(678) 522-9149 | nandu91.b@gmail.com | [linkedin.com/in/nanditha-bojja-21580028a/](https://www.linkedin.com/in/nanditha-bojja-21580028a/)

EDUCATION

Bachelor of Science, Computer Science & Engineering

Relevant Coursework: *Data Structures & Algorithms, Object-Oriented Programming, Database Management Systems, Operating Systems, Computer Networks, Software Engineering, Machine Learning, Generative AI, Web Technologies*

Achievements: First Prize- Codeathon (Coding Competition) | Graduated with Distinction (CGPA: 3.8/4.0)

PROFESSIONAL EXPERIENCE

SUN Network Solutions

AI Software Engineer

July 2025 – till date

- Developed and integrated Generative AI solutions using Large Language Models (LLMs), Python, and REST APIs to automate document processing, text summarization, intelligent search, and business workflow optimization for enterprise applications.
- Engineered AI-powered application features by integrating LLM services with backend systems, designing prompt workflows, processing structured and unstructured data, and implementing secure API integrations to enhance user productivity and decision-making.
- Partnered with cross-functional teams to deliver scalable AI applications by performing model evaluation, debugging, testing, technical documentation, and continuous feature enhancements while following Agile development practices, Git version control, and CI/CD workflows.

SNN Technologies

Jr AI Software Engineer

October 2023 – June 2025

- Contributed to the development of AI-driven enterprise applications by building backend services, REST APIs, and workflow automation solutions using Java, Python, Spring Boot, Angular, JSON, and XML, while supporting frontend-backend integration and scalable web application development.
- Processed and validated structured and unstructured data using SQL, JSON, XML, CSV, Excel, and REST API payloads, performing debugging, testing, performance optimization, and collaborating with cross-functional teams in Agile Scrum environments using Git and CI/CD.
- Assisted in developing Generative AI and computer vision solutions using LLMs, TensorFlow, Keras, Flask, and OpenCV, contributing to model training, image processing, workflow automation, technical documentation, and enterprise application enhancements.

TECHNICAL SKILLS

Programming Languages: Java, Python, SQL, JavaScript, TypeScript

Frontend: Angular, HTML5, CSS3, Bootstrap, Responsive Web Design

Backend: Spring Boot, REST APIs, Microservices, Flask

Artificial Intelligence & Machine Learning: Generative AI, Large Language Models, TensorFlow, Keras, OpenCV, CNN

Databases: MySQL, MongoDB

Data Processing & Integration: JSON, XML, CSV, Excel, Data Validation, API Integration, Webhooks

Developer Tools: Git, GitHub, Visual Studio Code, Jupyter Notebook, Google Colab

Software Development: Agile Scrum, SDLC, CI/CD, Code Reviews

Core Competencies: Object-Oriented Programming (OOP), Workflow Automation, Debugging, Testing, Troubleshooting, System Integration, Performance Optimization, Technical Documentation
