debugged application and data-processing issues, investigated errors, and implemented solutions to improve workflow reliability and consistency.
- Used Git-based development workflows and maintained reusable scripts and technical documentation for data-processing and reporting tasks.
- Collaborated with team members to understand requirements, troubleshoot technical issues, document workflows, and support process improvements.

Projects

Project Tracker

React.js, JavaScript, TypeScript, Java, Spring Boot, MySQL, REST APIs

- Built a full-stack application using React.js, Spring Boot, MySQL, and REST APIs with separate frontend and backend components for managing projects, tasks, and users.
- Implemented CRUD operations, validation, error handling, API integration, and application debugging to support reliable software workflows.

Wind Turbine Energy Forecasting

Python, Flask, Pandas, NumPy, scikit-learn, REST APIs

- Developed a Python-based data processing and prediction application that transforms wind and weather data and generates analytical results and visualizations.
- Built a Flask application that integrates a trained machine learning model with API-based weather data and user inputs to generate energy predictions.

Domain-Specific Mini Search Engine

Python, Flask, BM25, SentenceTransformers, HuggingFace Transformers

- Developed a Flask application with document crawling, indexing, keyword search, semantic search, analytics, and REST-based application workflows.
- Implemented search analytics, query tracking, autocomplete, result ranking, and AI-generated summaries while troubleshooting application workflows and data-processing issues.

Education

George Mason University

Master of Science in Computer Science

Fairfax, VA

May 2026

Rajiv Gandhi University of Knowledge Technologies

Bachelor of Technology in Computer Science

India

May 2024
