

Rao M

Java Full Stack Developer

Mobile: 872-262-1018 | E-Mail: kesavm441@gmail.com

SUMMARY:

- Around 9 years of experience in the complete life cycle of the software development process including requirements definition, prototyping, proof of concept, designing, interface implementation, testing, maintenance, and support.
- Experienced in Java, Spring Boot, Microservices, and Hibernate, a developer with extensive knowledge in Application Architecture, Application Design, and Development of Client-Server Applications using Java technologies for clients.
- Expertise in developing server-side code with good knowledge of enterprise and persistence Design Patterns like Singleton, Factory, Facade, Decorator, Observer, and AOP.
- Strong Expertise in Core Java, data structures, algorithms, Object Oriented Design (OOD), and Java concepts such as OOP Concepts, Collections Framework, Swing/AWT development, Exception Handling, I/O Systems, Multi-Threading, Reflection, Generics, and other new features in Java 7 and 8.
- Strong background in using front-end and data transfer techniques such as HTML/HTML5, DHTML, JavaScript, jQuery UI, DOM, AJAX, XML, JAXB, and CSS3.
- Experience in Data driven Testing, Cross browser testing, and Parallel Test execution using Selenium WebDriver, TestNG, and Selenium Grid. Experience in implementing Service Oriented Architectures (SOA) using XML-based Web Services (SOAP/WSDL) and RESTful Web Services.
- Strong experience in building web applications using various H Framework features like Spring IOC, Spring MVC, Spring AOP, Spring ORM, and Spring Security.
- Extensive experience in oracle Flex cube and Flexpay, OBPM, OBLM, OBVAM Applications.
- Strong Knowledge of Java Programming, Selenium WebDriver, Junit, and TestNG.
- Excellent understanding of relational databases, involved in application development using several RDBMS such as Oracle 10g/11g, MySQL, and MSSQL.
- Experience in designed and implemented POS system modules using Java scalability, and maintainability.
- Experience in working with continuous integration and continuous deployment (CI and CD) using Jenkins, Cruise, and Docker SWARM.
- Experiences with CSS Preprocessors like LESS, SASS, Stylus, and Handlebars alongside JavaScript task runners like Grunt. JS.
- Created Stacks using Amazon Cloud Formation templates to launch AWS Infrastructure and resources. Used AWS Lambda to manage the servers and run the code in the AWS.
- Experience with test-driven development (TDD) using unit testing frameworks such as JUnit, Jasmine, Protractor, Selenium, and functional and integration testing.
- Good experience in data using giga space grid on both Unix and windows platform.
- Developed POC on Angular 2.0 components and templates for the application, replaced JavaScript, and used Typescript. Proficiency with Angular 2/4, JavaScript and HTML5.
- Experience in using React JS components, Forms, Events, Keys, and Router, plus Redux, Animations, and Flux concepts.
- Hands-on experience on different IDEs such as Eclipse, Spring Tool Suite, and deployment using application servers and web servers like Apache Tomcat, BEA WebLogic, and IBM Web Sphere.

- Authoring and component design in Adobe Experience Manager (AEM)
- Experience in writing SQL queries in PL/SQL, Triggers, and Stored Procedures in Relational Database management systems like Oracle, MS SQL, MySQL, and DB2.
- Experience in understanding and using NoSQL databases Mongo DB, Apache Cassandra, Apache Ignite, Dynamo DB, Couch DB, and Redis.

TECHNICAL SKILLS

Languages	Java/ J2EE, Groovy, Scala, Go, C, C++, HTML, DHTML, and SQL.
Java Technologies	Core Java, JDBC, Hibernate, JSF, XML Parsers, JSP, Servlets, Portals, EJB, JMS, Java Swing, JavaBeans, Web Services, Microservices, OSGI, spring, Spring Cloud, Spring Boot
Operating system	Windows, UNIX.
Frame Works	Struts 1.x/2.x, Hibernate 3. x, spring 2.5/3.0, Jackrabbit, Groovy on Rails 2. x, Apache Sling
XML Technologies	XML, SAX, DOM, XSL, XSLT, XPath, WSDL, SOAP, Rest
Web Technologies	HTML5, CSS3, JavaScript, AJAX, jQuery, and Angular JS 2/4
Servers	IBM Web Sphere 6.x/5.x, Apache, Web Logic, JBoss, Tomcat 5.x/6.x, JBOSS 4.x/3.x
RDBMS	Oracle, MS SQL Server, MySQL.
NoSQL	MongoDB, Elastic Search, Couch base, Cassandra.
Cloud	AWS, AWS EC2, AWS IAM, AWS load balancing, Route53, AWS SQS, KUBERNETES, MESOSPHERE, DOCKER, Ansible, Puppet
Tools	Eclipse, WSAD, RAD, CVS, JBuilder, JDeveloper, Splunk, Maven, Batch Jobs(Autosys)
Concepts	UML, Design Patterns.
CMS	AEM 6.0, CQ 5.5, 5.6, 5.6.1, JCR/Apache Sling, Day CRX, Components
Methodologies	Agile, Scrum, Waterfall

