## Professional Experience

**ENI DISTRIBUTION, INC**

Tucker, GA

NetSuite Systems Analyst

Jan 2023 - Dec 2023

- Generated sales orders, invoices, and reports, ensuring the accurate and timely processing of transactions
- Optimized warehouse operations with RF SMART by tracking inventory movements, implementing efficient storage solutions, and coordinating shipping and receiving activities
- Streamlined order processing and fulfillment workflows including monitoring order statuses, managing back orders, and ensuring on-time deliveries to customers
- Utilized NetSuite's reporting and analytics capabilities to generate performance reports, analyze key performance indicators (KPIs), and make data-driven decisions
- Leveraged automation capabilities in NetSuite to manage customer and vendor relationships, enhancing communication while tracking interactions

**Georgia Tech Professional Development Services**

Atlanta, GA

Student Assistant Developer

Jan 2022 - May 2022

- Created high level reporting dashboard to track employee development metrics using Salesforce object schema
- Developed the project's scope, requirements, metrics, and governance in collaboration with priority stakeholders including, the IT Director, the Salesforce Service Manager, and the Salesforce Architect
- Successfully translated technical concepts into user-friendly solutions, enhancing data visualization and decision-making processes

**State Auto Collision**

Sugar Hill, GA

Data Entry Specialist

August 2020 - Dec 2022

- Inputted customer information, vehicle details, repair work orders, and parts inventory into the CCC ONE estimating system with precision
- Verified and updated inventory records to guarantee accurate tracking of auto parts, supplies, and materials used in repairs
- Maintained digital and physical filing systems for all documents, including repair orders, invoices, receipts, and inventory records
- Provided customer support by accessing and relaying information about repair statuses, costs, and timelines
- Coordinated with technicians, customers, and suppliers to ensure all data is accurately captured and communicated effectively
