

MATTHEW MOORE

Senior Full-Stack .NET Developer | C#, ASP.NET Core, Angular, React | Azure, SaaS, Microservices & Cloud Solutions

Dallas, TX 75216 | (512) 222-8691 | matt.e.moore22@gmail.com | [LinkedIn](#)

SUMMARY

Full Stack .NET Developer with over 8 years of expertise architecting scalable cloud solutions across finance, healthcare, logistics, and cryptocurrency sectors. Core strengths in C#, ASP.NET Core, and microservices architecture, complemented by advanced frontend capabilities with React and Angular. Consistently improves backend performance by 20-45% through clean architecture principles while seamlessly integrating responsive frontend experiences. Aspiring Solution Architect who drives technical excellence through collaborative leadership and end-to-end system optimization.

SKILLS

Programming Languages: C#, JavaScript, TypeScript, Python, Java, SQL, HTML5, CSS/SCSS

Backend Technologies: .NET Core, ASP.NET Core, Entity Framework Core, Web API, MVC, LINQ, GraphQL

Frontend Frameworks: React.js, Angular, Redux, RxJS, Bootstrap, Material UI, jQuery, Chart.js

Cloud & DevOps: Azure (App Services, Functions, Logic Apps, Service Bus, API Management, AD B2C), AWS, GCP, CI/CD, Azure DevOps, GitHub Actions, Docker, Kubernetes, Terraform

Databases: MS SQL Server, MongoDB, PostgreSQL, Redis, Cosmos DB, Azure SQL, Entity Framework

Architecture Patterns: Microservices, Event-Driven, RESTful APIs, CQRS, DDD, Clean Architecture

Message Brokers: RabbitMQ, Azure Service Bus, Kafka

Testing Frameworks: xUnit, NUnit, Jest, Cypress, Postman, Newman

Authentication/Security: OAuth 2.0, OpenID Connect, JWT, Azure AD, Identity Server

Additional Skills: HIPAA Compliance, SaaS Architecture, SDK Development, Agile/Scrum, Performance Optimization

WORK EXPERIENCE

Senior Backend .NET Developer — Snap Tech IT, Tempe, AZ *June 2022 - PRESENT*

- Deployed web applications and their integration across different systems and services using Azure PaaS services like App Services, Service Bus, Azure Storage Account (Queues/Blobs), Web Jobs, Functions, Azure AD, Azure API Management, Azure SQL, Application Insights and SendGrid.

- Architected responsive React dashboards powered by .NET RESTful APIs, serving over 1,500 monthly users across ERP and marketing platforms, with dynamic UI components built using HTML5, SCSS, Bootstrap, and TypeScript, supported by C# and .NET Core backend logic.
- Designed CI/CD pipelines in Azure DevOps for .NET projects, enhancing software deployment efficiency by 45%.
- Mentored a team of 6 developers in Agile environments, improving React component optimization, C# code quality, and TypeScript best practices.
- Collaborated on cloud-based solutions using Azure App Services, ensuring scalability and performance for enterprise applications.

Backend .NET Developer — AtNetPlus, Stow, OH

January 2021 – May 2022

- Played as a full-stack developer role using ASP.NET Core and Angular for Healthcare clients, optimizing C# backend logic to boost data processing speeds by 25%.
- Built React-based user interfaces with .NET RESTful APIs, delivering seamless frontend experiences for Marketing systems serving 10K+ users.
- Integrated Node.js microservices into .NET ecosystems, enhancing backend modularity and scalability for consulting projects.
- Worked 20 hours/week in Agile sprints during university, leveraging Visual Studio and Git for software development lifecycle management.

Full-Stack .NET Developer — Voyager, Houston, TX

August 2019 – December 2020

- Engineered real-time Logistics tracking web applications with C# and ASP.NET Core, integrating Angular frontend to support 40K+ monthly transactions.
- Constructed React components for .NET-driven dashboards, improving frontend performance and user experience by 20%.
- Utilized FastAPI for lightweight RESTful API endpoints within a .NET framework project, reducing server response times by 15%.
- Balanced 15-20 hours/week with university, applying Agile methodologies and SQL Server for full-stack development.
- Optimized software solutions using Entity Framework for database interactions, enhancing application scalability.

Junior Software Developer — AppVerticals, Dallas, TX

August 2018 – July 2019

- Helped build cryptocurrency web platforms using C# and .NET, integrating Angular-based blockchain dashboards to handle 1,500+ daily transactions.
- Implemented React-based interfaces with ASP.NET Core APIs, enhancing real-time data visualization using Chart.js for end users.

- Supported backend development with Node.js scripts within .NET systems, improving API throughput by 15%.

Software Engineer Intern — Corduro, Dallas, TX

August 2017 – July 2018

- Assisted in Node.js API development within a .NET environment, contributing to scalable web application foundations.
- Launched full-stack career post-high school, utilizing Visual Studio and SQL Server for software development projects.
- Gained hands-on experience in Agile workflows, focusing on frontend and backend integration.

EDUCATION

Bachelor of Science in Computer Science

Texas Wesleyan University — Fort Worth, TX

August 2018 – May 2022

Relevant Coursework: Advanced Algorithms, Cloud Computing, Database Systems, Software Architecture
