## SUMMARY

DevOps Engineer with 4+ years of experience building and automating highly available multi-cloud platforms (AWS, Azure, GCP), managing 200+ resources and processing 5M+ events daily. Proven expertise in Terraform, Kubernetes (EKS/AKS/GKE), CI/CD pipelines, and DevSecOps — delivering up to 45% faster deployments, 35% reduction in MTTR, and 28% infrastructure cost savings. AWS Certified Solutions Architect and GCP Associate Cloud Engineer with a strong record of leading incident response, container orchestration, and SRE initiatives in Agile environments.

---

## PROFESSIONAL SKILLS

**Cloud Platforms:** AWS (EC2, S3, RDS, Lambda, VPC, IAM, EKS, Glue, CloudFormation, CloudWatch), Azure (VMs, ADF, Synapse, AKS, Azure DevOps), GCP (Compute Engine, GKE, BigQuery, Dataflow, Cloud Functions, Pub/Sub, IAM)

**Infrastructure as Code:** Terraform, AWS CloudFormation, Ansible, Pulumi

**Containers & Orchestration:** Docker, Kubernetes (EKS, AKS, GKE), Helm, Kustomize, ArgoCD

**CI/CD & DevOps:** Jenkins, GitHub Actions, GitLab CI/CD, Azure DevOps, AWS CodePipeline, Spinnaker, GitOps, DevSecOps

**Monitoring & Observability:** Prometheus, Grafana, AWS CloudWatch, Datadog, ELK Stack (Elasticsearch, Logstash, Kibana), Splunk, Alertmanager

**Security & Networking:** VPC, IAM, RBAC, KMS, AWS Secrets Manager, HashiCorp Vault, TLS/SSL, Zero Trust, WAF, Route 53, VPN, Load Balancers

**SRE & Reliability:** SLAs/SLOs, MTTR Reduction, Root Cause Analysis, Postmortems, Chaos Engineering, Incident Management

**Databases & Storage:** PostgreSQL, MySQL, MongoDB, DynamoDB, Snowflake, AWS RDS, S3, GCS, Delta Lake

**Data Pipelines:** Apache Spark, Kafka, Apache Airflow, ETL/ELT, Data Warehousing

**Programming & Scripting:** Python, Bash/Shell Scripting, PowerShell, Go, JavaScript, Node.js

**Platform Engineering:** AWS SageMaker, GCP Vertex AI, JupyterHub on Kubernetes, ML Model CI/CD

**Development Practices:** Agile (Scrum/Kanban), TDD, GitOps, DevSecOps, Git, GitHub, GitLab, Bitbucket

---

## EXPERIENCE

### DevOps Engineer - Cloud Operations Resilience Engineerin | Capital One | USA

Aug 2024 - Present

- Architect and orchestrate multi-region infrastructure using Pulumi and Ansible, provisioning 150+ cloud resources and strengthening disaster recovery readiness. Lower RTO by 35% and maintain 99.95% availability through resilient failover strategies.
- Implement Istio-based service mesh across AKS and GKE clusters, securing communication for 20+ microservices and enforcing traffic policies. Boost request tracing visibility by 40% and minimize service-to-service latency issues by 25%.
- Integrate DevSecOps practices into CI/CD pipelines using HashiCorp Vault and KMS, securing 100+ secrets and streamlining encryption workflows. Cut security vulnerabilities by 40% and enhance compliance audit readiness by 50%.
- Apply chaos engineering strategies across staging and production environments, executing 50+ failure scenarios to test resilience. Strengthen system fault tolerance by 30% and decrease unplanned downtime incidents by 25%.
- Strengthen cloud security posture by implementing Zero Trust architecture, WAF policies, and advanced load balancing across 3 cloud environments. Prevent 95% of unauthorized access attempts and shrink external attack surface exposure by 40%.

### DevOps Engineer - Cloud Infrastructure | ACL Technologies | India

Jan 2022 - Dec 2022

- Defined and monitored SLOs/SLAs for 25+ critical services, led incident response, and conducted RCA for production issues. Accelerated MTTR by 30% by introducing remediation workflows and refining on-call processes.
- Built and optimized scalable data platforms using Snowflake, DynamoDB, and Delta Lake, handling 10TB+ structured and unstructured data. Elevated query performance by 40% and enabled faster analytics for high-volume workloads.
- Enhanced observability by implementing Datadog and Splunk across 50+ services, enabling centralized logging and metrics tracking. Shortened incident detection time by 35% and filtered alert noise by 30% through intelligent tuning.
- Developed internal tools using Go and Node.js, streamlining deployment workflows and reducing manual intervention across environments. Raised deployment efficiency by 45% and lowered operational overhead by 30%.

### Cloud Engineer - DevOps Solutions | Searce | India

Aug 2020 – Dec 2021

- Designed and deployed cloud infrastructure across AWS, Azure, and GCP using Terraform and CloudFormation, increasing system availability by 35% and cutting manual provisioning effort by 70% through modular IaC templates.
- Built and optimized CI/CD pipelines using Jenkins, GitHub Actions, and Azure DevOps, shortening deployment time by 45% and embedding automated regression testing into every PR workflow.
- Managed Docker and Kubernetes (EKS, AKS, GKE) environments for 10+ workloads, implementing rolling updates and canary deployments to achieve 30% higher uptime with zero planned downtime.
- Configured AWS VPC networking including security groups, NAT gateways, and Route 53 DNS for multi-region deployments, lowering network-related incidents by 25% and accelerating cross-region failover speed by 40%.

---

## EDUCATION

**Master of Science - Computer Science** | University of North Texas,Denton,Texas,India

Jan 2023 - Dec 2024

**Bachelor of Science - Computer science** | Priyadarshini Institute of Science and Technology,India

Jul 2018 – Nov 2021

---

## CERTIFICATIONS

- AWS Certified Cloud Practitioner
- AWS Certified SysOps Administrator – Associate
- GCP Certified Associate Cloud Engineer