EXPERIENCE

**NSF-Virginia
Java Full Stack Developer**

Mar 2023 – Present

Responsibilities:

- Enhanced the existing user interface to give a rich experience to the users using HTML, CSS, JavaScript, jQuery, AngularJS, and Node JS. React JS and Bootstrap.
- Developed reusable components and UI features using React JS. Used Spring IOC, Spring MVC Framework, Spring AOP, and Spring Security.
- Work with backend teams for React Frontend and AEM integrations. Debug React issues in AEM.
- Developed new functionalities in the existing applications using J2SE, J2EE (Servlets, JSP), and REST API with the integration of external Vendor systems Tempus and GRC as per the business needs.
- Implemented and consumed REST service calls to process the data to and from our internal system to the vendor system (Cloud-based and hosted outside of the environment) which is being used by the Business for Resource management.
- Involved in the SIT, UAT, BCP, and Hyper care activities and solving productions issues and

doing Root Cause Analysis & troubleshooting operational issues.

- Used Hibernate ORM tools which automate the mapping between SQL databases and objects in Java.
- Cached data using giga space grid on both Unix and windows platform.
- Developed application using Spring core module and POJO's using Eclipse and worked on Messaging service.
- Developed user interface using JSP, JSP Tag libraries JSTL, HTML, CSS, and JavaScript to simplify the complexities of the application.
- Expertise in using JavaScript build tools and task runners like Webpack for React and Angular 7.0/8.0, Grunt, production builds for angular 2.0 with Gulp, and Browser for packaging Node JS modules for browsers. Involved in developing the Pig scripts.
- Resolved existing High and Medium level vulnerabilities (SQL Injection, Directory Traversal, and Cryptography) in the system. Used the Veracode tool to scan the code and to ensure delivery of the secured applications.
- Used JMS pub-sub messaging domain to move the data between the integrated systems.
- Created a new application to connect to the LDAP server and retrieve the user's information as per the requirements using J2EE (JNDI) technologies.
- Collaborated with end-users to facilitate UAT sessions and gather feedback on Oracle Flexcube, Flexpay, OBPM, OBLM, and OBVAM applications
- Developed several console applications using JAVA to connect and retrieve the source files from various data sources like Excel, Word, SharePoint, MS Access DB, and Outlook.
- Used JAVA JDBC for creating applications to process the data from Excel to SQL Server.
- Developed a new service in the existing application using Java, J2EE, and REST API to monitor the logs in the Splunk tool and send an email report to the Business team.
- Customized POS user interfaces using Java Swing or JavaFX to provide intuitive and user-friendly experiences for retail staff.
- Integrated Java POS software with hardware peripherals such as barcode scanners, receipt printers, and cash drawers
- Developed Administrative website using Java POJO's with Spring Framework and Hibernate to talk with Oracle in the backend.
- Used Mockito and Power mock tools for unit testing.
- Hosted applications in the JBOSS server and for CI/CD used Jenkins.
- Used Maven as a build tool and JIRA as a project management tool. Utilized Bitbucket as version control, also for UI flexibility used Source Tree.

Environment: Java, J2EE, HTML5, AEM, JavaScript, CSS3, jQuery, AJAX, Angular JS, Spring Framework, Spring MVC, Spring Security, Spring Boot, Spring Data (Spring JDBC, Spring ORM), JSP, Hibernate, Web services, SOA Architecture, RESTful, OAuth, XML, JSON, Oracle DB, SQL Server, JUnit, Mockito, Power mock, Log4j, Web, JBOSS, Agile/Scrum Methodology, JIRA, SourceTree, Bitbucket, Postman, Veracode, Splunk, SQL Developer, SSMS.

