

Divy Patel

Cybersecurity Analyst | SOC Operations | SIEM | Incident Response | Cloud Security

divypatel3838@gmail.com | +1 (856) 956-0359 | Glassboro, NJ, USA | [LinkedIn](#) | [Portfolio](#)

Summary

M.S. Cybersecurity candidate at Rowan University (GPA 3.7, May 2026) holding CompTIA Security+, CySA+, CSAP, and AWS Cloud Practitioner certifications. Hands-on expertise in SOC operations, SIEM threat detection, and incident response automation using Splunk, Elastic SIEM, Azure Sentinel, Shuffle SOAR, and Wireshark. Detail-oriented professional focused on leveraging automation and analytical problem-solving to protect organizational assets and ensure data integrity.

Skills

SIEM & Tools: Splunk, Elastic SIEM, Azure Sentinel, Kali Linux, Wireshark, Nmap, Shuffle SOAR, The Hive, CrowdStrike, Sentinel
Security: Log Analysis, Threat Detection, Incident Response, Vulnerability Assessment, Access Control, Risk Management, Firewall Configuration, MITRE ATT&CK, KQL, Network Traffic Analysis, Policy Development
Development: Python, Bash, JavaScript, Java, HTML/CSS, React, MS Office

Work Experience

React Developer Intern Oct 2023 – May 2024

OrbitWebTech LLP | Ahmedabad, India

- Created responsive user interfaces using React, enhancing overall application performance.
- Implemented Redux for centralized state management, improving load efficiency by 30%.
- Integrated RESTful APIs for efficient data retrieval and developed reusable components to improve code quality.

Education

M.S. in Cybersecurity | Rowan University, Glassboro NJ | GPA: 3.7 May 2026
B. Tech in Information Technology | Silver Oak University, Ahmedabad | GPA: 8.92 Jan 2023
Diploma in Information Technology | Gujarat Technological University, Ahmedabad | GPA: 8.17 Jan 2020

Certifications & Training

CompTIA Security+ (SY0-701) | CompTIA CySA+ (CS0-003) | CSAP Stackable | AWS Cloud Practitioner (CLF-C02)

Project Experience

SOC Home Lab - Elastic SIEM & Kali Linux Attack Simulation

Deployed Elastic SIEM, simulated live attacks using Kali Linux, wrote custom KQL detection rules and triaged alerts through the SIEM dashboard using MITRE ATT&CK framework.

SOC Automation Pipeline - Shuffle SOAR + The Hive

Built end-to-end alert triage pipeline integrating Shuffle SOAR with The Hive case management. Automated incident response playbooks reducing manual analyst workload.

Splunk SIEM Firewall Log Analysis

Ingested firewall logs into Splunk, built custom SPL dashboards and queries to detect port scans, anomalous traffic, and lateral movement indicators.

Audit & Risk Assessment - Retail Business | TX Super Secret Cloud (TXSS)

Applied NIST 800-53 controls for retail security audit. Developed Access Control SOP and Physical Security Plan for cloud infrastructure enforcing least-privilege principles.
