Business Intelligence Developer with **7** years of industry work experience in Data Visualization and Analysis for Healthcare, Sales & Ops, Retail, Financial and Pharmaceutical domains. **Tableau Desktop Certified** Professional with extensive knowledge in Data Mapping, Data warehousing. Hands-on practical experience in writing SQL scripts and Data Modelling. Extensive knowledge in Software Development Lifecycle (**SDLC**) and **Agile – Scrum** Project management process.

SKILLS

Analytics Skills: Tableau, MSTR, Power BI, Qlik Sense, ETL – Tableau Prep, SSIS, Advanced Excel, RapidMiner, Alteryx

Certifications – Tableau Desktop Specialist (Completed), Udemy SQL for Data Science (Completed), Udemy ETL Pipeline in Python (Completed), Udemy Python Pro Boot Camp (Ongoing)

Data Engineering – AWS, GCP

Tableau Skills: Data Blending, LODs, Calculated fields, Parameters, Sets, Groups, Filters, hierarchies, Graphs etc.

Languages & Tech: SQL, Python, R, HTML

Databases: RedShift, Teradata, MSSQL, Oracle, Access, MongoDB, Hive

Tools & Office Software: JIRA, SharePoint, Confluence, MS - Visio, MS - Word, Office, Outlook, PowerPoint.

WORK EXPERIENCE

BI Developer II / JP Morgan & Chase, Houston Tx | 06/2024 - today

- Contributed to strategic decision-making and business process **improvement initiatives** by providing in-depth data analysis and actionable insights derived from Tableau dashboards.
- Utilized Tableau to conduct comprehensive risk analysis and statistical evaluations by visualizing key risk indicators (**KRIs**), assessing their impact on business operations.
- **Migrated and enhanced** existing reports from a Hadoop infrastructure to a hybrid cloud environment.
- Conducted thorough **testing** to ensure data integrity and accuracy by validating that values in the newly generated reports matched those in the original reports.
- Developed and optimized database views and **CTAS** (Create Table As Select) queries to support dynamic reporting requirements and streamline data consumption.
- Designed and implemented **SQL scripts** to generate and trigger **custom reports** through a centralized reporting portal, improving accessibility and reducing manual effort for end-users.
- Utilized **Python scripts** to efficiently transfer initial data chunks, automating the process and significantly improving data handling speed.

BI Consultant / ZS ASSOCIATES, Pune | 04/2021 - 03/2022

- Contributed to **strategic decision-making** and business process improvement initiatives by providing in-depth data analysis and insights derived from Tableau dashboards.
- Led **end-to-end** Tableau projects from requirements gathering and data preparation to dashboard development, testing, and deployment, ensuring timely delivery and alignment with business objectives.
- Constructed complex BI dashboards in **MicroStrategy (I-PAD)/Tableau** and optimized visualization and performance, leading to a **25%** increase in data accessibility and actionable insights for cross-functional teams.
- Configured user and **data-level security as well as Tab/Dashboard** level security for Tableau reports to ensure data confidentiality.
- Designed dashboards featuring forecast, trend lines, and reference lines for measures.
- **Optimized** SQL queries and Tableau report performance by identifying bottlenecks, troubleshooting, indexing strategies, and query optimization techniques, resulting in improved system responsiveness.

- Crafted in-depth **data analysis using SQL** to extract meaningful insights, identify trends, and support data-driven decision-making processes.
- Designed self-serve dashboards (**Ad-hoc reports**) and a landing page to simplify navigation to various reports.
- Managed licenses, users, and user groups and deployed reports on the Tableau server for different client domains.
- Monitored the workflow of **ETL Pipeline**, ran python script for **data quality checks**.
- Created alerts and report subscriptions within the Tableau Server. Developed **SQL scripts** for creating new tables, stored procedures, views, and indexes to enhance data retrieval speed.
- Implemented efficient database schemas utilizing best practices for database **Data Modeling**.
- Successfully coordinated User Acceptance Testing (**UAT**) sessions, gathering feedback and incorporating revisions to meet user requirements and expectations.
- Applied **version control practices** to track changes, promote content between environments, and maintain a consistent deployment workflow.
- Integrated **Tableau Prep Flows** with Tableau Desktop and Tableau Server to seamlessly transition from data preparation to analysis and dashboard creation.

Business Intelligence Engineer / XORIANT SOLUTIONS, Pune | 10/2016 - 03/2021

- Utilized Tableau to conduct comprehensive risk analysis and statistical analysis by visualizing key risk indicators (KRIs), identifying potential threats, and assessing their impact on business operations.
- Implemented **Write back functionality** in dashboards to make it more interactive via Stored Procedures.
- Developed risk heatmaps, scatterplots, trend analysis charts, and probability distribution plots using **Tableau** to facilitate **risk assessment** and decision-making processes.
- Created & Utilized **Power BI** for **direct queries** and worked on **mobile dashboards**, addressing limitations of Power BI Mobile.
- Developed complex **DAX calculations** for time intelligence and improving insights for decision-makers.
- Managed and analyzed large volumes of data, performing analyses such as year-over-year, quarter-over-quarter, YTD, QTD, and MTD.
- Demonstrated **expertise in SQL**, including writing complex queries, stored procedures and conducting testing with multiple clients.
- **ETL development** using SQL Server Integration Services (**SSIS**) to extract, transform, and load data from various sources into data warehouses.
- Implemented an **automated report refresh system** using Python scripting, Windows Scheduler, and batch file execution, ensuring **real-time data availability** and accuracy for stakeholders.
- **Monitored application performance** in different scenarios and created dashboards for alerts, failures, and thresholds in collaboration with the IOT and ML team.
- Maintained detailed **documentation** of Tableau Server configurations, deployment procedures, and troubleshooting steps for reference and team knowledge sharing.
- Fulfilled a standardized documentation process for **database structures**, schemas, and procedures, ensuring easy access and knowledge sharing among team members; reduced onboarding time by **30%** and enhanced cross-functional collaboration.
- Provided **training and mentorship** to junior developers and engineers, assisting with project management, imparting Tableau skills and enhancing overall team performance. **Participated in operational support** for existing reports.

EDUCATION

Master's Degree | University of Cumberlands, Kentucky | 08/2022 – 12/2023
GPA – 3.8

Bachelor's Degree | Pune University, Pune | 06/2012 – 06/2016
Grade – First Class with Distinction