Citi Bank

Oct 2021 – Feb 2023

Sr. Full Stack Java Developer

Responsibilities:

- Technical Analysis of new business requirements, ongoing requests, and enhancements and perform feasibility analysis and document the OSS system impacts.
- Developing the web application in MVC architecture using HTML5, CSS3, Bootstrap,

TypeScript, jQuery&Angular6 on front end.

- Used Typescript as a compiler to compile typescript code into JavaScript and used Typing to manage Typescript definition. Developed a component that varies content based on the user's navigation by using router-outlet directive in Angular.
- All jobs scheduled from workload Automation (Autosys) and developed using PL/SQL.
- Using HTML5, CSS3 & Bootstrap for layout design, navigation, animation buttons, and icons developed the application as Responsive Web Application using CSS media queries.
- Using Spring Boot framework for building cloud Micro Services and developing Spring-based applications radically faster with very less configuration.
- Developing REST services using Spring Boot to serve the UI with JSON data and involved in creating controller advice to handle exceptions and bad requests.
- Performed Database Testing using SQL to check the Data Validation and Data Integrity.
- Use the Postman tool for testing the endpoints and work with the QA to assist in writing the test cases and debugging the defects in the application.
- Performing CRUD operations to persist, retrieve, update, and delete the data according to the user's request.
- Create continuous integration and automated build process using Github and Jenkins.
- Working as a Quality Assurance Analyst in the testing team for preparation and execution of Automation Test scripts and Test Suites with Selenium Grid/Web Driver using TestNG, Maven, and Java.
- Developed SQL queries /scripts to validate the data such as checking duplicates, null values, and truncated values and ensuring correct data aggregations.
- Performed web services testing with SOAP UI and performed Security testing for employee login validations.
- Conducted UAT to ensure that developed systems satisfied the needs of business clients as specified in the functional requirements.
- Developed Data Driven, Keyword Driven, and Page Object Model Automation Frameworks using Selenium.
- Closely worked with developers and product owners in an Agile Environment using technical stories to create automated APIs (REST/SOAP) and built a framework for continuous support for future releases.
- User stories are tracked using JIRA and HP ALM/Quality Center (QC) to track the defects.
- Responsible for the implementation of Hybrid Test Automation Framework, Page Object Model using Selenium Web Driver, TestNG and Maven, and Java.
- Provided technical assistance for the development and maintenance of AutoSys and related scheduling solutions.

Environment: Agile, Spring Tool Suite, JIRA, HTML5, CSS3, Bootstrap, Java 1.8, JavaScript, jQuery, Angular6, JSON, Oracle, RESTful, Spring Boot, Hibernate, MySQL, Oracle SQL Developer, Postgres, Oracle Service Bus, Micro Services, Web Services, XML, JUnit, ANT, Source Tree, Git, Bitbucket, Jenkins, Oracle, Selenium and Maven.

Bank of America - USA
Full Stack Java Developer

Oct 2020 - Oct 2021

Responsibilities:

- Developed the J2EE application based on the Service Oriented Architecture.
- Developed screens using HTML5, XML, Rational Rose, JSP, CSS, JavaScript, jQuery, and

AJAX taking advantage of the frameworks Angular 2, developed applications to assess JSON and XML from RESTful web service from the consumer side using Angular 2.

- Implemented performance-oriented CSS selector, scalable and modular approach for front-end architecture.
- Used Design Patterns like MVC, Singleton, Factory, Session Façade, and DAO.
- Used spring and hibernate for implementing IOC, AOP, and ORM for back-end tiers.
- Created and injected spring services, spring controllers, and DAOs to achieve dependency injection and to wire objects of business classes and implemented Spring Quartz functionality for scheduling tasks such as generating monthly reports for customers and sending those emails about different policies.
- Implemented SOA to develop REST Based Web services using Apache Axis.
- Developed Microservice to provide RESTful API utilizing Spring Boot with Spring MVC, and experienced in using Application Context, and Spring DI for loading Properties during run time.
- Collaborated with end-users to facilitate UAT sessions and gather feedback on Oracle Flexcube, Flexpay, OBPM, OBLM, and OBVAM applications
- DAO pattern to fetch data from database using Hibernate to carry out various databases, used Hibernate Transaction Management, Hibernate Batch Transactions, and cache concepts.
- Developed and implemented processes for the validation and processing of SWIFT, ACH, and ISO20022 messages, ensuring accuracy, completeness, and integrity of financial data.
- Extensively worked on Session Beans, JMS, and EJB-MDBs for messaging mechanism.
- Developed Various Adobe Live Cycle forms to meet end-user requirements and resolved several bugs in existing forms and utilized DOM, SAX parser technologies in implementing XML parsing framework.
- Developed test cases and performed unit testing using Junit with Mockito.
- Used Maven, Nexus, and Jenkins to automate the build and deploy process.
- Implemented Entity beans in the persistence layer, interaction with IBM DB2.
- Worked with high volume and complex stored procedures and packages using TOAD.

