Work status: US citizen | Clearance: active Public Trust

PROFESSIONAL SUMMARY

Experienced QA Analyst with 8 years in software testing across web and client-server applications. Skilled in Selenium, UFT, Java, TestNG, and Cucumber for automation, with strong knowledge of SDLC, Agile, and Waterfall methodologies. Proven ability to design test plans, build automation frameworks, and execute functional, regression, and UAT testing across domains including Insurance, Banking, and E-commerce.

EDUCATION & CERTIFICATES

- Certificate: HP-UFT 12.0 Automation
- Certified ACCELQ Automation Engineer
- Bachelor's Degree: Business Administration, Mohammed V University, Rabat Morocco

CORE STRENGTHS

Programming Language: VB script, Java, SQL | IDE: Eclipse, SQL Developer, IntelliJ | Product | Web Technologies: HML, XML, CSS, JSON | Management tool: JIRA |, ALM | Version control: Git & GitHub, |CICD: Jenkins | Testing tools: UFT, Selenium WebDriver, | Karate framework |TestNG | Maven, | Cucumber, | Postman | Mail.XML | Mail.DAT | SoapUI

PROFESSIONAL EXPERIENCE

United States Postal Service - Assurety Consulting Inc, Sterling, VA. June 2023-Present

Sr. QA engineer

- Test Planning: Developing test plans and strategies to ensure thorough testing of software applications. Postal One, FAST (USPS - Facility Access and Shipment

Tracking), Program Registration, Incentives, Panorama, Business Customer Gateway.

- Testing software applications, systems, and tools used by USPS, such as mail processing, tracking, and customer service systems.
- Test Case Design: Creating detailed test cases, test scripts, and test data to cover different scenarios.
- Test Execution: Performing manual testing activities, including functional, regression, integration, and user acceptance testing.
- Defect Reporting: Identifying and documenting software defects, including providing clear steps to reproduce issues.
- Regression Testing: Conducting regular regression testing to verify that new code changes do not introduce new defects.
- ALM Tool Usage: Utilizing Application Lifecycle Management tools like ALM to manage test artifacts, test execution, and defect tracking.
- proficient in most of submission methods, including Mail.DAT (subject Matter expert),
- Mail.XML, BMEU and postal wizard, SASP, BIDS, Induction and informed delivery
- Utilize UFT to create and maintain reusable test components.
- Provide training and support to team members on test automation practices and UFT usage
- Design, develop and execute automation test scripts using the BPT automation framework of UFT
- Collect and enter all issues/defects reported by subject matter expert testing team in a timely manner with accurate and detailed reproducibility steps along with frequency of problem and all supporting comments and documentation
- Environment: ALM, SQL, Windows, UFT, VB script SoapUI, Ready API, Postman, MS Office suite SDLC, STLC, Agile/Scrum, JSON, Mail.XML, Mail.DAT: Chrome, Firefox and IE.

City National Bank (Contract -Soft Systems) – Vienna, VA June 2020-May 2023

Test Automation Engineer

- Developing Automation framework implementing Page Object Model, using Java, Selenium WebDriver, and Cucumber.
- Performing BDD (Behavior Driven Development) using Cucumber Features, Scenarios, and Step Definitions in Gherkin format.
- Experience in Core Java, and OOPS concepts.
- Using MAVEN for build management, and Jenkins for Continuous Integration of the builds.
- Assessing and analyzing user stories and participating in Sprint planning, Review Sessions C Scrum
- Meetings, and developing Test scenarios, Test cases, Test Data, and Test reports.
- Performing User Acceptance Testing (UAT) exclusively in an agile environment.
- Using Selenium WebDriver to run test cases in multiple browsers and across platforms.
- Performing UI, Functional, and Regression testing using Selenium WebDriver, Cucumber Maven, and Jenkins.
- Integrating Automation scripts (Selenium WebDriver API) in Continuous Integration tools (Jenkins) for nightly consignment run of the Script.

- Utilizing JIRA as a defect-tracking tool on the project.
- Examining the Business Requirements Document (BRD), and designing Test cases and Test scripts for
- Performing End-to-End testing of the database to check data integrity using SQL queries. Environment: Selenium WebDriver, Java, Jenkins, SQL, Maven, XPath, GitHub, Windows, MS Office suite; JIRA, SDLC, STLC, Agile/Scrum, JSON, Browsers: Chrome, Firefox and IE. Core Java. cucumber framework, Karate framework

New York Life Insurance (Contract -Soft Systems) – New York, NY December 2018 – June 2020

QA Automation Tester

- Assisted in designing and ensuring the overall integrity of the testing/validation strategies and ensuring that requirements documentation could be easily translated into test plans/cases.
- Prepared designs and test cases for new products and functionalities
- Developed code to test and debug new and existing products.
- Scheduled jobs in production to ensure deadlines were met.
- Worked on content development and conversions.
- Supported the quality lead by developing and analyzing key performance metrics.
- Developed test measures from requirements documents, best practices and end-user feedback.
- Reviewed test plans and procedures to ensure system requirements were met.
- Participate in Agile Scrum methodology and attend Daily Scrum, Sprint Grooming, and Sprint Planning and Sprint Review meetings.
- Utilizing CSS selectors, IDs, and XPaths to locate elements on Web pages.
- Set up the Automation framework using Selenium WebDriver to run test cases in multiple browsers and platforms.

Farmers Insurance (Contract -Soft Systems) – San Francisco, CA June 2017 – November 2018

Manual QA Test Engineer

- Reviewed and analyzed system specifications.
- Design, develop, implement, and maintain software to test the product/application
- Created and managed bug reports and communicated with the team.
- Handled technical communications with Partners to understand clients' systems or APIs.
- Maintained, and operated test automation frameworks written in Selenium Strong SQL skills employing complex queries
- Executed test scripts and reviewed results.
- Reported and documented technical issues.
- Created logs to document testing phases and defects.
- Reported bugs and errors to development teams.
- Involved in testing the application utilizing the Scrum (Agile) methodology.
- Worked with cross-functional teams to ensure quality throughout the software development life.
