CORE COMPETENCIES

I am an accomplished airline industry professional with a successful history of organizing the development and implementation of sound policies. I have exceptional follow through abilities, attention to detail and the skills to spot problems and to resolve them quickly and efficiently while remaining focused.

CAREER PROGRESSION

Spirit Airlines
Dania Beach, FL

Aircraft Records Coordinator
June 2024 to Present

I transitioned from STS to full time employee for Spirit. My responsibilities include Fleet Asset Management, involving aircraft acquisition, aircraft sales and lease returns. I regularly communicate with lessors and buyers to answer questions and concerns domestically and internationally, while ensuring protocol and regulatory compliance.

- Interact professionally with a 5 member team to coordinate status reports.
- Coordinate with other departments to problem solve Lessor / A319 Sales Issues.
- I have developed good relationships through the diligent application of my communication skills.
- Perform many administrative functions and assist with quality checking and problem resolution.
- Update and deliver Lease Engine Inductions / Return Reports.

I demonstrated my ability to think strategically and act tactically when we had two leased aircraft that were being returned to the owner company. I organized and delivered all the required paperwork, including any and all maintenance that had been done to the aircrafts along with complete documentation to the Ft. Lauderdale office of the company within 2 weeks. After eight months I was asked to assume additional tasks at the Power Plant Division.

- Provide Off Wing Data Reports such as Life Limited Parts, Line Replaceable Units, NIS, AD Status, SB Status, Open Engineering Items, Fan Blade Mapping.
- Regarded as a person who can dependably make intelligent and informed decisions and have always met and exceeded expectations.

I consistently exhibited a high degree of professionalism in communication, attitude, and teamwork as I provided quality service and resolved issues professionally That has been the hallmark of my career, and I have consistently demonstrated outstanding results, receiving multiple commendations from Senior Management.

STS Technical Services
Jensen Beach, FL

Aircraft Records Coordinator
May 2023 to June 2024

My duties included working with Flydocs Document Management Computer Systems, TRAX Aviation Management Information System, and Microsoft Systems as an independent contractor for Spirit Airlines. I maintained productive relationships with personnel and management as I delivered Utilization Monthly / Quarterly Reports.

- Managed and updated Powerplants OWD Process Sheet.
- Delivered all completed signed OWD Packages to the Engine Shops.
- Provided Engine Health Monitoring Reports and Engine VSL Reports.
- Updated and provided Lessor Mid Term Inspections.

**ATP Flightdocs
Bonita Springs, FL****Aviation Data Quality Analyst
May 2021 to April 2023**

I analyzed and evaluated safety, quality, and maintenance data from various systems for this company that delivers integrated and optimized aviation maintenance, inventory management, operations, and work order software for real-time visibility of data across departments.

- Monitored emerging safety and quality program issues through analysis of data and internal evaluations and provided recommendations to management on a regular basis.
- Prepared and presented overview of statistical data, as well as performance and analysis of trends and findings as required by the company.
- Investigated customer complaints and non-conformance issues and perform root cause and corrective action investigations to improve the quality and safety management system.
- Performed process-based audits to ensure compliance and applicable regulatory requirements.
- Maintained documentation based on protocol requirements.

**United Parcel Service Aircraft Maintenance & Engineering Business Analyst / Aircraft Records Analyst
Louisville, Kentucky****May 1988 to May 2018**

I worked with the CASS Department and FAA to evaluate, analyze and correct deficiencies in the performance and effectiveness of the inspections and maintenance programs of UPS owned aircraft. I verified that all components or parts to be installed on an aircraft "Airframe, Engines, APU, and Landing Gear" were properly certified and in serviceable condition.

- Verified scanned documents and required paperwork that had been reviewed by an inspector.
- Reviewed records for completeness and accuracy upon receipt.
- Scanned and retained all historical records of Airframe, Landing Gear, Engines, and APUs.
- Transitioned pre-owned MD11 Aircraft, verifying records on Airframe, Engine, APU, and Landing Gear.

I performed troubleshooting on standard maintenance problems of company inspection-related subcomponents. When we got a new Purchasing Management system that was not performing as required, I worked with the IT group to reprogram the system to handle the necessary work.
