DATA ANALYSIS PROJECTS

Project of Your Choosing 06/2025

- Cleaned and analyzed a dataset on [subject of your choice - e.g. COVID statistics] in [tool of your choice - e.g. BigQuery, MySQL, MSSQL], creating views with data subsets to analyze [specific variables - e.g. growth/change over time, differences across regions/countries, etc.]
- Imported views to [Microsoft Excel/Google Sheets] to clean and format data for use in visualizations
- Created various visuals in [tool of your choice - e.g. Tableau, Power BI, Excel], including [bar charts, line graphs, and a map chart/other visuals], to display data conclusions, then compiled them into an interactive dashboard

Data Analytics Capstone Project • Google Data Analytics Professional Certificate 06/2025

- Imported 12 Excel datasheets with millions of entries into R, then used tidy package to clean the datasets and prepare them for analysis
- Joined all of the datasets together, created subsets of the data, and converted each attribute to the proper data type before performing analysis to find differences between members and casual customers
- Developed visuals using the ggplot2 package to display the analysis results and provide meaningful conclusions for stakeholders to implement
