

NAVYA PASUPUREDDI

DATA ANALYST | SQL | Python | Power BI | Tableau

navyapasupureddi99@gmail.com | 617-516-3856 | USA

PROFESSIONAL SUMMARY

Data Analyst with **5+ years of experience** working with large and complex datasets across fintech and healthcare. Strong hands-on experience in SQL, Python, data cleaning, validation, transformation, statistical analysis, KPI reporting, and business intelligence. Experienced building dashboards and visualizations with Power BI and Tableau, automating recurring data workflows, identifying trends and anomalies, and translating business requirements into actionable insights. Strong background working with cloud data platforms, ETL pipelines, and cross-functional stakeholders.

TECHNICAL SKILLS

Data Analysis: SQL, Python, Pandas, NumPy, Statistical Analysis, Data Cleaning, Data Validation, Data Transformation, Data Modeling, Data Quality, KPI Analysis, Ad Hoc Analysis.

Business Intelligence: Power BI, Tableau, Looker Studio, Excel, Dashboard Development, Reporting, Data Visualization, Data Storytelling.

Data Engineering & Cloud: ETL/ELT, Data Pipelines, PySpark, Apache Spark, Azure Databricks, Azure Data Factory, Azure Synapse, AWS Glue, AWS S3, AWS Lambda, BigQuery.

Databases & Tools: Relational Databases, SQL Views, Git, GitHub, Jupyter, Technical Documentation, Data Governance Concepts.

Analytics: Trend Analysis, Pattern Identification, Anomaly Detection, Predictive Modeling, Regression, Classification, Feature Engineering, Model Validation.

CERTIFICATIONS & TRAINING

Python Programming | AWS Cloud Fundamentals | Artificial Intelligence & Machine Learning | Microsoft Certified: Azure Fundamentals (AZ-900)

PROFESSIONAL EXPERIENCE

Data Analyst, Mastercard | 05/2024 – Present | USA

- Collect, clean, transform, validate, and analyze large-scale financial datasets using SQL, Python, and PySpark from multiple sources.
- Develop analytical datasets and repeatable data workflows to support reporting, KPI monitoring, and business decision-making.
- Write and optimize SQL queries for data extraction, transformation, validation, reconciliation, and reporting.
- Perform statistical and exploratory analysis to identify trends, patterns, anomalies, and opportunities for process improvement.
- Build and maintain Power BI and Tableau dashboards that communicate KPIs, trends, exceptions, and actionable insights to stakeholders.
- Automate recurring data preparation and reporting workflows using Python, Spark, AWS Glue, S3, and Lambda.
- Investigate data-quality issues and inconsistencies, perform root-cause analysis, and implement corrective transformations and validation checks.
- Partner with business, engineering, analytics, compliance, and operations teams to gather requirements and translate business questions into analytical solutions.
- Document data definitions, transformation logic, validation rules, methodologies, and reporting processes.

Data Analyst, Novisync Solutions India Pvt Ltd | 06/2020 – 11/2023 | Andhra Pradesh, India

- Analyzed healthcare and operational datasets using SQL, Python, and PySpark to identify trends, patterns, anomalies, and performance drivers.
- Performed data collection, profiling, cleansing, transformation, validation, and reconciliation across multiple data sources.
- Developed Azure Databricks and Azure Data Factory pipelines to support recurring data processing, reporting, and analytics.
- Created Power BI and Tableau dashboards to monitor KPIs, operational metrics, trends, and business performance.
- Performed ad hoc analysis and prepared reports to support operational and strategic decisions.
- Implemented data-quality checks and investigated discrepancies to improve accuracy, integrity, and consistency across analytical datasets.
- Collaborated with technical and non-technical stakeholders to understand reporting requirements, clarify business questions, and communicate findings.
- Maintained documentation for data sources, transformation processes, analytical methodologies, and recurring reporting workflows.

PROJECTS

Retail Sales & Inventory Analytics Dashboard

- Analyzed sales and inventory data using SQL and Python to identify trends, high-performing categories, inventory patterns, and operational KPIs.
- Built Power BI/Tableau dashboards to communicate performance trends and support data-driven decisions.

Marketing Performance Analytics Dashboard

- Combined multi-source marketing data, cleaned and transformed datasets, and created recurring KPI reporting workflows.
- Developed visualizations to compare campaign performance, audience trends, and business metrics.

Financial Risk & Fraud Analytics Platform

- Built SQL, Python, and Spark workflows for transaction data preparation, anomaly detection, feature engineering, and predictive analysis.

- Implemented data validation and reconciliation checks to improve reliability of analytical outputs.

EDUCATION

University of Massachusetts Boston – Boston, MA, USA

Master's Degree in Information Technology | 01/2024 – 12/2025

Lendi Institute of Engineering and Technology – Andhra Pradesh, India

Bachelor of Technology in Electronics and Communication Engineering | 06/2017 – 05/2020

ADDITIONAL

Strong attention to detail, analytical problem-solving, stakeholder communication, organization, and ability to manage multiple priorities in fast-paced environments. Experienced working with cloud platforms, ETL processes, relational data, BI reporting, and data-quality initiatives.