Environment: HTML/DHTML, JavaScript, CCS3, Angular 2, Ajax, J2EE, Spring 4.0, Microservices, Spring MVC, Spring DI, Hibernate 4.0, SOA, WSDL, Java 1.8, JMS, TOAD, JAXB, JSON, SOAP, XML, DB2, IBM RAD, WebSphere 7.0, Junit, Jasmine, XSLT, Maven.

Universal Surgical - India
Java Full Stack Developer

May 2018 – Sep 2020

Responsibilities:

- Building applications using HTML, CSS, JavaScript, Java, Spring, Ajax, JSON, Angular 2, AngularJS, and Bootstrap with MySQL database.
- Developed an application using Spring MVC for RESTful web services.
- Used hibernate for database persistence.
- Maintained an existing React, Redux, jQuery, and Angular JS-based application.
- Developed applications with React, Redux, JSX, and Webpack.
- Migrated with AngularJS with Angular 2.
- Worked with Angular 2.0 directives, components, and services.
- Used NodeJS and Java to perform server-side backend operations.
- Developed and prepared test cases for unit testing with JUnit.

- Created popup forms using Bootstrap Modals, Angular Modals, and Angular2 Components. Used Custom Angular2 pipes to provide a better search experience.
- Experience in Transaction management in Spring JDBC template by using Prepared Statement.
- Defined new validations through Angular js for the form field validation implemented through HTML5.
- Used IBM WebSphere web application servers.
- Used the Struts Validator Framework to validate the form data.
- Worked on React JS Virtual Dom and React views, rendering using components that contain additional components called custom HTML tags.

Environment: HTML, CSS, SASS, JavaScript, Angular2, AngularJS, JSON, Bootstrap, Angular6, Angular7, MVC Framework, Node JS, JAVA, Spring, Hibernate Apache Tomcat, Notepad++, Sublime text, MySQL, Microsoft Azure, Tortoise SVN

GDS India Private Limited - India
Java Full Stack Developer

May 2015 – Apr 2018

Responsibilities:

- Involved in creating dynamic website design and programming the application using Angular-JS, HTML, Bootstrap, CSS, and JavaScript.
- Developed Angular services, and controllers and created models for two-way data binding.
- Designed user Interface using Angular UI components such as tabs, grids, dropdowns, etc, and configured the routing service using an Angular-JS router. Involved in developing Angular-JS directives to do reusable UI components.
- Implemented Angular form validations and used Bootstrap to show error, warning, and info messages.
- Used Angular Resource and HTTP services to retrieve the data from the server and to display the content on the browser and took part in creating custom reusable components.
- Involved in creating a custom grid directive, which used JQuery slick grid for handling large data.
- Developed web services using Spring framework and REST and exposed the data to the UI in JSON format.
- Worked on Hibernate to connect and retrieve the data from the SQL Server database.
- Configured with Spring to get properties dynamically and connect with SQL Server database.
- Used Apache Tomcat application server for application deployment and used NPM for JavaScript packaging.
- Involved in developing HTML and JavaScript for client-side presentation and, data validation within the forms.
- Used Spring declarative transaction management to manage transactions in the application.
- Used Maven build tool to build and deploy the application and Jenkins for continuous integration.
- Used Maven build tool to build and deploy the application and Jenkins for continuous integration.

- Worked on POC for Order Processing Integration using AWS services-Lambda functions, Step functions, S3 bucket, EC2, and DynamoDB.
- Installed application on AWS EC2 instances and also configured the storage on S3 buckets
- Used Splunk for logging, analyzing, and monitoring data.

Environment: Java, J2EE, JDK 1.8, Angular-JS, Spring, SOAP/Rest, WebServices, NPM, JavaScript, AWS, Angular6, Angular7 UML, HTML, CSS, BootStrap, RAD 7, JMS, AJAX, JQuery, SQL, Cucumber, JUnit, Maven, GIT, SVN, SPLUNK, Oracle10g
